Rebuilding Cleveland The Cleveland Foundation and Its Evolving Urban Strategy:

Rebuilding Cleveland Diana Tittle, 1992 Rebuilding Cleveland is a critical study of the role that The Cleveland Foundation the country's oldest community trust has played in shaping public affairs in Cleveland Ohio over the past quarter century Drawing on an examination of the Foundation's private papers and more than a hundred interviews with Foundation personnel and grantees Diana Tittle demonstrates that The Cleveland Foundation with assets of more than 600 million has provided continuing catalytic leadership in its attempts to solve a wide range of Cleveland's urban problems The Foundation's influence is more than a matter of money Tittle shows The combined efforts of professional philanthropists and a board of trustees traditionally dominated by Cleveland's business elite but also including members appointed by various elected officials have produced innovative civic leadership that neither group was able to achieve on its own Through an examination of the Foundation's ongoing and sometimes painful organizational development Tittle explains how the Foundation came to be an important catalyst for progressive change in Cleveland Rebuilding Cleveland takes the reader back to 1914 when Cleveland banker Frederick C Goff invented the concept of a community foundation and pioneered a national movement of social scientists business leaders and government officials that made philanthropy a more effective force for private involvement in public affairs Tittle follows the Foundation through the 1960s when it began a major new initiative to establish itself as a civic agenda setter and problem solver to the present as a new generation of Foundation leaders continues to build upon this renewed sense of purpose

The American Jewish Philanthropic Complex Lila Corwin Berman, 2022-08-30 The first comprehensive history of American Jewish philanthropy and its influence on democracy and capitalism For years American Jewish philanthropy has been celebrated as the proudest product of Jewish endeavors in the United States its virtues extending from the local to the global the Jewish to the non Jewish and modest donations to vast endowments Yet as Lila Corwin Berman illuminates in The American Jewish Philanthropic Complex the history of American Jewish philanthropy reveals the far more complicated reality of changing and uneasy relationships among philanthropy democracy and capitalism With a fresh eye and lucid prose and relying on previously untapped sources Berman shows that from its nineteenth century roots to its apex in the late twentieth century the American Jewish philanthropic complex tied Jewish institutions to the American state The government's regulatory efforts most importantly tax policies situated philanthropy at the core of its experiments to maintain the public good without trammeling on the private freedoms of individuals Jewish philanthropic institutions and leaders gained financial strength political influence and state protections within this framework However over time the vast inequalities in resource distribution that marked American state policy became inseparable from philanthropic practice By the turn of the millennium Jewish philanthropic institutions reflected the state's growing investment in capitalism against democratic interests But well before that Jewish philanthropy had already entered into a tight relationship with the governing forces of American life reinforcing and even transforming the nation's

laws and policies The American Jewish Philanthropic Complex uncovers how capitalism and private interests came to command authority over the public good in Jewish life and beyond **American Philanthropy in Its Global Context**

Thomas Adam,2025-03-18 Philanthropy has become a staple of American society and culture Associations endowments foundations and limited dividend companies have funded education culture healthcare religion and social welfare Yet American philanthropy is not as exceptional as it appears to European observers American philanthropy was built upon European and Mediterranean precedents and evolved through the constant influence of philanthropic practices in other parts of the world This book explores how philanthropic practices and institutions were introduced into American society and how they were Americanised during the 19th century It provides a comprehensive history of American philanthropy and positions it within its wider global context Philanthropic Foundations Ellen Condliffe Lagemann,1999-07-22 Foundations are

socially and politically significant but this simple fact has mostly been ignored by students of American history This collection represents an important contribution to an emerging field Kenneth Prewitt Social Science Research Council **Creating**

William Domhoff,2019-06-21 The Corporate Rich and the Power Elite in the Twentieth

Century demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States The book is framed within three historical developments that have made this domination possible the rise and fall of the union movement the initiation and subsequent limitation of government social benefit programs and the postwar expansion of international trade The book s deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue areas Further it explains why the three ascendant theories of power in the early twenty first century interest group pluralism organizational state theory and historical institutionalism cannot account for the complexity of events that established the power elite s supremacy and led to labor s fall More generally and convincingly the analysis reveals how a corporate financed policy planning network consisting of foundations think tanks and policy discussion groups gradually developed in the twentieth century and played a pivotal role in all three issue areas Filled with new archival findings and commanding detail this book offers readers a remarkable look into the nature of power in America during the twentieth century and provides a starting point for future in depth analyses of corporate power in the current century Casebook for

Myth of Liberal Ascendancy G. Williams Domhoff, 2015-11-17 Based on new archival research G Williams Domhoff challenges popular conceptions of the 1930 s New Deal Arguing instead that this period was one of increasing corporate dominance in government affairs affecting the fate of American workers up to the present day While FDR s New Deal brought sweeping legislation the tide turned quickly after 1938 From that year onward nearly every major new economic law passed by Congress showed the mark of corporate dominance Domhoff accessibly portrays documents of the Committee s vital influence in the halls of government supported by his interviews with several of its key employees and trustees Domhoff concludes that in terms of economic influence liberalism was on a long steady decline despite two decades of post war

growing equality and that ironically it was the successes of the civil rights feminist environmental and gay lesbian movements not a new corporate mobilisation that led to the final defeat of the liberal labour alliance after 1968 Who Rules America? G William Domhoff, 2021-11-29 The 8th edition already significantly updated has now been further updated in 2023 to include the likely impact of the post pandemic cutbacks the overturning of Roe v Wade and the Trump indictments on the 2024 national elections These factors could lead to more economic growth and social support for families schools and health care or an increase in inequality white male supremacy and social strife depending on the size of the voter turnout by younger voters At this crucial moment in American history when voting rights could be expanded to include all citizens or legislatively limited this significantly updated edition of Who Rules America shows precisely how the top 1% of the population who own 43% of all financial wealth and receive 20% of the nation's yearly income dominate governmental decision making They have created a corporate community and a policy planning network made up of foundations think tanks and policy discussion groups to develop the policies that become law Through a leadership group called the power elite the corporate rich provide campaign donations and other gifts and favors to elected officials serve on federal advisory committees and receive appointments to key positions in government all of which make it possible for the corporate rich and the power elite to rule the country despite constant challenges from the inclusionary alliance and from the Democratic Party The book explains the role of both benign and dark attempts to influence public opinion the machinations of the climate denial network and how the Supreme Court came to have an ultraconservative majority who serve as a backstop for the corporate community as well as a legitimator of restrictions on voting rights union rights and abortion rights by ruling that individual states have the power to set such limits Despite all this highly concentrated power it will be the other 99.5% not the top 0.5% who will decide the fate of the United States in the 2020s on all the important issues White Philanthropy Maribel Morey, 2021-10-20 Since its publication in 1944 many Americans have described Gunnar Myrdal's *An American Dilemma* as a defining text on U.S. race relations Here Maribel Morey confirms with historical evidence what many critics of the book have suspected *An American Dilemma* was not commissioned funded or written with the goal of challenging white supremacy Instead Morey reveals it was commissioned by Carnegie Corporation president Frederick Keppel and researched and written by Myrdal with the intent of solidifying white rule over Black people in the United States Morey details the complex global origins of *An American Dilemma* illustrating its links to Carnegie Corporation's funding of social science research meant to help white policymakers in the Anglo American world address perceived problems in their governance of Black people Morey also unpacks the text itself arguing that Myrdal ultimately complemented his funder's intentions for the project by keeping white Americans as his principal audience and guiding them towards a national policy program on Black Americans that would keep intact white domination Because for Myrdal and Carnegie Corporation alike international order rested on white Anglo Americans continued ability to dominate effectively **Communities Left Behind** Gregory S. Wilson, 2009

Throughout this terrific book Wilson places this government agency its creation its lifespan and achievements and its mixed legacies in the broader context of postwar American history and more specifically the history of employment policy Jason Scott Smith author of *Building New Deal Liberalism The Political Economy of Public Works 1933 1956* With clarity and insight Gregory S Wilson recounts the story of the Area Redevelopment Administration and connects a nearly forgotten piece of American employment history to national and transnational developments in the making of social policy in the years between the New Deal and the Great Society *Communities Left Behind* demonstrates how the United States has since the Great Depression tried but failed to address the nation's structural inequalities and it reopens discussions about poverty and economic dislocation in a period when the country is facing new economic challenges The ARA was created in 1961 and remained in operation until 1965 Its goal was to assist communities especially economically distressed ones in rural or undeveloped areas of the country in generating employment opportunities Unstated in the creation of the ARA was its intention to serve as an economic development project mostly for Appalachia and the American South where nearly all of its money was spent Wilson argues that the ARA was doomed to fail from the beginning because of the requirement that federal officials not interfere with state and local priorities It simply was not possible to implement a federal initiative in the South without running afoul of local interests And to further complicate matters the issue of race loomed in the background when ARA policies aimed to improve employment opportunities for black southerners they were invariably sabotaged by racist politics This ambivalent legacy of the ARA is alive today Wilson suggests as areas of the nation that have struggled economically since the agency's original creation including inner cities Native American reservations Appalachia and the rural South continue to founder Gregory S Wilson is associate professor of history at the University of Akron and coeditor of the *Northeast Ohio Journal of History*

Eagle-Picher Industries Douglas Knerr, 1992 This comprehensive history traces the evolution of Eagle Picher Industries a manufacturing firm based in Cincinnati Ohio for almost 150 years Focusing on events prior to the company's involvement in toxic tort litigation which forced it to file bankruptcy this work examines Eagle Picher's development as a diversified industrial manufacturer From a closely held regional producer of white lead and other paint pigments Eagle Picher became an important miner and processor of non ferrous metals by investing in zinc lead fields in Missouri Kansas and Oklahoma during the early twentieth century Once ore reserves in these areas were depleted the company turned to manufacturing industrial goods and pursued an aggressive and unique expansion and diversification program during the post World War II era During the 1950s 1960s and 1970s Eagle Picher acquired over twenty five firms all manufacturers of industrial goods and assembled a broadly based specialized productive capacity Eagle Picher's history illustrates a number of important trends and concepts First its experiences in the late nineteenth century provide a valuable look at how smaller firms adapted to the forces of consolidation in the economy Further Eagle Picher's experience as an industrial manufacturer demonstrates the ways in which mid sized firms grew by focusing on market niches overlooked by

larger firms Finally Eagle Picher's approach to acquisition and diversification is unique in today's competitive marketplace Eagle Picher's commitment to limited diversification built around historical strengths its acquisition of successful firms and its efforts to establish strong lines of communication and effective controls between the central office and the divisions stand in stark contrast to the efforts of many acquisitive firms during recent mergers Social Administration Roger A. Lohmann, Nancy Lohmann, 2002 Encompassing management approaches such as Theory Z and research of nonprofit studies this book addresses ways in which skills and activities of social administration can further social work practice in the areas of social justice confronting oppression **Understanding Community Economic Growth and Decline** Gerald L. Gordon, 2018-06-14 This book presents a fully comprehensive look at what all communities large and small urban and rural can do to grow and sustain their local economic bases It examines the causes of economic decline for localities as well as the economic product being marketed to employers the process of growth and the means of sustaining economic growth over time Drawing on the experiences of hundreds of communities and hundreds of leaders around the United States Understanding Community Economic Growth and Decline outlines the various strategies that have or have not worked to enable or support a general local economic recovery Exploring many facets of growth and re growth following periods of economic decline and offering practical real life tactics that have been successfully employed in local and regional economies across the US this book is required reading for community planners and administrators those currently working in public administration and students studying regional planning or economic development The Passenger Train in the Motor Age Gregory Lee Thompson, 1993 Based on previously unseen data The Passenger Train in the Motor Age offers an illuminating portrait of a critical time in railroad history *Managing Industrial Decline* Michael Dintenfass, 1992 Managing Industrial Decline examines the dramatic decline of the British coal industry through the lens of comparative business history challenging the prevailing belief that the industry's decline was due primarily to global economic factors and instead demonstrating that entrepreneurial failings of individual coal firms contributed significantly to the problem Through a comparative analysis of company histories Dintenfass shows how the full range of business operations at British coal firms including labor management policies technological choices and marketing practices affected their performance The histories of individual firms demonstrate that the managements could improve productivity increase sale prices and sustain profitability even as the coal trade succumbed to cyclical depression and secular decline According to Dintenfass comparisons between the individual firms and the regional coal industries to which they belonged show that neighboring firms were slow to introduce the modest innovations that the successful firms pioneered Since there were few barriers to the implementation of these strategies it appears that Britain's coal masters miscalculated their costs and benefits contributing to the problem by failing to adopt inexpensive and accessible second best solutions to production and commercial problems Managing Industrial Decline breaks new ground in the field of business history and restores entrepreneurship to its proper

place in the analysis of industrial decline **Airline Executives and Federal Regulation** Walter David Lewis, 2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978 By focusing on the lives and personalities of individual entrepreneurs W David Lewis and his contributors hope to explore the interaction between technology government regulation and entrepreneurship Each essay in the book focuses on a particular airline executive such as Eddie Rickenbacker Robert Six and Donald Nyrop Lewis has been careful to give a variety of perspective Airlines of various types are represented large and small scheduled and unscheduled Some of the executives profiled were known for having adversative relationships with federal regulators whereas others wholeheartedly accepted regulation and thrived under it There have been public calls for a return to airline regulation and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further But he says it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced This collection of essays scholarly and well documented but written in a lively style suitable for specialists and nonspecialists alike provides a long range perspective on the issue of airline deregulation

A Mental Revolution Daniel Nelson, 1992 A Mental Revolution includes eight original essays that analyze how the scientific management principles developed by legendary engineer Frederick W Taylor have evolved and been applied since his death in 1915 Taylor believed that a business or any other complex organization would operate more effectively if its practices were subjected to rigorous scientific study His classic Principles of Scientific Management spread his ideas for organization planning and employee motivation throughout the industrialized world But scientific management because it required in Taylor's words a complete mental revolution was highly disruptive and Taylor's famous time motion studies especially when applied piecemeal by many employers who did not adopt the entire system helped make the movement enormously unpopular with the organized labor movement Though its direct influence diminished by the 1930s Taylorism has remained a force in American business and industry up to the present time The essays in this volume discuss some of the important people and organizations involved with Taylorism throughout this century including Richard Feiss and Mary Barnett Gilson at Joseph Feiss Frank and Lillian Gilbreth and Mary Van Kleeck and explore the influence of scientific management at the Bedaux Company the Link Belt Company and Du Pont Chapters on the Taylor movement's influence on university business education and on Peter Drucker's theories round out the collection Written by some of the finest scholars of the scientific management movement A Mental Revolution provides a balanced and comprehensive view of its principles evolution and influence on business labor management and education BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Regulated Enterprise Christopher James Castaneda, 1993 Christopher Castaneda's study of the construction of the pipelines that transported southwestern gas to the Northeast traces the ways in which the federal regulatory process fostered competitive growth in the natural gas industry In 1938 the Natural Gas Act

granted the Federal Power Commission jurisdiction over the interstate transmission and sale of natural gas The FPC used its new powers to guide shape and manage an intensely competitive period in the industry As Castaneda shows aggressive and politically astute entrepreneurs based in the Southwest took advantage of economic opportunity and a regulatory environment conducive to industry growth They financed and built the nation s longest gas pipelines to connect the massive southwestern reserves with the major northern energy markets The coal industry which supplied the raw product for manufactured gas and the railroad industry which transported the coal adamantly but unsuccessfully opposed the action and attempted to halt the introduction of natural gas into their northeastern markets First during the war years emergency regulatory agencies directed the expansion of the industry into Appalachia Then in the ensuing peacetime market forces prompted entrepreneurs to compete vigorously for regulatory approval to build pipelines to sell natural gas in the Northeast While previous studies have examined the development of the natural gas industry after 1954 when the Supreme Court s Phillips decision established the FPC as a regulator of price control rather than as a manager of industrial growth Castaneda s is the first to examine this earlier entrepreneurial era Based on exhaustive research in corporate records and government documents Regulated Enterprise offers a case study of government business relations during a period of rapid industrial expansion and suggests a new way of looking at federal regulation and competitive growth BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
