Descartes' Treatise on Man and its Reception Delphine Antoine-Mahut, Stephen Gaukroger, 2017-01-16 This edited volume features 20 essays written by leading scholars that provide a detailed examination of *L'Homme* by René Descartes. It explores the way in which this work developed themes not just on questions such as the circulation of the blood but also on central questions of perception and our knowledge of the world. Coverage first offers a critical discussion on the different versions of *L'Homme* including the Latin, French and English translations and the 1664 editions. Next the authors examine the early reception of the work from the connection of *L'Homme* to early modern Dutch Cartesianism to Nicolas Steno's criticism of the work and how Descartes' clock analogy is used to defend two different conceptions of the articulation between anatomical observations and functional hypotheses. The book then goes on to explore *L'Homme* and early modern anthropology as well as how the work has been understood and incorporated into the works of scientists, physicians and philosophers over the last 150 years. Overall readers will discover how the trend over the last few decades to understand human cognition in neurophysiological terms can be seen to be not something unprecedented but rather a revival of a way of dealing with these fundamental questions that was pioneered by Descartes.

Physics and Metaphysics in Descartes and in his Reception Delphine Antoine-Mahut, Sophie Roux, 2018-09-14 This volume explores the relationship between physics and metaphysics in Descartes' philosophy. According to the standard account, Descartes modified the objects of metaphysics and physics and inverted the order in which these two disciplines were traditionally studied. This book challenges the standard account in which Descartes prioritizes metaphysics over physics. It does so by taking into consideration the historical reception of Descartes and the ways in which Descartes himself reacted to these receptions in his own lifetime. The book stresses the diversity of these receptions by taking into account not only Cartesianisms but also anti-Cartesianisms and by showing how they retroactively highlighted different aspects of Descartes' works and theoretical choices. The historical aspect of the volume is unique in that it not only analyzes different constructions of Descartes that emerged in the 18th, 19th and 20th centuries but also reflects on how his work was first read by philosophers across Europe. Taken together, the essays in this volume offer a fresh and up-to-date contribution to this important debate in early modern philosophy.

The Reception of the Galilean Science of Motion in Seventeenth-Century Europe Carla Rita

Palmerino, J.M.M.H. Thijssen, 2013-03-20 This book collects contributions by some of the leading scholars working on seventeenth century mechanics and the mechanical philosophy Together the articles provide a broad and accurate picture of the fortune of Galileo's theory of motion in Europe and of the various physical mathematical and ontological arguments that were used in favour and against it Were Galileo's contemporaries really aware of what Westfall has described as the incompatibility between the demands of mathematical mechanics and the needs of mechanical philosophy To what extent did Galileo's silence concerning the cause of free fall impede the acceptance of his theory of motion Which methods were used before the invention of the infinitesimal calculus to check the validity of Galileo's laws of free fall and of parabolic motion And what sort of experiments were invoked in favour or against these laws These and related questions are addressed in this volume

Early Modern Cartesianisms Tad M. Schmaltz, 2017 This new comparative study considers the impact of Descartes's thought on early modern philosophy theology and science This consideration reveals that competing Cartesianisms emerged in the Netherlands and France during a period dating from the last decades of Descartes's life to the century or so following his death in 1650

Descartes's Fictions Emma Gilby, 2019-03-15 Descartes's Fictions traces common movements in early modern philosophy and literary method Emma Gilby reassesses the significance of Descartes's writing by bringing his philosophical output into contact with the literary treatises exempla and debates of his age She argues that humanist theorizing about poetics represents a vital intellectual context for Descartes's work She offers readings of the controversies to which this poetic theory gives rise with particular reference to the genre of tragicomedy questions of verisimilitude or plausibility and the figures of Guez de Balzac and Pierre Corneille Drawing on what Descartes says about and to his many contemporaries and correspondents embedded in the early modern republic of letters this volume shows that poetics provides a repository of themes and images to which he returns repeatedly fortune method error providence passion and imagination for instance Like the poets and theorists of his age Descartes is also drawn to the forms of attention that people may bring to his work This interest finds expression in the mature Cartesian metaphysics of the Meditations as well as later in the moral philosophy of his correspondence with Elisabeth of Bohemia or the Passions of the Soul This volume thus bridges the gap between Cartesian criticism and late humanist literary culture in France

The Oxford Handbook of the Reception of Aquinas Matthew Levering, Marcus Plested, 2021 This Handbook provides a comprehensive survey of Catholic Orthodox and Protestant philosophical and theological reception of Thomas Aquinas over the past 750 years

Burchard de Volder and the Age of the Scientific Revolution Andrea Strazzoni, 2019-11-18 This monograph details the entire scientific thought of an influential natural philosopher whose contributions unfortunately have become obscured by the pages of history Readers will discover an important thinker Burchard de Volder He was instrumental in founding the first experimental cabinet at a European University in 1675 The author goes beyond the familiar image of De Volder as a forerunner of Newtonianism in Continental Europe He consults neglected materials including handwritten sources and takes

into account new historiographical categories His investigation maps the thought of an author who did not sit with an univocal philosophical school but critically dealt with all the major philosophers and scientists of his age from Descartes to Newton via Spinoza Boyle Huygens Bernoulli and Leibniz It explores the way De Volder's unsystematic thought used rejected and reshaped their theories and approaches In addition the title includes transcriptions of De Volder's teaching materials disputations dictations and notes Insightful analysis combined with a trove of primary source material will help readers gain a new perspective on a thinker so far mostly ignored by scholars They will find a thoughtful figure who engaged with early modern science and developed a place that fostered experimental philosophy

Beyond Reception Patrick Baker, Johannes Helmrath, Craig Kallendorf, 2019-04-01 *Beyond Reception* applies a new concept for analyzing cultural change known as transformation the study of Renaissance humanism Traditional scholarship takes the Renaissance humanists at their word that they were simply viewing the ancient world as it actually was and recreating its key features within their own culture Initially modern studies in the classical tradition accepted this claim and saw this process as largely passive Transformation theory emphasizes the active role played by the receiving culture both in constructing a vision of the past and in transforming that vision into something that was a meaningful part of the later culture A chapter then explains the terminology and workings of transformation theory is followed by essays by nine established experts that suggest how the key disciplines of grammar rhetoric history poetry and philosophy in the Renaissance represent transformations of what went on in these fields in ancient Greece and Rome The picture that emerges suggests that Renaissance humanism as it was actually practiced both received and transformed the classical past at the same time as it constructed a vision of that past that still resonates today

The Good Cartesian Steven M. Nadler, 2024 Steven Nadler presents a biographical and philosophical study of Louis de La Forge 1632-1666 an important but underappreciated and understudied follower of René Descartes 1596-1650 who made a major contribution to making Cartesianism the dominant philosophical paradigm of the seventeenth century La Forge was a devoted and faithful but not uncritical disciple who defended updated and even corrected Descartes metaphysics physics and physiology both to move Cartesian system to greater internal coherence and to make it more consistent with the latest scientific developments

The Politics and Reception of Rabindranath Tagore's Drama

Arnab Bhattacharya, Mala Renganathan, 2014-12-05 This is the first volume to focus specifically on Rabindranath Tagore's dramatic literature, visiting translations and adaptations of Tagore's drama and cross-cultural encounters in his works. As Asia's first Nobel Laureate, Tagore's highly original plays occupy a central position in the Indian theatrescape. Tagore experimented with dance music, dance drama and plays exploring concepts of environment, education, gender and women, postcolonial encounters, romantic idealism and universality. Tagore's drama plays a generous host to experimentations with new performance modes like the writing and staging of an all-women play on stage for the first time or the use of cross-cultural styles such as Manipuri dance, Thai craft in stage design or the Baul singing styles. This book is an exciting re-exploration of Tagore's plays, visiting issues such as his contribution to Indian drama, drama and environment, feminist readings, postcolonial engagements, cross-cultural encounters, drama as performance, translational and adaptation modes, the non-translated or the non-translatable Tagore drama, Tagore drama in the 21st century and Indian film. The volume serves as a wide-ranging and up-to-date resource on the criticism of Tagore drama and will appeal to a range of Theatre and Performance scholars as well as those interested in Indian theatre, literature and film.

The Critical Reception of

Beethoven's Compositions by His German Contemporaries Wayne M. Senner, Robin Wallace, William Rhea

Meredith, 1999-05-25 Compiled here are reviews, reports, notes and essays found in German language periodicals published between 1783 and 1830. The documents are translated into English with copious notes and annotations, an introductory essay and indexes of names, subjects and works. This volume contains a general section and documents on specific opus numbers up to opus 54 with musical examples redrawn from the original publications. The collection brings to light contemporary perceptions of Beethoven's music, including matters such as audience, setting, facilities, orchestra, instruments and performers, as well as the relationship of Beethoven's music to theoretical and critical ideas of the eighteenth and nineteenth centuries. These documents, most of which appear in English for the first time, present a wide spectrum of insights into the perceptions that Beethoven's contemporaries had of his monumental music.
