Biographical Dictionary of Twentieth-Century Philosophers Stuart Brown, Diane Collinson, Robert Wilkinson, 2012-09-10

This Biographical Dictionary provides detailed accounts of the lives, works, influence and reception of thinkers from all the major philosophical schools and traditions of the twentieth century. This unique volume covers the lives and careers of thinkers from all areas of philosophy from analytic philosophy to Zen and from formal logic to aesthetics. All the major figures of philosophy such as Nietzsche, Wittgenstein and Russell are examined and analysed. The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non-European, Hispanic language communities. The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism. These allow the reader to set the individual biographies in the context of the philosophical history of the period. With entries written by over 100 leading philosophy scholars, the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date.

Structure The book is structured alphabetically by philosopher. Each entry is identically structured for ease of access and covers nationality, dates and places of birth and death, philosophical style or school, areas of interest, higher education, significant influences, main appointments, main publications, secondary literature, account of intellectual development and main ideas, critical reception and impact. At the end of the book, a glossary gives accounts of the schools, movements and traditions to which these philosophers belonged, and thorough indexes enable the reader to access the information in several ways: by nationality, by major areas of contribution to philosophy (e.g. aesthetics), by major influences on the thinker concerned (e.g. Plato, Kant, Wittgenstein).

Recent Perspectives in American Philosophy Y.H.

Krikorian, 2012-12-06 The essays in this book analyze significant perspectives of the recent past in American philosophy; they represent some of the major trends of this period. Alfred North Whitehead is included with the recent American philosophers since his major philosophic ideas were fully developed in this country. There has been no attempt to deal comprehensively with this period. Several philosophers of equal importance who also deserve attention (C. I. Lewis, A. O. Lovejoy, W. F. Montague, R. B. Perry, F. J. E. Woodbridge and others) have not been discussed. Most of the essays were published at various times in various journals. Though all of the perspectives are presented with sympathetic understanding, they are also critically evaluated.

2
AMERICAN PHILOSOPHY OF THE RECENT PAST But even more than individual philosophers and schools of philosophy, the larger background of contemporary American life has nourished the empirical spirit. Science as the most pervasive climate of our intellectual and practical activity has enhanced the empirical attitude. The great development in this country of business and technological industry has encouraged the pragmatic empirical outlook. Empiricism, however, is an ambiguous term and its different meanings have different philosophic consequences. For some it means that only concrete personal experience can be accepted as reality; for others it means the succession of sense impressions. The more recent usage, the one that has been

dominant in American philosophy identifies empiricism with objectively and socially verifiable pronouncements that is with experimentalism or confirmation through demonstrable evidence

Ancient Logic and Its Modern Interpretations J. Corcoran, 2012-12-06 During the last half century there has been revolutionary progress in logic and in logic related areas such as linguistics Historical knowledge of the origins of these subjects has also increased significantly Thus it would seem that the problem of determining the extent to which ancient logical and linguistic theories admit of accurate interpretation in modern terms is now ripe for investigation The purpose of the symposium was to gather logicians philosophers linguists mathematicians and philologists to present research results bearing on the above problem with emphasis on logic Presentations and discussions at the symposium focused themselves into five areas ancient semantics modern research in ancient logic Aristotle's logic Stoic logic and directions for future research in ancient logic and logic related areas Seven of the papers which appear below were originally presented at the symposium In every case discussion at the symposium led to revisions in some cases to extensive revisions The editor suggested still further revisions but in every case the author was the final judge of the work that appears under his name

A Dictionary of Philosophy in the Words of Philosophers J. Radford Thomson, 1887

A Philosopher at the Crossroads Amos Edelheit, 2022-03-16 This study explains how one of the most remarkable thinkers of the Italian Renaissance Giovanni Pico della Mirandola 1463-1494 broke new ground by engaging with the scholastic tradition while maintaining his humanist sensibilities A central claim of the monograph is that Pico was a philosopher at the crossroads whose sophisticated reading of numerous scholastic thinkers enabled him to advance a different conception of philosophy The scholastic background to Pico's work has been neglected by historians of the period This omission has served to create not only an unreliable picture of Pico's thought but also a more general ignorance of the dynamism of scholastic thought in late fifteenth century Italy The author argues that these deficiencies of modern scholarship stand in need of correction

Santayana-Arg Philosophers Timothy L. S. Sprigge, 2013-07-04 First published in 1999 The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought Each book constitutes a detailed critical introduction to the work of a philosopher of major influence and significance The arguments of the philosophers take on many differing forms Those of George Santayana bear little similarity to what we find today in the Journal of Philosophy indeed some have been misled by his

imagery and splendid prose style to believe that no arguments are being made at all in Santayana's many books Timothy Sprigge's gift is an ability to draw clear ties between these writings and important contemporary issues and to show that Santayana makes a contribution to today's arguments

Philosophy and the Arts in Central Europe, 1500-1700 Joseph S. Freedman, 2024-10-28 The articles in this collection focus on instruction and writings arising from that instruction in philosophy and the arts during the sixteenth and seventeenth centuries with emphasis on Central Europe The introduction brings together and expands upon many of the topics discussed and conclusions reached in the remaining seven articles Four of these articles are devoted to examining the significance of two ancient authors Aristotle and Cicero and of two more recent ones Petrus Ramus and Bartholomew Keckermann The article on Keckermann is based in part on previously unpublished biographical and bibliographical source materials Two concepts encyclopedia and philosophy as utilized in the 16th and 17th centuries constitute the subject matter of separate articles And one article focuses primarily on curriculum plans written during the 16th and early 17th centuries These eight articles are based on a wide array of printed and manuscript source materials which are cited together with library archive locations and call numbers and which are made more easily accessible through three indices at the conclusion of this volume

Race after Sartre Jonathan Judaken, 2008-08-26 Race after Sartre is the first book to systematically interrogate Jean Paul Sartre's antiracist politics and his largely unrecognized contributions to critical race theories postcolonialism and Africana existentialism The contributors offer an overview of Sartre's positions on racism as they changed throughout the course of his life providing a coherent account of the various ways in which he understood how racism could be articulated and opposed They interrogate his numerous and influential works on the topic and his insights are utilized to assess some of today's racial quandaries including the November 2005 riots in France Hurricane Katrina immigration affirmative action and reparations for slavery and apartheid The contributors also consider Sartre's impact upon the insurgent antiracist activists and writers who also walked the roads to freedom that Sartre helped pave
