Reassessing Fatherhood:

Reassessing Fatherhood Charlie Lewis, Margaret O'Brien, 1987 Much recent literature on fathers conveys the optimistic message that men are becoming increasingly involved in family life and that such participation is necessarily beneficial This book contends that evidence for the new father is in reality hard to find and that the paternal role persists in being limited by social institutional and personal forces The book's contributors psychologists and sociologists from Britain Australia Scandinavia and North America examine the problematic nature of fatherhood from three different perspectives Part One examines research evidence from studies of fathers in typical families Chapters look at the history of paternal roles the employment of both fathers and mothers and men's involvement with other members of the family all share the thesis that given contemporary ideologies fathering is necessarily limited Part Two critically reviews research on men who encouraged by enlightened social policy makers have attempted to become more involved in child care and domestic responsibilities The contributors point out the contradictions between the expectations of the policy makers and the realities of family life greater involvement in the home by men usually causes stress and difficulties for other members particularly mothers Part Three considers the position of men in therapeutic settings where the father is often seen as a passive opaque figure with whom it is difficult to work and offers sound advice on how family workers can incorporate men into counselling social work and therapy Two chapters also investigate the role that custody arrangements play in the divorced father's life

Reassessing Fatherhood provides a fresh and often provocative view of the modern father that will change the complacent and euphoric vision of the new family **Reshaping Fatherhood** Anna Dienhart, 1998-05-27 Current research on fatherhood often focuses on minimal changes men have made in their participation in family life Anna Dienhart argues that men have indeed made significant changes to their family roles but those changes are often masked in existing discourses on fatherhood In **Reshaping Fatherhood** Dienhart's qualitative study of 18 shared parenting couples explores both men's and women's resourcefulness and shows how these couples have deliberately co-created alternatives to traditional parenting roles Using these narrative accounts Dienhart offers several options for creating a family structure that allows both mothers and fathers to participate actively in parenting Dienhart emphasizes that tag team parenting a common technique that couples use to juggle the responsibilities of a hectic family life relies on both the interchangeability of parental tasks as well as the specialization by preference Dienhart compares shared parenting to a dance that demands continuous revision of the perceptions and activities of fatherhood and motherhood She challenges family researchers to move beyond deficit and comparative model perspectives about the complexities of gendered family life as she offers alternative ideas about division of labor patterns men's relational capabilities in child care the preeminence of men's provider role and traditional notions about gender and politics in families This timely book is ideal for professionals and students in family studies sociology of the family family psychology and gender studies **Fatherhood in Late Modernity** Mechthild Oechsle, Ursula Müller, Sabine

Hess,2012-08-09 Changes in Fatherhood How do structural changes in the welfare state in gender relations and work affect concepts and realities of fatherhood The authors analyse cultural images and representations of fatherhood varieties of fatherhood in relation to social backgrounds organisational influences as well as the impact of political and legal interventions on configurations of fatherhood With an interdisciplinary approach this book's contributions investigate the sometimes contradictory relationship between cultural representations and social practices of fatherhood They contextualise diverse fatherhoods in various social backgrounds ethnicities ages and different national contexts Reflecting methodological challenges is crucial to the volume's approach Which parameters are used to quantify change Which links and interactions between cultural individual organizational and societal dimensions do exist regarding the development of new social configurations of fatherhood How can the complex interaction between structural constraints and agency be analysed Can certain agents of change be identified How can social change be conceptualized This volume links to international comparative research and shows how fruitful it can be to break disciplinary boundaries Fragmenting Fatherhood Richard Collier, Sally Sheldon,2008-09-05 Debates about the future of fatherhood have been central to a range of conversations about changing family forms parenting and society Law has served an important yet often neglected role in these discussions serving as an important focal point for broader political frustrations playing a central role in mediating disputes and operating as a significant symbolic state sanctioned account of the scope of paternal rights and responsibilities Fragmenting Fatherhood provides the first sustained engagement with the way that fatherhood has been understood constructed and regulated within English law Drawing on a range of disparate legal provisions and material from diverse disciplines it sketches the major contours of the figure of the father as drawn in law and social policy tracing shifts in legal and broader understandings of what it means to be a father and what rights and obligations should accrue to that status In thematically linked chapters cutting across substantive areas of law the book locates fatherhood as a key site of contestation within broader political debates regarding the family and gender equality Multiple visions of fatherhood evolving unevenly over time across diverse areas of law emerge from this analysis Fatherhood is revealed as an essentially fragmented status and one which is intertwined in complex ways with the legal cultural and political contexts in which discourses of parenthood are produced Fragmenting Fatherhood provides an important and unique resource speaking to debates about fatherhood across a range of fields including law and legal theory sociology gender studies social policy marriage and the family women's studies and gender studies **Intimate Fatherhood** Esther Dermott,2014-06-11 Fatherhood is gaining ever more public and political attention stimulated by the increasing prominence of fathers rights groups and the introduction of social policies such as paternity leave Intimate Fatherhood explores discourses of contemporary fatherhood men's parenting behaviour and debates about fathers rights and responsibilities The book addresses the extent to which fatherhood has changed by examining key dichotomies culture versus conduct involved versus uninvolved and public versus private The book also looks at longstanding

conundrums such as the apparent discrepancy between fathers acceptance of long hours spent in paid work combined with a preference for involved fathering Dermott maintains that our current view of good fatherhood is related to new ideas of intimacy She argues that in order to understand contemporary fatherhood we must recognise the centrality of the emotional father child relationship that the importance of breadwinning has been overstated and that flexible involvement is viewed as more important than the amount of time spent in childcare Drawing on original qualitative interviews and large scale quantitative research Intimate Fatherhood presents a sociological analysis of contemporary fatherhood in Britain by exploring our ideas of good fatherhood in relation to time use finance emotion motherhood and policy debates This book will interest students academics and researchers in sociology gender studies and social policy **Handbook of Father**

Involvement Natasha J. Cabrera, Catherine Susan Tamis-LeMonda, 2013 The goal of this Handbook is to address the challenges that face researchers of father involvement across disciplines Each of the sections of this handbook presents current perspectives and challenges to research on father involvement w in a specialized *Constructing Fatherhood* Deborah Lupton Lesley Barclay, Professor Deborah Lupton, Professor Lesley Barclay, 1997-08-22 It is a very impressive book Its coverage of contemporary discourses of fatherhood is comprehensive The theoretical stance is one that allows for complexity and fluidity The authors write well making even esoteric sociological and cultural theory accessible I recommend it British Journal of Social Work Constructing Fatherhood provides an analysis of the social cultural and symbolic meanings of fatherhood in contemporary western societies The authors draw on poststructuralist theory to analyze the representation of fatherhood in the expert literature of psychology sociology and the health sciences and in popular sources such as television film advertisements and child care and parenting manuals and magazines Men s own accounts of first time fatherhood are also drawn upon including four individual case studies The American Father Wade C. Mackey, 2013-06-29 In The American Father Wade C Mackey documents a wealth of information demonstrating the vast benefits to society when its children are raised in families with fathers The biopsychosocial approach Mackey in human employs is consistent with the current treatment of topics development This approach which is grounded in a variety of diverse sources assumes that we understand little about people when we study them a bit at a time rather the fullness of the individual requires a fullness of examination For example in the cases of fathers we note that humans do not reproduce alone after all we are not an asexual species No human reproduction and its sequelae are social just as clearly as they are biological and involve the whole panoply of psychic function motivation sociability intelligence and the like The evidence marshaled by Mackey indicates strongly that individuals and societies have an essential requirement for something more than mothering they also need fathering Much of the discourse and publication on fathers during the past several decades has been posited on a more is better model of male parenting in which it is seldom stated who it is better for the father the child the mother the couple or the family Further much of this discussion infers that fathers are merely Mr Moms yet this is not so **Handbook of**
