New Developments in Productivity Analysis Charles R. Hulten, Edwin R. Dean, Michael Harper, 2007-11-01 The productivity slowdown of the 1970s and 1980s and the resumption of productivity growth in the 1990s have provoked controversy among policymakers and researchers Economists have been forced to reexamine fundamental questions of measurement technique Some researchers argue that econometric approaches to productivity measurement usefully address shortcomings of the dominant index number techniques while others maintain that current productivity statistics underreport damage to the

environment In this book the contributors propose innovative approaches to these issues The result is a state of the art exposition of contemporary productivity analysis Charles R Hulten is professor of economics at the University of Maryland He has been a senior research associate at the Urban Institute and is chair of the Conference on Research in Income and Wealth of the National Bureau of Economic Research Michael Harper is chief of the Division of Productivity Research at the Bureau of Labor Statistics Edwin R Dean formerly associate commissioner for Productivity and Technology at the Bureau of Labor Statistics is adjunct professor of economics at The George Washington University

New Analytic and Geometric Methods in Inverse Problems Kenrick Bingham,Yaroslav V. Kurylev,E. Somersalo,2003-11-05 In inverse problems the aim is to obtain via a mathematical model information on quantities that are not directly observable but rather depend on other observable quantities Inverse problems are encountered in such diverse areas of application as medical imaging remote sensing material testing geosciences and financing It has become evident that new ideas coming from differential geometry and modern analysis are needed to tackle even some of the most classical inverse problems This book contains a collection of presentations written by leading specialists aiming to give the reader up to date tools for understanding the current developments in the field

The Linear Sampling Method in Inverse Electromagnetic Scattering Fioralba Cakoni,David Colton,Peter Monk,2011-01-01 The linear sampling method is the oldest and most developed of the qualitative methods in inverse scattering theory It is based on solving a linear integral equation and then using the equation s solution as an indicator function for the determination of the support of the scattering object This book describes the linear sampling method for a variety of electromagnetic scattering problems It presents uniqueness theorems and the derivation of various inequalities on the material properties of the scattering object from a knowledge of the far field pattern of the scattered wave

New Theories in Growth and Development Frank Hahn,Fabrizio Coricelli,Massimo Di Matteo,2016-01-06 This collection offers a stimulating and insightful overview of the main issues affecting long term economic growth The novelty of this book is that it brings together two strands of economic literature growth and development theories The communication between different approaches is crucial as it is increasingly understood that growth hinges upon institutional and policy aspects that are generally neglected in the stylized models of growth but highly relevant for developing countries Government policies and institution design become central to the

explanation of divergent growth paths Foreign Direct Investment and Development Theodore Moran,1998-12-01 Foreign direct investment FDI has grown dramatically and is now the largest and most stable source of private capital for developing countries and economies in transition accounting for nearly 50 percent of all those flows Meanwhile the growing role of FDI in host countries has been accompanied by a change of attitude from critical wariness toward multinational corporations to sometimes uncritical enthusiasm about their role in the development process What are the most valuable benefits and opportunities that foreign firms have to offer What risks and dangers do they pose Beyond improving the micro and macroeconomic fundamentals in their own countries and building an investment friendly environment do authorities in host countries need a proactive rather than passive policy toward FDI In one of the most comprehensive studies on FDI in two decades Theodore Moran synthesizes evidence drawn from a wealth of case literature to assess policies toward FDI in developing countries and economies in transition His focus is on investment promotion domestic content mandates export performance requirements joint venture requirements and technology licensing mandates The study demonstrates that there is indeed a large energetic and vital role for host authorities to play in designing policies toward FDI but that the needed actions differ substantially from conventional wisdom on the topic Dr Moran offers a pathbreaking agenda for host governments aimed at maximizing the benefits they can obtain from FDI while minimizing the dangers and suggests how they might best pursue this agenda Investment and Agricultural Development in Developing Countries Cuong Tat Do,2015-12-03 The standard policy prescription to enhance the productivity of agriculture in a developing country like Vietnam is first to encourage the investment of farmers in their human and social capital and then to change the governmental institutions to facilitate the farmers investment This book therefore analyzes the investment of farmers in their health education and social relationships in the context of Vietnams recent agrarian transition Using the tools of regression analysis the author has tried to measure the rate of return of investment in health education and social relationship of farmers on their income Additionally to measure the effect of local government policy on the performance of agricultural firms at the provincial level the book applies current techniques to estimate the relationship between output of agricultural firms and performance of local government As in other low developed countries the rate of return of investment in education is quite extreme and the rate of investment in health is small The effect of investment in social capital of farmers on their income is quite complex due to the complication of the term social capital Moreover the effect of quality of local institutions on performance of agricultural firms at the provincial level is not quite statistically significant The relationship is similar with other research findings worldwide when researchers want to measure the effect of quality of institution on the performance of firms **Adolescents in a changing world** World Health Organization,2024-05-28 This is the full global report to undergo WHO editing and be submitted for clearance **Recent Trends in Institutional Real Estate Investment** R. confronting less developed countries Restructuring Development Theories and Policies M. Shamsul Haque, 1999-09-09 In the contemporary global context replete with various forms of development crises there is a growing demand for an alternative perspective Haque explains the nature and forms of these current development crises critiques the inadequacies of existing development theories to address such crises restructures these theories into an alternative theoretical perspective and suggests specific policy guidelines for attaining a genuine mode of development He interprets development not as human conformity with any hegemonic development schemes but as human autonomy from various forms and levels of subjugation The book presents original arguments covers up to date literature adopts a multidisciplinary approach mediates between theories and policies and offers a comprehensive development alternative **Regional Development: Theory and**

Practice Baleshwar Thakur, H.S. Sharma, Suresh Misra, S. Chattopadhyay, Surendra Singh, 2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints **Regional Development Theories and Their Application** Benjamin

Higgins, 2017-07-12 Throughout the world today former nation states as disparate as Yugoslavia Somalia and Canada have either disintegrated or threaten to splinter into regions The conflicts are economic social ethnic linguistic religious political and cultural Higgins and Savoie analyze the reasons for these conflicts and show why attempts to eliminate regional disparities within nations have been largely unsuccessful This volume is a highly readable comprehensive survey of the literature and current debates in the fields of regional economics development policy and planning **The International Law on Foreign Investment** M. Sornarajah, 2010-05-06 Given recent seismic upheavals in the world's money markets an updated edition of an authoritative reliable textbook on the international law of foreign investment has rarely been so timely Sornarajah's classic text surveys how international law has developed to protect foreign investments by multinational actors

and to control any misconduct on their part It analyses treaty based methods examining the effectiveness of bilateral and regional investment treaties It also considers the reverse flow of investments from emerging industrialising powers such as China and Brazil and explores the retreat from market oriented economics to regulatory controls By offering thought provoking analysis of not only the law but related developments in economics and political sciences Sornarajah gives immediacy and relevance to the discipline This book is required reading for all postgraduate and undergraduate international law students specialising in the law of foreign investments

The Top Books of the Year Recent Developments In The Theory Of Inv The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
