## European Communities

John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

## **The European Union and the Regions** Barry

Jones, Michael Keating, 1995-05-25 Is Europe witnessing the death of the once mighty nation state If it is then two of the most

powerful factors in its post war decline have been European integration and regionalism Both challenge the nation state s monopoly of authority one from above the other from below Although it is increasingly recognized that the two are connected This book provides a definitive examination of the new patterns of politics and policy that link the three levels of European Union nation state and region Looking at each member state in turn the authors emphasize the diversity of the European experience European integration has differing impacts on different regions In some it is seen as a threat centralizing power and increasing their peripherality To others it is an opportunity to by pass national governments and assert their personality The authors are sceptical of the Europe of the Regions scenario in which nation states fade away in favour of the other two levels But they do show how the Maastricht commitment to subsidiarity together with the twin forces of European integration and regional assertion are profoundly changing the politics of Europe as it moves into the twenty first century      **European Cohesion Policy** Willem Molle,2007-08-07

The only comprehensive text available for advanced study and professional reference this book brings much needed clarity to both the theoretical and practical aspects of EU intervention Integrating both theoretical and practical research in a clear and accessible structure covering economic social and territorial issues European Cohesion Policy provides a systematic view of the various stages of the whole policy cycle looking in detail at the evolution of the problems the design of the policy system the implementation in practice the evaluation of effects An authoritative analysis of the problems and debates involved European Cohesion Policy is essential reading for students policy makers development workers and researchers working in all aspects of European policy      *Regional Development and the European Community* Ian McAllister,1982      **Britain within the European Community** A. **Sustainable Development for Central and Eastern Europe** Ulrich Graute, 2012-12-06 Central and Eastern European Countries are undergoing a difficult transition process with consequences for spatial development Europe needs a more balanced polycentric system of cities a new urban rural relationship parity of access to infrastructure and knowledge as well as prudent management and development of the natural and cultural heritage Dealing with these complex challenges and the need for sustainable development politicians requires qualified advice from experts To this end the German Ministry for Regional Planning Construction and Urban Development initiated the Network of Spatial Research Institutes in Central and Eastern Europe CEE Net in 1992 Exchange of knowledge and an open dialogue at all levels are pre conditions for the cooperative development of visions and strategies serving spatial development in Europe The annual conferences of the network have been a first steps towards closer cooperation The high interest shown in these conferences by academics and government representatives and the fact that several research projects have already crystallised out of the debates they engendered indicate that the network is meeting a need for exchange and cooperation Decisions on spatial development do not stop at national borders and the discussion on spatial development in any European region has therefore to take the European context into consideration A special advantage of this publication is that as well as focusing on spatial development and research in CEE regions it also discusses Central and Eastern Europe in a European context
