edged its way into contemporary theoretical and critical discourse The four sections of this volume denote major areas where transcultural questions and problematics have come to the fore theories of culture and literature that have sought to account for the complexity of culture in a world increasingly characterized by globalization transnationalization and interdependence realities of individual and collective life worlds shaped by the ubiquity of phenomena and experiences relating to transnational connections and the blurring of cultural boundaries fictions in literature and other media that explore these realities negotiate the fuzzy edges of ethnic or national cultures and participate in the creation of transnational public spheres as well as transcultural imaginations and memories and finally pedagogy and didactics where earlier models of teaching other cultures are faced with the challenge of coming to terms with cultural complexity both in what is being taught and in the people it is taught to and where target cultures have become elusive The idea of locating culture and literature exclusively in the context of ethnicities or nations is rapidly losing plausibility throughout an English speaking world that has long since been multi rather than monolingual Exploring the prospects and contours of Transcultural English Studies thus reflects a set of common challenges and predicaments that in recent years have increasingly moved centre stage not only in the New Literatures in English but also in British and American studies

The History of Spain and Portugal Samuel A.

Dunham,1832 **Customer Evaluations of Service Failure and Recovery Encounters** Klaus Schöfer,2003-01-10

Inhaltsangabe Abstract Although many firms may aspire to offer zero defects service the possibility of service failures cannot be wholly eliminated simply because of the variety of factors that may impact on the delivery process Consequently the manner in which firms respond to service failures is increasingly seen as a factor that may separate the more successful firms from the others This response termed service recovery is defined as the process by which the firm attempts to rectify a service failure Some researchers suggest that a firm's response to failures can either reinforce customer relationships or exacerbate the negative effects of the failure In fact some assert that it is often a firm's response to a failure rather than the failure itself that triggers discontent Recoveries are critical because customers perceiving poor recovery efforts may dissolve the buyer seller relationship and purchase elsewhere Such customer turnover can be costly especially given that it costs more to win new customers than it does to retain current ones As a consequence service failure and recovery encounters have been recognised as critical moments of truth for organisations in their efforts to satisfy and keep customers Although there is a substantial literature on customer dissatisfaction and complaining behaviour relatively little progress has been made in developing a theoretical understanding of how consumer evaluate a company's response to service failure and recovery encounters Using perceived justice theory as a conceptual foundation the current research develops and tests a model that 1 explains how customers evaluate service failure and recovery encounters and 2 how these evaluations affect customer satisfaction and subsequent post purchase behaviour and attitudes The study employed a two stage research strategy The first phase of the research included an extensive literature review and exploratory research involving semi

structured interviews and experiments This first stage resulted in the development of a research model establishing the links between the antecedents and outcomes of customer satisfaction judgments involving service failure and recovery encounters In the second phase the proposed conceptual model was evaluated through a self administered cross sectional survey Respondents were requested to recall a time when they complained to a travel and tourism services provider about a failed

expensive and largest accident investigation in the Safety Board's history. No stone was left unturned. The Safety Board concluded that the probable cause of the accident was an explosion of the center wing fuel tank (CWFT) resulting from ignition of the flammable fuel air mixture in the tank. The source of the ignition was most likely an electrical short circuit. The Safety Board, in the course of its investigation, inspected numerous airplanes to check on electrical wiring. What became clear is that wiring is a huge problem in aviation. Ed Block, a Defense whistleblower, tried in the 1980s to draw attention to the problem but was fired instead of awarded. The military changed its wire specifications after massive problems on commercial airplanes, but nothing changed. Almost six years after the accident, the FAA has not done much. How many more people have to die by wire before serious measures are taken.

[AIR CRASH INVESTIGATIONS A DISASTROUS SPARK The Crash of TWA 800](#) George Cramoisi, Editor, 2013-01-01. On July 17, 1996, about 20:31 eastern daylight time, Trans World Airlines Inc. TWA flight 800, a Boeing 747, crashed in the Atlantic Ocean near East Moriches, New York. TWA flight 800 was a scheduled international passenger flight from John F. Kennedy International Airport (JFK), New York, New York, to Charles de Gaulle International Airport, Paris, France. All 230 people on board were killed, and the airplane was destroyed. The weather was good. The National Transportation Safety Board determines that the probable cause of the accident was an explosion of the center wing fuel tank resulting from ignition of the flammable fuel air mixture in the tank. Contributing factors to the accident were the design and certification concept that fuel tank explosions could be prevented solely by precluding all ignition sources and the design and certification of the Boeing 747. The safety issues in this report focus on fuel tank flammability.
