Recording Spaces:

The Bloomsbury Handbook of Popular Music, Space and Place Geoff Stahl, J. Mark Percival, 2022-01-13 Popular music scholars have long been interested in the connection between place and music. This collection brings together a number of key scholars in order to introduce readers to concepts and theories used to explore the relationships between place and music. An interdisciplinary volume drawing from sociology, geography, ethnomusicology, media, cultural and communication studies, this book covers a wide range of topics germane to the production and consumption of place in popular music. Through considerations of changes in technology and the mediascape that have shaped the experience of popular music, vinyl, iPods, social media, the role of social difference and how it shapes sociomusical encounters, queer spaces, gendered and racialised spaces, as well as the construction and representations of place, musical tourism, city branding, urban mythologies, this is an up-to-the-moment overview of central discussions about place and music. The contributors explore a range of contexts moving from the studio to the stage, the city to the suburb, the bedroom to festival, from nightclub to museum, with each entry highlighting the diverse and complex ways in which music and place are mutually constitutive. **Spaces Speak, Are You Listening?** Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening: the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound, home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark and hear the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In *Spaces Speak, Are You Listening?* Barry Blesser and Linda Ruth Salter examine auditory spatial awareness, experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia, cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to see objects with their ears, but even without training, we can all hear spatial geometry, such as an open door or low ceiling. Integrating contributions from a wide range of disciplines including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others, *Spaces Speak, Are You Listening?* establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects. **The Architecture and Geography of Sound Studios** Even Smith Wergeland, 2024-06-21 This is a book about sound studios focusing on their architectural and geographical aspects. It explores how music is materialized under specific spatial and technological conditions and the myths

associated with this process Through ten in depth studies it examines the design evolution and current function of sound studios amidst economic and technological shifts in the music industry Traditional studios are in flux between the past and future The industry while steeped in romanticism and nostalgia also embraces forward driven pragmatism and an extensive reuse culture encompassing heritage audio building materials and existing buildings A surprisingly diverse architectural heritage the most significant feature is the host building the framework around the studio capsule Many traditional studios adapt to digitalization with hybrid solutions reflecting a shift toward smaller more versatile spaces In a time when recordings in theory can happen anywhere destination studios must excel to attract clients balancing historical legacies with diversification Although they may be easy to deconstruct many of the myths endure sustaining ideas of landmark recordings unique locations and distinct remnants of sonic heritage Courtesy of their capacity to keep the past alive in the present traditional sound studios are best described as museums that work This book aims to reach scholars and students with an interest in history theory and preservation as well as practicing architects and architectural students who wish to find out more about the relationship between sound and space acoustic design and retrofitting of historical buildings into specialized functions It also aims to reach practicing musicians producers music students and music scholars

Vibe Merchants: The Sound Creators of Jamaican Popular Music Ray Hitchins, 2016-03-03 Vibe Merchants offers an insider s perspective on the development of Jamaican Popular Music researched and analysed by a thirty year veteran with a wide range of experience in performance production and academic study This rare perspective derived from interviews and ethnographic methodologies focuses on the actual details of music making practice rationalized in the context of the economic and creative forces that locally drive music production By focusing on the work of audio engineers and musicians recording studios and recording models Ray Hitchins highlights a music creation methodology that has been acknowledged as being different to that of Europe and North America The book leads to a broadening of our understanding of how Jamaican Popular Music emerged developed and functions thus providing an engaging example of the important relationship between music technology and culture that will appeal to a wide range of scholars

Regurgitator's Unit Lachlan Goold, Lauren Istvandy, 2022-07-14 Regurgitator s second full length album Unit 1997 was produced in a DIY warehouse studio at a time when this was unusual for a major label band The album went three times Platinum in Australia and won five esteemed ARIA Awards in 1998 including Album of the Year The album s success is indicative of a particular point in time in popular music trends when the world was recovering from the impact of grunge and post grunge bands Regurgitator s subversive attitude toward pop music punk aesthetic unique lyrical narratives and an

ironic view on their own creative product made their music potent in an alternative market defying the prevailing music trends Unit and Regurgitator were the focus of divisive critical reviews yet they continue to rank highly as a quintessentially Australian band This volume situates the development of Unit amongst the DIY culture of a politically charged Brisbane scene and breaks down the album through the lens of recording and songwriting processes This book outlines the impact of Regurgitator's music locally and globally by discussing what made Unit a success at the peak of the alternative music genre

Creativity Harriet Hawkins, 2016-10-04 Creativity whether lauded as the oil of the 21st century touted as a driver of international policy or mobilised by activities has been very much part of the zeitgeist of the last few decades Offering the first accessible but conceptually sophisticated account of the critical geographies of creativity this title provides an entry point to the diverse ways in which creativity is conceptualized as a practice promise force concept and rhetoric It proffers these critical geographies as the means to engage with the relations and tensions between a range of forms of arts and cultural production the cultural economy and vernacular mundane and everyday creative practices Exploring a series of sites Creativity examines theoretical and conceptual questions around the social economic cultural political and pedagogic imperatives of the geographies of creativity using these geographies as a lens to cohere broader interdisciplinary debates Central concepts cutting edge research and methodological debates are made accessible with the use of inset boxes that present key ideas case studies and research The text draws together interdisciplinary perspectives on creativity enabling scholars and students within and without Geography to understand and engage with the critical geographies of creativity their breadth and potential The volume will prove essential reading for undergraduate and post graduate students of creativity cultural geography the creative economy cultural industries and heritage The ^A Relentless Pursuit of Tone

Robert Fink, Melinda Latour, Zachary Wallmark, 2018-09-18 The Relentless Pursuit of Tone investigates the many ways tone and timbre function in popular music From the twang of the banjo to the thump of subwoofers on the dance floor the authors engage with the entire history of popular music as recorded sound from the 1930s to the present day **Making Music** Sue Bradford Edwards, 2024-07-30 Music is a popular form of media and today it is easier than ever for people to create their own This title explores the history of music and music artists as well as the equipment skills challenges and marketing strategies involved in making and releasing music It also looks at the differences between independent artists and artists who sign with major record labels Features include a glossary references websites source notes and an index Aligned to Common Core Standards and correlated to state standards Essential Library is an imprint of Abdo Publishing a division of ABDO The Future of Library Space Samantha Schmehl Hines, Kathryn Moore Crowe, 2016-12-21 This volume of Advances in Library Administration and Organization will focus on the future of library spaces Libraries are dealing with unprecedented changes on several fronts and these factors understandably impact physical library space Looking toward the future what changes can we expect to see in how libraries use space **The Globalizing Cities Reader** Xuefei Ren, Roger Keil, 2017-10-12 The

newly revised *Globalizing Cities Reader* reflects how the geographies of theory have recently shifted away from the western vantage points from which much of the classic work in this field was developed. The expanded volume continues to make available many of the original and foundational works that underpin the research field while expanding coverage to familiarize students with new theoretical and epistemological positions as well as emerging research foci and horizons. It contains 38 new chapters including key writings on globalizing cities from leading thinkers such as John Friedmann, Michael Peter Smith, Saskia Sassen, Peter Taylor, Manuel Castells, Anthony King, Jennifer Robinson, Ananya Roy, and Fulong Wu. The new Reader reflects the fact that world and global city studies have evolved in exciting and wide ranging ways and the very notion of a distinct global class of cities has recently been called into question. The sections examine the foundations of the field and processes of urban restructuring and global city formation. A large number of new entries focus on the emerging urban worlds of Asia, Latin America, and Africa including Beijing, Bogota, Cairo, Cape Town, Delhi, Istanbul, Medellin, Mumbai, Phnom Penh, Rio de Janeiro, Sao Paulo, and Shanghai. The book also presents cases off the conventional map of global cities research such as smaller cities and less known urban regions that are undergoing processes of globalization. The book is a key resource for students and scholars alike who seek an accessible compendium of the intellectual foundations of global urban studies as well as an overview of the emergent patterns of early 21st century urbanization and associated sociopolitical contestation around the world.

Business Innovation and Disruption in the Music Industry Patrik Wikström, Robert DeFillippi, 2016-01-29 Patrik Wikström and Robert DeFillippi bring together innovative multidisciplinary perspectives on business innovation and disruption in the music industry. Authors from fields such as cultural studies, economics, management, media studies, musicology, and human geography in North America, Europe, and Asia focus on the second wave of digital disruption and the transformation of the music industry. The chapters are structured into three parts: the first part contextualizes changes in the music industry that have been driven by digital technologies since the end of the 1990s; the second part unpacks the impact of these disruptive technologies on business models in specific industry sectors and geographies; and the third and final part examines questions related to the emergence of subscription music services. Concluding chapters link back to the role of hackers as a subversive and innovative force in the music economy and examine how hacker creativity can be facilitated and encouraged to generate the next big music industry innovation. This multifaceted look at the music business will serve as a resource for both undergraduate and graduate students as well as established scholars and industry professionals.

The Production and Consumption of Music in the Digital Age Brian J. Hraha, Michael Seman, Tarek E. Virani, 2016-04-14 The economic geography of music is evolving as new digital technologies, organizational forms, market

dynamics and consumer behavior continue to restructure the industry This book is an international collection of case studies examining the spatial dynamics of today s music industry Drawing on research from a diverse range of cities such as Santiago Toronto Paris New York Amsterdam London and Berlin this volume helps readers understand how the production and consumption of music is changing at multiple scales from global firms to local entrepreneurs and in multiple settings from established clusters to burgeoning scenes The volume is divided into interrelated sections and offers an engaging and immersive look at today s central players processes and spaces of music production and consumption Academic students and researchers across the social sciences including human geography sociology economics and cultural studies will find this volume helpful in answering questions about how and where music is financed produced marketed distributed curated and consumed in the digital age

Reformatted Andrew Leyshon, 2014-06-26 The impact of digital technology on the musical economy has been profound From its production reproduction distribution and consumption the advent of MP3 and the use of the Internet as a medium of distribution has brought about a significant transformation in the way that music is made how it is purchased and listened to and significantly how the musical economy itself is able to reproduce itself In the late 1990s the obscure practice of ripping tracks from CDs through the use of compression programmes was transformed from the illegal hobby of a few thousand computer specialists to a practice available to millions of people worldwide through the development of peer to peer computer networks This continues to have important implications for the viability of the musical economy At the same time the production of music has become more accessible and the role of key gatekeepers in the industry such as record companies and recording studios has been undermined whilst the increased accessibility of music at reduced cost via the Internet has revalorised live performance and now generates revenues higher than recorded music The early 21st century has provided an extraordinary case study of an industry in flux and one that throws light on the relationship between culture and economy between passion and calculation This book provides a theoretically grounded account of the implications of digital technology on the musical economy and develops the concept of the musical network to understand the transformation of this economy over space and through time
