Recent Advances in Ecobiological Research Manoranjan P. Sinha, 1997 Contributed articles with reference to India commemoration volume for Prof P N Mehrotra **Environmental Pollution and Agriculture** Arvind Kumar, 2002 Collection of articles by various authors with reference to India **Water and Development - Volume II** Catherine M. Marquette, 2009-08-10 Water and Development is a component of Encyclopedia of Water Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Water is perhaps the most critical natural resource upon which humans depend Agricultural and food production trade and ultimately the economic development of all regions of the world depend on rivers streams dams oceans and other water resources This critical relationship has persisted through the agricultural and industrial revolution and into the era of economic globalization The relationship between human activity and the water resources on which it depends also continues to be reciprocal Human consumption energy agricultural industrial and other economic activity have significant impacts on water quality and quantity for better or worse A key element of sustainable development rests on our global capacity to interact with the water resources on which we depend in ways that preserve them for our use and that of future generations The two volumes on the subject present some of the topics such as Water Agriculture and Food Interactions dams water valuation arid regions water management and Conflict over Water Resources Water and Sustainable Development They consider the implications which contributions have in each of these areas as well as introduce additional issues relating to the future of dams innovative ways of increasing water supply transboundary water resources and the implications of global climate change for water resources These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts Managers and Decision makers and NGOs **Next Generation Biomonitoring: Part 2** , 2018-10-22 Next Generation Biomonitoring Part Two Volume 59 the latest release in the Advances in Ecological Research series is the second part of a thematic on ecological biomonitoring It includes specific chapters that cover aquatic volatile metabolomics using trace gases to examine ecological processes next generation approaches to rapid monitoring Bio aerosol and the link between human health and environmental microbiology NGB in Canadian wetlands CELLDEX global monitoring of functional responses Citizen Science and Biomonitoring and more Provides information that relates to a thorough understanding of the field Deals with topical and important reviews on the physiology populations and communities of plants and animals **Gene Pool Diversity and Crop Improvement** Vijay Rani Rajpal, S. Rama Rao, S.N. Raina, 2016-02-02 The world population is estimated to reach to more than 10 billion by the year 2050 These projections pose a challenging situation for the agricultural scientists to increase crops productivity to meet the growing food demands The unavailability and or inaccessibility to appropriate gene pools with desired traits required to carry out genetic improvement of various crop species make this task formidable for the

plant breeders Incidentally most of the desired genes reside in the wild genetic relatives of the crop species Therefore exploration and characterization of wild genetic resources of important crop species is vital for the efficient utilization of these gene pools for sustainable genetic improvements to assure food security Further understanding the myriad complexities of genic and genomic interactions among species more particularly of wild relatives of crop species and or phylogenetically distant germplasm can provide the necessary inputs to increase the effectiveness of genetic improvement through traditional and or genetic engineering methods This book provides comprehensive and latest insights on the evolutionary genesis of diversity access and its utilization in the evolution of various crop species A comprehensive account of various crops origin exploitation of the primary secondary and tertiary gene pools through breeding biosystematical cytogenetical and molecular phylogenetical relationships and genetic enhancement through biotechnological interventions among others have been provided as the necessary underpinnings to consolidate information on the effective and sustainable utilization of the related genetic resources The book stresses upon the importance of wild germplasm exploration characterization and exploitation in the assimilation of important crop species The book is especially intended for students and scientists working on the genetic improvement of crop species Plant Breeders Geneticists Taxonomists Molecular Biologists and Plant Biotechnologists working on crop species are going to find this book very useful

Biotechnology of VA Mycorrhiza Dr. Sudhir Chandra, H. K. Kehri, 2006 knowledge on mycorrhiza plant relationship has grown somewhat with slow pace until about 1970 when there was a sudden upsurge of interest on a specialized type of endomycorrhiza vesicular arbuscular mycorrhiza VA Mycorrhiza The prodigious research made during last three decades clearly established its widespread occurrence in various plant species and under different agro climatic conditions covering broad ecological range including deserts forest and mangroves It was also established that this symbiotic association benefits the plants through enhanced nutrient uptake biological control of root pathogens and synergistic interaction with nitrogen fixing microorganisms hormone production and drought resistance In view of its utility to plants this bio tool has now attracted the attention of microbiologist agronomist horticulturist and foresters at global level

Handbook of Research on Emerging Developments and Environmental Impacts of Ecological Chemistry Duca, Gheorghe, Vaseashta, Ashok, 2019-12-06

Pollution has been a developing problem for quite some time in the modern world and it is no secret how these chemicals negatively affect the environment With these contaminants penetrating the earth's water supply affecting weather patterns and threatening human health it is critical to study the interaction between commercially produced chemicals and the overall ecosystem Understanding the nature of these pollutants the extent in which they are harmful to humans and quantifying the total risks are a necessity in protecting the future of our world The Handbook of Research on Emerging Developments and Environmental Impacts of Ecological Chemistry is an essential reference source that discusses the process of chemical contributions and their behavior within the environment Featuring research on topics such as organic pollution biochemical

technology and food quality assurance this book is ideally designed for environmental professionals researchers scientists graduate students academicians and policymakers seeking coverage on the main concerns approaches and solutions of ecological chemistry in the environment *Plant Secondary Metabolism* David S. Seigler, 2012-12-06 Life has evolved as a unified system no organism exists similar role also has been suggested for fatty acids from alone but each is in intimate contact with other organisms cyanolipids Nonprotein amino acids cyanogenic glyco and its environment Historically it was easier for workers sides and the non fatty acid portion of cyanolipids also are in various disciplines to delimit artificially their respective incorporated into primary metabolites during germination areas of research rather than attempt to understand the entire Secondary metabolites of these structural types are accumu system of living organisms This was a pragmatic and neces lated in large quantities in the seeds of several plant groups sary way to develop an understanding for the various parts where they probably fulfill an additional function as deter We are now at a point however where we need to investi rents to general predation gate those things common to the parts and specifically those The second type of relationship involves interaction of things that unify the parts The fundamental aspects of many plants with other organisms and with their environment Bio of these interactions are chemical in nature Plants constitute logical interactions must be viewed in the light of evolution an essential part of all life systems phytochemistry provides ary change and the coadaptation or perhaps coevolution of a medium for linking several fields of study *Sustainable Human Development in the Twenty-First Century - Volume II* Ismail Sirageldin, 2008-12-31 Sustainable Human Development in the Twenty First Century is a component of Encyclopedia of Human Resources Policy Development and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias The volume of Human Development examines the state and nature of human development and identifies factors that determine its promotion for the twenty first century A general goal since the ultimate goal for human development is to enhance the quality of human life However the concept quality of human life is not well defined It is determined by a set of interrelated factors that cut across many disciplines with varied perspectives and paradigms These include the prevailing culture health status economic performance technological development political and social conditions the building of human capacity and capabilities and institutional development on the local and global levels For example in an environment characterized by a better quality of human life it is expected that people will be able to lead long and productive lives They are also expected to enjoy good health have access to knowledge and educational opportunities and be treated by all with respect in a socially equitable and dignified manner In the sphere of political economy they are expected to have the opportunity to participate in governance decisions that affect their lives and the community in which they live and to have the potential to earn sufficient income to supply themselves with adequate nutrition shelter and other material and aesthetic needs Furthermore people are expected to maintain a sustainable environment and equitable social contracts across space and generations especially in the context of the evolving global

governance The volume of Sustainable Human Development in the Twenty First Century is divided into five topics which are then expanded into multiple subtopics each as a chapter presented in two volumes The first is Major issues in Human Development and provides an over view of the Topic with emphasis on the sociological foundation of human development The second Topic Diversity and Historical Processes reviews the historical and technological processes which have led to the present state of human diversity and differentiation The third Topic Causes of Global Change focuses on whether it is possible in the present global environment to enlarge people s capabilities so that economic progress may be translated into a multidimensional human happiness The fourth Topic Consequences of Global Change examines global change not in the narrow sense of short term economic change but rather as historical waves of long term development The fifth Topic on Planning Strategies reviews current practice and projects challenges in the next century These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs
