Metropolitan International University, Uganda.

Abstract

The purpose of the study was to discover the prevalence of forced migration on regional security in West Nile. The study was based on the results from 2018-2020 respondents who presented to the researcher accurate data out of the sample size of 250 respondents. The objective of the study was to determine the effect of forced migrations on regional security in West Nile. Data was collected from the officials from the office of the prime minister, local people in West Nile, refugees, police men and from the ministry of internal affairs. The results of the study in this report indicate that over 79% of the respondents asserted that forced migration is responsible for the insecurity in the region however the other percentage of the respondents say that force migration also came with positive benefits in the region. This research report also indicates that majority of the refugees with a percentage of 60 informed the researcher that amongst them there are criminals that have tarnished the name of refugee in West Nile. And finally, this research results also show that there are many un-withstandable factors that have forced them to leave their areas to other places.

Key words: Forced Migrations, Regional Security, West Nile Sub-region, and Uganda.

Introduction

Forced migration refers to movements made by refugees, migrants and internally displaced persons. These may be either within their country or between countries after being displaced from their homeland. As of 2020, 1 person is uprooted every 2 seconds (often with nothing but the clothes on their back). Currently, the total number of forcibly displaced people worldwide is more than 68.5 million (Ninsima et al., 2023). There are a number of different factors that lead hundreds of millions of people around the world to leave their homes. However, all these factors lead to one common goal. Forced migration (also known as forced displacement) has uprooted millions of people worldwide, including refugees, internally displaced persons and migrants (Faridah et al., 2023). 1 person is uprooted every 2 seconds and the total number of forcibly displaced people worldwide currently stands at over 68.5 million. Forced migration is defined as "the permanent or temporary removal of individuals, families and/or communities against their will from the homes and/or lands they occupy, without providing appropriate forms of legal or other protection and access to them (Hosboun, 2012). The practice of forced eviction involves the involuntary removal of persons from their homes or land, for which they may be directly or indirectly responsible (Convention on the Rights of the Child, 2016). It involves the effective removal of an individual or group from being able to live in a particular house, residence or place and the assisted (in case of resettlement) or unassisted (without resettlement) movement of evicted persons or groups to other areas (Coomaraswamy, 2015). Forced migration (also known as forced displacement) has uprooted millions of people worldwide, including refugees, internally displaced persons

Ethnic Violence and the

Societal Security Dilemma Paul Roe, 2004-08-02 Ethnic Violence and the Societal Security Dilemma explores how the phenomenon of ethnic violence can be understood as a form of security dilemma by shifting the focus of the concept away from its traditional concern with state sovereignty to that of identity instead The book includes case studies on ethnic violence between Serbs and Croats in the Krajina region of Croatia August 1990 ethnic violence between Hungarian and Romanians in the Transylvania region of Romania March 1990 *Race and the Yugoslav region* Catherine Baker, 2018-03-22 This electronic version has been made available under a Creative Commons BY NC ND open access license This is the first book to situate the territories and collective identities of former Yugoslavia within the politics of race not just ethnicity and the history of how ideas of racialised difference have been translated globally The book connects critical race scholarship global historical sociologies of race in translation and south east European cultural critique to show that the Yugoslav region is deeply embedded in global formations of race In doing this it considers the everyday geopolitical imagination of popular culture the history of ethnicity nationhood and migration transnational formations of race before and during state socialism including the Non Aligned Movement and post Yugoslav discourses of security migration terrorism and international intervention including the War on Terror and the present refugee crisis **The Ecosystem of Exile Politics** Susan Banki, 2024-11-15 The Ecosystem of Exile Politics relays the events in Bhutan that led to the exodus of one sixth of the population and then recounts the activism by Bhutan's refugee diaspora that followed in response Susan Banki asserts that activism functions like a physical ecosystem in which hubs of activism in different locations interact to pressure the home country For Bhutan's refugee mobilizers physical proximity offers advantages in Nepal and India where organizing protests lobbying and collecting information about government abuse in Bhutan is aided by being close to the homeland But in an ecosystem of exile politics proximity is both a boon and a bane Sites proximate to Bhutan can be spaces of risk and disempowerment and refugee activists rarely secure legal political and social protection While distant diasporas in the Global North may not be in precarious situations they cannot tap into the advantages of proximity In examining these phenomena The Ecosystem of Exile Politics adds to theoretical understandings of exile politics and to empirical research on Bhutan and its refugee population SUSTAINABLE DEVELOPMENT OF FAMILIES THROUGH URBAN OUT- MIGRATION Dr. Sunitha V Ganiger, 2020-06-11 Introduction Migration is a multi faceted phenomenon which is of vital importance in the process of economic development man power planning urbanization and social change Rao M S B 1986 It is a pragmatic and a ubiquitous phenomena as through out the globe we find that migration is contributing to the socio economic development which enables man to overcome the tyranny of political social economic and psychological fluctuations of a region Like for instance the partition of India and Pakistan was one of the major catalysts for migration during late 1940 s when millions of persons abandoned this land and migrated to Pakistan and vice versa Similarly of late many Indian computer engineers are migrating to western countries thus leading to brain drain which is causing a severe menace of the millennium Since time

immemorial man has been ruthlessly migrating from one place to another and nowadays because of the increased transportation and communication man is more agile Thus migration is entirely determined by the human yearning for the decision to move Individual migration also brings changes in the process of family formation and growth Once migration has occurred from the land of origin both the household and the local population must adapt to the loss or gain However the impact of an individual migration on the origin depends on the duration of absence and remittances returned David P L 1996
