Rebirth Of Nature The Greening Of Science And God:

The Rebirth of Nature Rupert Sheldrake, 1994-04-01 Rupert Sheldrake one of the world's preeminent biologists has revolutionized scientific thinking with his vision of a living developing universe one with its own inherent memory In *The Rebirth of Nature* Sheldrake urges us to move beyond the centuries old mechanistic view of nature explaining why we can no longer regard the world as inanimate and purposeless Sheldrake shows how recent developments in science itself have brought us to the threshold of a new synthesis in which traditional wisdom intuitive experience and scientific insight can be mutually enriching

Dogs That Know When Their Owners Are Coming Home Rupert Sheldrake, 2011-04-26 With a scientist's mind and an animal lover's compassion world renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals and ourselves How do cats know when it's time to go to the vet even before the cat carrier comes out How do dogs know when their owners are returning home at unexpected times How can horses find their way back to the stable over completely unfamiliar terrain After five years of extensive research involving thousands of people who have pets and work with animals Dr Sheldrake proves conclusively what many pet owners already know there is a strong connection between humans and animals that defies present day scientific understanding Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other to their owners and to their homes in powerful ways His provocative ideas about these social or morphic fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild such as migration and homing *Dogs That Know When Their Owners Are Coming Home* not only provides fascinating insight into animal and human behavior but also teaches us to question the boundaries of conventional scientific thought and shows that the very animals who are closest to us have much to teach us about biology nature and consciousness

Topographies of the Sacred Catherine E. Rigby, 2004 Although the British romantic poets notably Blake Wordsworth and Byron have been the subjects of previous ecocritical examinations this text compares English and German literary models of romanticism

Who Guards the Guardians? Peter Raine, 2003 This book attempts to link ecology philosophy and theology through an exploration of a new model of intercultural dialogue Case studies provide practical and theoretical applications which lead to a deeper understanding of not only environmental guardianships but also the fundamental relationship between human beings and nature's being

Green Psychology Ralph Metzner, 1999-06-01 A visionary ecopsychologist examines the rift between human beings and nature and shows what can be done to bring harmony to both the ecosystem and our own minds Shows that the solution to our ecological dilemma lies in our own consciousnesses It is becoming more and more apparent that the causes and cures for the current ecological crisis are to be found in the hearts and minds of human beings For millennia we existed within a religious and psychological framework that honored the Earth as a partner and worked to maintain a balance with nature But somehow a root pathology

took hold in Western civilization the idea of domination over nature and this led to an alienation of the human spirit that has allowed an unprecedented destruction of the very systems which support that spirit In Green Psychology Ralph Metzner explores the history of this global pathology and examines the ways that we can restore a healing relationship with nature His search for role models takes him from shamanic ceremonies with the Lacandon Maya of Mexico to vision quests in the California desert from the astonishing nature mysticism of Hildegard von Bingen to the Black Goddesses and Green Gods of our pagan ancestors He examines the historical roots of the split between humans and nature showing how first sky god worshiping cultures then monotheisms and finally mechanistic science continued to isolate the human psyche from the life giving Earth His final chapters present a solution showing that disciplines such as deep ecology and ecofeminism are creating a worldview in which the mind of humanity and the health of the Earth are harmoniously intertwined

Evolutionary Healing Barbara Sarter, 2002 Taking both a spiritual and philosophical approach this book is a reflection of the author's quest to come to terms with the meaning of human suffering The book integrates ancient and modern philosophies of life with modern scientific discovery The author applies these philosophies with the process of healing and describes evolutionary healing as the evolution of one's consciousness through health and disease *Minding Creation* Joanna Leidenhag, 2020-12-10 Are humans the only creatures that can appreciate God's creation What if consciousness is spread more widely across all things This volume examines panpsychism through the lens of Christian doctrine *Minding Creation* is the first substantial examination of what a panpsychist theory of consciousness implies for key theological debates concerning God's presence and action evolution and the origin of the soul human uniqueness and the environmental crisis Joanna Leidenhag develops a theological panpsychism that is based on an exceptionally wide range of scholarship *Minding Creation* draws on the theologies of historical figures such as Augustine of Hippo Gottfried von Leibniz and others in order to create a critical and constructive conversation with contemporary analytic philosophers of mind such as Thomas Nagel Galen Strawson and David J Chalmers Leidenhag also discusses key concepts and issues such as emergence theory divine action and ecology She concludes that God created a universe from nothing which is filled with indwelling powers sacramental value and intrinsic experience This is a creation in which the Holy Spirit is internally present at every point a creation that worships God and a creation that human beings must protect and lead in praise *Wild Earth, Wild Soul (2nd Edition)* Sky Otter, 2025-04-29 Humankind has the capacity and know how to create Earth honoring cultures in a new way for new times By tapping into ancestral memories taking what's best from the human potential movement and collaborating with present day indigenous peoples we can find our way home Practicing the key ingredients of a lasting culture is an ecstatic way to live This book shows you how *Reductionism* Richard H. Jones, 2000 Reductionism's approach brings together many of the most interesting questions today in philosophy consciousness and computers and in science issues of complexity and self organization It also presents a brief history of how reductionism has developed in Western philosophy and religion with

reference to Indian philosophy on certain issues **Animal Passions and Beastly Virtues** Marc Bekoff, 2006 An engaging thoughtful look at the science and ethics of research into animal behavior
