Newman in the Story of Philosophy D. J. Pratt Morris-Chapman,2021-07-01 Saint John Henry Newman is widely acknowledged to be an important theologian Despite this Newman commentators believe that his work has received little recognition by philosophers This book explores whether or not Newman's supposed philosophical isolation constitutes a misconception in Newman historiography First of all it does this by examining Newman's general philosophical reception over the last two centuries surveying a wide range of philosophical positions and philosophers from the many different branches of this discipline The book then focuses upon whether or not Newman has made a contribution to one specific philosophical position seldom given attention within Newman scholarship the particularist approach to epistemology In its investigations into this and the other more general dimension of Newman's philosophical reception the book offers an historical re evaluation of Newman's philosophical legacy

Transformation Michael Krausz, 2007-01-01 In this book Michael Krausz addresses the concept of interpretation in the visual arts the emotions and the self He examines competing ideals of interpretation their ontological entanglements reference frames and the relation between elucidation and self transformation The series Interpretation and Translation explores philosophical issues of interpretation and its cultural objects It also addresses commensuration and understanding among languages conceptual schemes symbol systems reference frames and the like The series publishes theoretical works drawn from philosophy rhetoric linguistics anthropology religious studies art history and musicology *Ethical Naturalism* Susana Nuccetelli, Gary Seay, 2011-12-08 Ethical naturalism is narrowly construed as the doctrine that there are moral properties and facts at least some of which are natural properties and facts Perhaps owing to its having faced early on intuitively forceful objections by eliminativists and non naturalists ethical naturalism has only recently become a central player in the debates about the status of moral properties and facts which have occupied philosophers over the last century It has now become a driving force in those debates one with sufficient resources to challenge not only eliminativism especially in its various non cognitivist forms but also the most sophisticated versions of non naturalism This volume brings together twelve new essays which make it clear that in light of recent developments in analytic philosophy and the social sciences there are novel grounds for reassessing the doctrines at stake in these debates **The Best Books for Academic Libraries: Religion and philosophy**, 2002 The Philosophical Review, 1996 **International Philosophical Quarterly**, 1995 **101 Good Reasons to Believe** James D. Sideras, 2018-01-04 This book presents a strong case for the Christian faith by using scientific evidence and philosophical reasoning Although an abundance of Christian apologetic textbooks exist most are not easily accessible because they offer long and scholarly treatments of subject matter that may not appeal to lay readers This book differs in two ways First it presents the case for Christianity in a friendly scholarly prose which enables readers to plainly understand each reason to believe Second these reasons are concisely structured so that within minutes readers can quickly examine each argument in light of the evidence presented 101 Good Reasons to Believe is essential reading for theists who wish to strengthen their faith in God and for nontheists who desire to critically investigate the truth claims of the Bible This book includes topics such as astronomical evidence for the existence of God evidence for creation and intelligent design refutation of Darwinian evolution the historicity of Jesus why there is human suffering if God exists the accuracy of the Bible and evidence for heaven and hell The 101 reasons presented make thought provoking and compelling reading for scholars and non scholars alike The Review of Metaphysics, 1995 **A Reasonable Belief** William Greenway, 2015-09-11 Insofar as the essence of this philosophical spirituality is continuous with the essence of Christian spirituality I am able to specify how we can be utterly confident that it is wholly reasonable and good to affirm give thanks for life and testify to faith in God from the preface While it is clear that a lot of people believe in God whether they should is a matter of loud debate Since the Enlightenment and especially in the last 150 years a consensus has been building

in Western philosophy that belief in a transcendent order and especially in a supreme being is unreasonable and should be abandoned. The result of this trend has been to delegitimize religious belief to claim that those who believe do so against scientific evidence and rational thought. In this confident and sensitive book William Greenway carefully guides the reader through the developments in Western intellectual life that have led us to assume that belief is irrational. He starts by demonstrating that along with belief in God, modern definitions of human rationality have also rejected free will and moral agency. He then questions the Cartesian assumption that it is our ability to think that makes us most human and most real. Instead, Greenway explains, it is our capacity to be grasped by the lives and needs of others that forms the heart of who we are. From that vantage point, we can see that faith is not a choice we make in spite of evidence to the contrary; it is rather wholly rational and in keeping with that which makes us most human. Every person who either has faith or is contemplating faith can be assured that belief in God is both reasonable and good. Greenway embraces both contemporary philosophy and science, inviting readers into a more confident experience of their faith.

Who's Who in Hell Warren Allen Smith, 2000. This listing of several thousand nonbelievers includes ancients such as Euripides, French revolutionaries and statements by or about countless individuals including Sir Arthur C. Clarke, Hugh Hefner, Jack Nicholson, Sally Jesse Raphael, Christopher Reeve, Salman Rushdie, Carl Sagan, Ted Turner, and Jesse Ventura. American Book Publishing Record, 1995. *Discipleship in a Post-Christian Age* Thiago Silva, 2025-05-20. This is an age where Christianity is no longer the assumed foundation of culture. Instead, secularism, relativism, and individualism shape how people think, live, and even approach faith. Many within the church have unknowingly embraced a shallow, self-focused spirituality that offers comfort without transformation. How can the church recover a robust, life-giving vision of discipleship in such a world? With a little help from C. S. Lewis, this book offers a way forward. Lewis's insights, rooted in reason, imagination, and community, speak powerfully to this modern crisis, equipping believers to engage both mind and heart. Through cultural analysis and biblical wisdom, this book calls the church to rediscover discipleship as an intellectual, imaginative, and relational pursuit, one that forms resilient, thoughtful, and deeply rooted followers of Christ. Whether picked up by a pastor, church leader, or everyday disciple longing for deeper faith, this book will challenge and inspire readers to cultivate a Christianity that is not only true but beautiful and compelling in an increasingly post-Christian world.
