As UN Secretary General Ban Ki moon has stated Climate change is the pre eminent geopolitical and economic issue of the 21st century It rewrites the global equation for development peace and prosperity The scientific evidence is clear climate change is happening and the exposure to weather related disasters such as heat waves forest fires cyclones and flooding has the potential to seriously impact the tourism sector The travel and tourism industry is both a significant contributor to climate change being responsible for 5% of global greenhouse gas emissions and is directly impacted by it At the same time the industry is a vital driver of the global economy with an estimated US 6 6 trillion total contribution in 2012 and is particularly significant to developing and emerging economies where the impacts of climate change can be most disruptive This collection of papers is a timely and indispensable source of insights and models of best practice relating to the mitigation of and adaptation to climate change by various sectors of the industry Encyclopedia of the Arctic Mark Nuttall,2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment *Countdown to Kyoto, Parts I-III* United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment,1998 **Climate Change 2001: The Scientific Basis** J. T. Houghton,Y. Ding,D. J. Griggs,M. Noguer,P. J. van der Linden,X. Dai,K. Maskell,C. A. Johnson,2001-07-12 Climate Change 2001 The Scientific Basis is the most comprehensive and up to date scientific assessment of past present and future climate change The report Analyses an enormous body of observations of all parts of the climate system Catalogues increasing concentrations of atmospheric greenhouse gases Assesses our understanding of the processes and feedbacks which govern the climate system Projects scenarios of future climate change using a wide range of models of future emissions of greenhouse gases and aerosols Makes a detailed study of whether a human influence on

climate can be identified Suggests gaps in information and understanding that remain in our knowledge of climate change and how these might be addressed This latest IPCC assessment will again form the standard scientific reference for all concerned with climate change and its consequences including students and researchers in all aspects of environmental and atmospheric science and policymakers in governments and industry worldwide
