Logical Processes in Humans and Computers Morton Wagman, 2003-01-01 This volume presents a critical analysis of current theory and research in the psychological and computational sciences directed toward an elucidation of logical processes and structures ranging from the domain of human reasoning heuristics to the domain of systemic scientific reasoning

Reasoning Processes in Humans and Computers Morton Wagman, 2003-02-28 Advancing research in artificial intelligence is creating reasoning systems that increasingly emulate or surpass the power of human reasoning This volume presents a critical analysis of current theory and research in psychological and computational sciences addressing reasoning processes Distinguished from narrowly technical books on the one hand and from general philosophical books on the other this work gives a broad structured detailed and critical account of advancing intellectual developments in theories on the nature of reasoning Of special interest is the conclusion that artificial intelligence reasoning systems are deepening and broadening theories of human reasoning A unified theory of intelligent reasoning encompassing natural and computational systems is an important current objective of cognitive science Reasoning systems such as the CHARADE program which simulates the course of inductive reasoning leading to medical discoveries and the CONSYDERR program which executes the robust theory of common sense reasoning are important demonstrations of the feasibility of a unified theory of human and artificial intelligence

Scientific Discovery Processes in Humans and Computers Morton Wagman, 2000-05-30 Wagman offers a critical analysis of current theory and research in the psychological and computational sciences directed toward the elucidation of scientific discovery processes and structures It discusses human scientific discovery processes analyzes computer scientific discovery processes and makes a comparative evaluation of the two This work examines the scientific reasoning of the discoverers of the inhibition mechanism of gene control scientific discovery heuristics used at different developmental levels artificial intelligence and mathematical discovery the ECHO system the evolution of artificial intelligence discovery systems the PAULI system and the KEKADA system It concludes with an examination of the extent to which computational discovery systems can emulate a set of 10 types of scientific problems

Machine Learning Methods for Commonsense Reasoning Processes: Interactive Models Naidenova, Xenia, 2009-10-31 This book suggests that classification is a key to human commonsense reasoning and transforms traditional considerations of data and knowledge communications presenting an effective classification of logical rules used in the modeling of commonsense reasoning

role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

Reasoning Processes In Humans And Computers Theory And Research In Psychology And Artificial Intelligence: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have enthralled audiences this year. Reasoning Processes In Humans And Computers Theory And Research In Psychology And Artificial Intelligence : Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Reasoning Processes In Humans And Computers Theory And Research In Psychology And Artificial Intelligence : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
