Lang, 2012-12-06 This volume contains the written versions of the lectures held at the 22 Internationale Universitatswochen fur Kern physik in Schladming Austria in February 1983 The generous support of the Austrian Federal Ministry of Science and Research the Styrian Government and other sponsors once again made it possible for expert lecturers to be invited In choosing the topics the aim was to achieve a balance between the theoretical and phenomenological contributions on the theoretical side discussions centred on the impact of different approaches to quantum field theory on the elementary particle scenario on the other on the recent results in high energy physics which have provided fresh motivations for new kinds of experiments as well as having had a profound influence on cosmology Limited space has made it impossible to include manuscripts of the many interesting seminars presented The lecture notes were reexamined by the authors after the school and are now published in their final form It is a pleasure to thank all the lecturers for their efforts which made it possible to speed up publication Thanks are also due to Mrs Neuhold for the careful typing of the notes H Mitter C B Lang Acta Physica Austriaca Suppl XXV 70 1983 by Springer Verlag 1983 THE EARLY UNIVERSE FACTS AND FICTION by G BARNER Max Planck Institut fur Physik und Astrophysik Institut fur Astrophysik Karl Schwarzschild Str 1 8046 Garching b MUnchen FRG 1 *Recent Developments in High-Energy Physics* C. Developments in High Energy Physics Robert Serber, 1950 **Particle Physics: Ideas and Recent Developments** Jean-Jacques Aubert, Raymond Gastmans, Jean-Marc Gérard, 2012-12-06 For more than 25 years the Standard Model of particle physics has withstood the confrontation with experimental results of increasing precision but this does not imply that the Standard Model can answer all questions about the ultimate constituents of nature This book presents a critical examination of the latest experimental results and confronts them with the predictions of the Standard Model Besides discussions of accelerator results from LEP HERA and the TEVATRON attention is paid to the unresolved problems of neutrino oscillations CP violation dark matter and cosmology New theoretical ideas are also analyzed in order to explore possible extensions of the standard model Realistic plans for future accelerators are presented and their physics potential is discussed paving the way for the next generation of particle physics experiments **Recent Developments in**
