Recent Developments In Alcoholism Vol 7 Treatment Research:

Recent Developments in Alcoholism Marc Galanter, 2013-11-22 From the President of the Research Society on Alcoholism In recent years increasingly convincing evidence in support of a biobehavioral conceptual model of the etiology of alcoholism has emerged In this model the disorder is perceived as arising from the interaction of genetic/biological vulnerability and psychosocial risk Drinking or alcohol seeking is a metric trait Alcoholism which is a state of abnormally intense alcohol seeking behavior that over time leads to the alcohol dependence syndrome lies at the extreme high end of this quantitative measure Metric traits are influenced by multiple genes the extent of genetic loading of biological risk for alcoholism would be different in different individuals Added to this kind of variability is the wide range of options for exposure to the psychosocial risk factors of heavy drinking provided by modern society Further environmental provocation also changes when life events change It is not surprising therefore from the combination of the kinds of genetic and environmental variability described above that there is a wide array of patterns of expression of the disorder alcoholism referred to by some as alcoholisms In the search for understanding of underlying mechanisms and rational bases for potential therapy it is important to focus our attention on the final common pathway of this disorder alcohol seeking behavior This series ever since its beginning in 1983 has been sensitive to the complexities of the interaction between biological and psychosocial risk factors in alcoholism

Wilcox, 1998-03-25 Based on long term observation of Alcoholics Anonymous the author focuses on cultural rather than personal causes of drug dependence The author also discusses how the symbolic action of AA language and culture is the key to recovery This study yields critical information about the development and practice of alcoholism and other drug dependence Through the shared linguistic and cultural interaction of AA the U S cultural ideology that emphasizes individualism personal achievement self control and self reliance is shown to result in conflict thus the gap between the perceived ideal and reality intensifies feelings of separation alienation

and isolation leading to dependency This detailed ethnographic narrative of Alcoholics Anonymous is based on three years of participant observation The study suggests that anyone can be victimized by alcoholic thinking Anthropologists sociologists psychologists health care and professional social services organizations will be interested in this book **Alternative Medicine** ,1995 **Alcohol Abuse Treatment** Ronald R. Watson,2012-12-06 A major national goal is to improve the health of the populace while advancing our opportunities to pursue happiness Simultaneously there are both increasing health costs and increasing demands that more be accomplished with less financial support The number of deaths attributable to the consumption of alcohol in the US is about 100 000 per year and the annual cost of this addiction is over 100 billion Improved treatment methods can both reduce these costs and improve health by preventing the continued exposure of abusers to the toxic effects of alcohol This third volume of Drug and Alcohol Abuse Reviews focuses on the strategies currently thought best for the treatment of alcohol and tobacco abuse A variety of approaches to treating alcohol abuse employ those psychosocial factors that are known to influence alcohol use in youth and adults Pharmacotherapy has also been evaluated at the National Institute of Alcohol Abuse and Alcoholism by leaders in alcohol treatment research One key review investigates forming a developmental framework for the treatment of adolescent alcohol abusers a major challenge Although the main emphasis is on the treatment of alcoholism a major cofactor for many drug users is nicotine tobacco addiction whose treatment is also reviewed And the roles of learning and outpatient services are shown to affect treatment significantly Thus the problems confronted and solutions used in alcohol abuse treatment have here been analyzed in concise reviews that provide evidence for today's best hypotheses and conclusions Working with Substance Misusers Trudi Petersen,2005-06-29 Working with Substance Misusers is a practical handbook for students and those who work with people who misuse drugs or alcohol Written by experienced teachers and clinicians the book introduces the substances themselves theories relevant to substance use and misuse the skills necessary to work with this client group the broad range of approaches to treatment particular problems of specific groups The reader is encouraged to read and reflect on the material in relation to their own practice To help this process each topic has an identified set of learning objectives Activities designed to reinforce learning include discussion points case studies role plays and group exercises Working with Substance Misusers makes clear the connection of theory to practice and encourages a skills based but reflective approach to work in this complex field Cutting across professional boundaries it provides both new and more experienced practitioners with a key text

Problems of Drug Dependence Committee on Problems of Drug Dependence (U.S.). Scientific Meeting, *Problems of Drug Dependence* College on Problems of Drug Dependence (U.S.). Scientific Meeting,1989 Problems of Drug Dependence ,1989 *The Collected Ernie Kurtz* Ernest Kurtz,2008 Ernest Kurtz has been the outstanding thinker of the AA tradition's second generation the one who played a constant leadership role in pushing the movement towards the highest professional standards of history writing and supplied some of its most influential interpretive concepts His ideas are vitally

important for anyone who wishes to understand AA history during the period following Bill Wilson's death in 1971. As a PhD student at Harvard University in the 1970s, he was the first researcher to be granted full access to the archives of Alcoholics Anonymous. The book that resulted, *Not God: A History of Alcoholics Anonymous* (1979), is still the classic work on early AA history. His book on the spiritual life, *Ernest Kurtz and Katherine Ketcham: The Spirituality of Imperfection* (Modern Wisdom from Classic Stories, 1992), is equally well known and has also been an enduring best seller through the years since it appeared. His work on *Shame and Guilt* (orig. pub. 1981, rev. ed. 2007) has given a whole new depth to the discussion of those two vital recovery issues. This present book, containing twelve key articles written by Kurtz between 1982 and 1996, gives us a fourth volume from his hand, displaying the impressive range and breadth of his thought on alcoholism, addiction, and spirituality. Here, under one cover, is Kurtz at his best: historian, gadfly, teacher, interpreter, and master storyteller. This is a must reading for any student of Alcoholics Anonymous and the evolution of spirituality in America.

William L. White, author of *Slaying the Dragon: The History of Addiction Treatment and Recovery in America* **Achievement And Addiction** Edgar P. Nace, 2013-06-20. Achievement and Addiction strives to answer those difficult questions and, in so doing, to provide mental health professionals with the expertise necessary to successfully guide this unique population on their journey toward recovery.

Alcoholics Anonymous in Iceland Hildigunnur Ólafsdóttir, 2000. A historical and comparative analysis of the Icelandic AA movement, which seeks to explain its particular and widespread success in Iceland despite formidable obstacles and paradoxical conditions. Not only is anonymity one of AA's basic organizational principles impossible in a society as small as Iceland, but the country's strong alcoholism treatment system has required a rethinking of AA's role, a move from being a central dynamic force in getting sober to an interactive supporting force in staying sober. Among the topics discussed in this book are the history, structure, and transformation of the movement in Iceland and its relations and interactions with other groups, treatment programs, and society as a whole.
