CITIZENSHIP ALLÍVIA ROUSE C. RABBANI,FRANCISCO VANDERLEI DE LIMA,ROBERTO MUHÁJIR R. RABBANI,EMÍLIA RANHEMAY K. RABBANI,GIOVANNA MARTINS WANDERLEY,LUCERO MARTÍNEZ KASAB,LUIZ ANTONIO GOMES LOPES,CARLOS AUGUSTO VILLAMIZAR CAÑAS,2023-11-09 Some people often use to say that in life we have few privileges However most of them fail to measure the greatness of simple or apparently simple things like seeing reading feeding

ourselves being able to access health services education justice freedom That simple word contains what in my opinion is the greatest wealth we can possess Freedom to move think and express ourselves love and choose who we love Even destroy or destroy us This book has made me think about the exercise of freedom about the way in which the world acts and how we act in it almost without awareness of what we do about the way in which we are free to associate relate and therefore Freedom forces us paradoxically to exercise it within the limits of rationality and responsibility with ourselves and with the planet we inhabit After all we have nowhere else to go What need do we have to establish boundaries to separate ourselves more each day from the other Have we ever stopped to think about what the world would be like if we were aware that we could be one although diverse This book like almost never before has brought me to that point Dreams the place of freedom par excellence can come true if we fight for them with determination World Citizenship is a possible dream The articles chapters that make up this book guide us towards the awakening of individual and collective conscience which ultimately is what is desirable so that we can be citizens of the world a phrase that has been heard or read many times but not has been sufficiently well presented or considered This is a happy exception The social economic cultural ethnic and political aspects are addressed clearly with a language and style that makes it easy to be read and understood This is not intended to be a book of dogma but rather a proposal to begin the path towards a better future built by everyone compiling the contributions of different visions but that focuses on the Human Being in our home Planet Earth Great progress has already been seen in regional and even international intercultural political and economic agreements which are good but not so good in terms of the production distribution sale and purchase of weapons substances that in some parts are members of the cultural acquis and in others they are considered illegal These phenomena could well be explained from the perspective of Habermas Bauman and others even at the risk of falling into simplism and or deterministic reductionism We are all one respect for otherness is the key for freedom to be established and thus the Global Village can overcome the crises in which it is immersed many times due to failures in communication and absence of empathy the pretension of wanting to impose ideas on others to dominate through force and not with the force of reason This is the origin of many unnecessary conflicts This text is not about proposing a unified vision of Orwell and Huxley but rather about understanding that we can be united in diversity as the Baha i principles clearly state to cite a current of thought It is in the communication where we have the best tool to forge a global society where we can agree on the common goals of the survival and preservation of our habitat with all that this implies We have used it efficiently and we have succeeded Or we have almost achieved it The creation of blocs such as the European Community Mercosur the Arab League and others has made it possible to bring together communities similar in thought and interests and thus become stronger to negotiate assert their rights and defend themselves against possible attacks However will it be possible that all groupings can ever be governed by a global control body Any reader who approaches the text will soon find themselves reflecting on themselves and what they can contribute to improve from within and towards the

environment analyzing concepts such as Globalization and Worlding It is like a ticket to the world of self and collective consciousness allowing you to finally answer whether global citizenship is a possible dream and if you believe so set yourself the task of making it a reality This book does not pretend to be the last word on the issues raised but it does show us a possible roadmap and as a conscious reader I feel obliged to reflect on what I have read what I have learned what I can put into practice to make the world a better place if not already for me for generations to come

State, Foreign Operations, and Related Programs Appropriations for 2015 United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2014 *From Subject to Citizen* Alastair Davidson, 1997-05-12 This important theoretically sophisticated work explores the concepts of liberal democracy citizenship and rights Grounded in critical original research the book examines Australia's political and legal institutions and traces the history and future of citizenship and the state in Australia The central theme is that making proof of belonging to the national culture a precondition of citizenship is inappropriate for a multicultural society such as Australia This becomes an object lesson for the multicultural regional polities forming throughout the world
