Water Resource Planning and Decision Making Clifford S. Russell, Duane D. Baumann, 2009 This broad review of the development of US water resource policy analysis and practice offers perspectives from several disciplines law economics engineering ecology and political science While the historical context provided goes back to the early 19th century the book concentrates on the past 60 years and features a discussion of the difficulty that has generally been encountered in bringing the disciplines of economics and ecology into collaboration in the water resource context The book explores the evolution of water related analytical capabilities and institutions and provides illustrations from case studies concluding with recommendations for research institutional change and action Though designed to be a background textbook for interdisciplinary graduate seminars in water resources planning and management it is accessible to interested lay readers and those who have policymaking or implementation responsibility but lack a technical background The book will appeal to students and faculty in water policy economics and engineering and in interdisciplinary programs organized around water resource problems and questions Policy makers and general readers will also appreciate this non technical introduction

Hydrology, Ecology, and Fishes of the Klamath River Basin National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Board on Environmental Studies and Toxicology, Committee on Hydrology, Ecology, and Fishes of the Klamath River, 2008-03-11 The Klamath River basin which spans parts of southern Oregon and northern California has been the focus of a prominent conflict over competing uses for water Management actions to protect threatened and endangered fish species in the basin have left less water available for irrigation in dry years and heightened tensions among farmers and other stakeholders including commercial fishermen Native Americans conservationists hunters anglers and hydropower producers This National Research Council book assesses two recent studies that evaluate various aspects of flows in the Klamath basin 1 the Instream Flow Phase II study IFS conducted by Utah State University and 2 the Natural Flow of the Upper Klamath Basin study NFS conducted by the U S Bureau of Reclamation USBR The book concludes that both studies offer important new information but do not provide enough information for detailed management of flows in the Klamath River and it offers many suggestions for improving the studies The report recommends that a comprehensive analysis of the many individual studies of the Klamath river basin be conducted so that a big picture perspective of the entire basin and research and management needs can emerge Urban Stormwater Management in the United States National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Reducing Stormwater Discharge Contributions to Water Pollution, 2009-03-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events putting higher volumes of water and more pollutants into the nation s rivers lakes and estuaries These changes have degraded water quality and habitat in virtually every urban stream system The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level A number of additional actions such as conserving natural areas reducing hard surface cover e g roads and parking lots and retrofitting urban areas with features that hold and treat stormwater are recommended **The Danube River and The Western Black Sea Coast** Jürg Bloesch, Bernd Cyffka, Thomas Hein, Cristina Sandu, Nike Sommerwerk, 2025-06-27 The Danube River and The Western Black Sea Coast Complex Transboundary Management is a brand new volume in the Elsevier Ecohydrology from Catchment to Coast series The book focuses on the second largest river in Europe and the most transboundary river basin that encompasses 19 countries Chapters focus on changes to the area in the past decade and a way forward Made up of three parts the book starts with an overview covers The Danube River and its recipient the Black Sea including sediment balance water quality hydromorphology and aquatic biodiversity Section two covers the key pressures and implementation of transboundary water management such as aquatic resources invasive species climate change and stakeholder participation Section three assess visions for a sustainable future in the Danube River Basin with a look to applicable sustainability

ecosystems human interaction and improving biodiversity through floodplains The book concludes with a summary and outlook Presents spatial maps tables and easy to follow figures in each chapter aiding in a foundational understanding of the topic Provides a fully comprehensive overview including biogeochemistry ecology productivity livelihood socio economic aspects and governance of the river and seacoast Includes specific cases of ecohydrology in the river basin and seacoast

Prospects for Managed Underground Storage of

Recoverable Water National Research Council,Division on Earth and Life Studies,Water Science and Technology

Board,Committee on Sustainable Underground Storage of Recoverable Water,2008-02-07 Growing demands for water in many parts of the nation are fueling the search for new approaches to sustainable water management including how best to store water Society has historically relied on dams and reservoirs but problems such as high evaporation rates and a lack of suitable land for dam construction are driving interest in the prospect of storing water underground Managed underground storage should be considered a valuable tool in a water manager s portfolio although it poses its own unique challenges that need to be addressed through research and regulatory measures **Southwest Hydrology** ,2006 **Summary**
