China's BRI in Different Regions of the World Sanjeev Kumar, 2023-06-02 China's Belt and Road Initiative BRI is completing a decade There have been varied responses to the Initiative from countries and regions besides the emergence of alternative initiatives and narratives This sets the stage for evaluating the robustness of the Initiative its implementation as well as its implications from the perspective of individual countries and regions across the globe This book begins by examining China's domestic economic maritime and strategic interests as drivers for the Initiative BRI has been analysed in country specific regional and continental contexts It brings out the experiences and responses from South Asia Eurasia East Asia Southeast Asia the Arab world Latin America the Caribbean as well as from Europe and Africa Further BRI has been studied in the larger context of the US China competition The final section explores BRI in the context of the twin challenges of recent times i.e the pandemic and Russia Ukraine conflict The book concludes with an epilogue which outlines the broad trends related to BRI that have emerged from this study of ICWA Governmental Response to Environmental Challenges in Global Perspective Joseph G. Jabbra, O. P. Dwivedi, 1998 In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by

canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations

Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
