levels      *Leadership and the City* Markku Sotarauta, 2015-11-06 The 21st century has been dominated by an almost compulsive race to find new pathways for city development As cities seek to regenerate via the knowledge based economy now more than ever dynamic leadership is required order to navigate new and complex challenges while building community This book is about generative leadership in knowledge city development Leadership and the City is rooted in a conviction that the leadership in a city is crucial in order for it to adjust strategically to major transformations and thus secure a good future for its inhabitants The book opens a fresh view of leadership by focusing on generative leaders and their modes of leading instead of spatial categorisations governance structures and or policy contents and processes It investigates generative leadership by elaborating the modes of leadership power and strategies in influence networks The key points are highlighted with several empirical cases These include Akron and Rochester USA Munich Germany Leeds UK Barcelona Spain as well as Helsinki Tampere and Sein joki Finland This book will be of interest to researchers and practitioners concerned with Leadership Urban Studies and Strategic Management      Manufacturing in the New Urban Economy Willem van Winden, Leo van den Berg, Luis Carvalho, Erwin van Tuijl, 2010-10-04 This book looks at the changing link between manufacturing and knowledge based activities in urban regions drawing on insights from organization studies and regional economics and looking at case studies in Europe South America and Asia      **The University and the City** John Goddard, Paul Vallance, 2013-02-11 Universities are being seen as key urban institutions by researchers and policy makers around the world They are global players with significant local direct and indirect impacts on employment the built environment business innovation and the wider society The University and the City explores these impacts and in the process seeks to expose the extent to which universities are just in the city or part of the city and actively contributing to its development The precise expression of the emerging relationship between universities and cities is highly contingent on national and local circumstances The book is therefore grounded in original research into the experience of the UK and selected English provincial cities with a focus on the role of universities in addressing the challenges of environmental sustainability health and cultural development These case studies are set in the context of reviews of the international evidence on the links between universities and the urban economy their role in place making and in the local community The book reveals the need to build a stronger bridge between policy and practice in the fields of urban development and higher education underpinned by sound theory if the full potential of universities as urban institutions is to be realised Those working in the field of development therefore need to acquire a better understanding of universities and those in higher education of urban development The insights from both sides contained in The University and the City provide a platform on which to build well founded university and city partnerships across the world      **Urban Transformations** Nicholas Wise, Julie Clark, 2017-06-14 Economic restructuring and demographic change have in recent years placed much strain on urban areas with the effects falling disproportionately on neighbourhoods that were previously underpinned by industry and

manufacturing This has presented policy makers and city planners with a binary choice to resist change and stagnate or to change and attempt to keep up with the pace of global demand This edited book tells the story of how urban transformation impacts on people s lives and everyday interactions to question where and to whom benefit accrues from these changes Urban Transformations offers insight into both risk and reward as local communities and public authorities creatively address the challenge of building vital and sustainable urban environments The authors in this edited collection argue that understanding the specifics of community space and place is crucial to delivering insights into how where when why and for whom urban areas might successfully transform The chapters investigate urban change using a range of approaches and case studies from the four corners of the Earth from the United States to Iran from the United Kingdom to Canada The varying scales at which governance or regeneration initiatives operate the nature and composition of urban communities and the local or global interests of different private sector actors all raise questions for urban policy and practice It is important to not only consider the drivers of regeneration but its beneficiaries need to be identified This edited volume addresses and elaborates on critical issues facing urban transformation and renewal as a basis for future discussion on strategies for successful urban transformation
