Regional City An Anglo American Discussi:

The Regional City Derek Senior, 2017-07-12 In this volume leaders in the fields of urban design and planning from both sides of the Atlantic examine the structure and functioning of the urban region discuss the strategies and machinery required to make regional planning effective compare experiences in urban renewal and analyze the part played by transportation and land values in the shaping of regional development For thousands of years we have lived in cities towns villages or country houses and most of us still think of our surroundings in these traditional terms Today however most people in Western countries inhabit a new form of social environment the urban region For all who live within thirty or forty miles of a metropolitan center modern means of transport communication and power transmission have opened up a vastly extended range of choice in employment recreation and every other form of social activity But our obsolete pattern of settlement and our pre motor age administrative organization prevent us from making the most of the opportunities to enrich the quality of everyday life which advances in technology have put within our reach In our efforts to plan for a fuller enjoyment of the benefits of regional living we can learn much from those who are tackling this worldwide problem in the context of different laws public outlooks and degrees of motorization Therefore this Anglo American discussion of metropolitan planning offering much material that is new unfamiliar or not easily available has special timeliness and significance **Planning Canadian**

Regions Gerald Hodge, Ira M. Robinson, 2007-10-01 Planning Canadian Regions is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures of sustainable and community development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the conceptual and historical foundations of regional planning and propose a new planning paradigm that emphasizes regional governance and greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems **A**

Cullingworth, 2012-11-12 This book provides a wide ranging review of urban problems and constitutes a major contribution to the mounting public debate that these problems are attracting Many of the problems of social and economic decay are not new indeed they are perennial problems of urban societies As the complexities and interdependencies of modern life have increased so has the resolve to combat the environmental and social ills to which these give rise The particular focus of this volume is on the framework of urban problems the changing demographic social and economic structure the shortage of land and the transport needs of a highly complex industrial society A mass of facts and figures are neatly and succinctly marshalled to provide a clear picture of the problems Stress is laid on the essentially political nature of these problems and the alternative solutions In essence urban problems are
