The Essentials of Suicide Prevention Karen Mason, 2023-01-24 Suicide is a growing tragedy in the US and in the church We can stop the climbing numbers of suicide deaths but it is going to take everyone working together including the church Without the church suicidal people may not hear the life affirming messages they need to hear Without an informed church people who have lost loved ones to suicide may leave the church Too often the church watches from the sidelines not knowing what to do Why is it that the wider secular culture is more engaged in suicide prevention than God's people especially given that Christians care deeply about the sanctity of life The apostle Paul modeled suicide prevention for the church when he stopped the suicide of the Philippian jailer But pastors and congregants may not know how to follow his example The result is that people who struggle with suicide or who have lost loved ones to suicide wonder if the Bible or their church have anything relevant to say about suicide This book will provide the resources needed to help prevent suicide in a church even when a church does not want to start one more program

Scepticism Comes Alive Bryan Frances, 2005-06-16 In epistemology the nagging voice of the sceptic has always been present Over the last thirty years or so philosophers have thought of several promising ways to counter the radical sceptic for instance facts about the reliability of our cognitive processes principles determining which possibilities must be ruled out in order to have knowledge and principles regarding the context sensitivity of knowledge attributions In this entertaining and provocative book Bryan Frances presents a new argument template for generating new kinds of radical scepticism ones that hold even if all the clever anti sceptical fixes defeat the traditional sceptic Not only is the argument schema novel but the sceptical consequences are entirely unexpected Although the new sceptic concludes that we don t know that fire engines are red that we sometimes have pains in our knees or even that we believe that fire engines are red or that knees sometimes throb she admits that we know millions of exotic truths such as the fact that black holes exist You can know about the existence of black holes but not about the colour of your shirt or even about what you believe regarding the colour of your shirt The new sceptical arguments proceed in the usual way here s a sceptical hypothesis you can t neutralize it you have to be able to neutralize it to know P so you don t know P but the sceptical hypotheses plugged into it are real live scientific philosophical hypotheses often thought to be actually true such as error theories about belief colour pain location and character traits Frances investigates the questions Under what conditions do we need to rule out these error theories in order to know things inconsistent with them and Can we rule them out Particular attention is paid to recent methods used to counter the traditional sceptic Sharp witty and fun to read *Scepticism Comes Alive* will be highly provocative for anyone interested in knowledge and its limits
