Regions Spatial Strategies And Sustainable Development:

Regions, Spatial Strategies, and Sustainable Development Graham Haughton, Dave Counsell, 2004-01-01 **Regions, Spatial Strategies and Sustainable Development** David Counsell, Graham Haughton, 2004-07-31 This book focuses on recent regional policy and planning debates in all the English regions Leadership and the City Markku Sotarauta, 2015-11-06 The 21st century has been dominated by an almost compulsive race to find new pathways for city development As cities seek to regenerate via the knowledge based economy now more than ever dynamic leadership is required order to navigate new and complex challenges while building community This book is about generative leadership in knowledge city development Leadership and the City is rooted in a conviction that the leadership in a city is crucial in order for it to adjust strategically to major transformations and thus secure a good future for its inhabitants The book opens a fresh view of leadership by focusing on generative leaders and their modes of leading instead of spatial categorisations governance structures and or policy contents and processes It investigates generative leadership by elaborating the modes of leadership power and strategies in influence networks The key points are highlighted with several empirical cases These include Akron and Rochester USA Munich Germany Leeds UK Barcelona Spain as well as Helsinki Tampere and Seinäjoki Finland This book will be of interest to researchers and practitioners concerned with Leadership Urban Studies and Strategic Management

Skills and Cities Sako Musterd, Marco Bontje, Jan Rouwendal, 2016-03-17 Creative industries have become fundamental in signalling the economic wellbeing of cities and urban regions Workers who are attracted to the sector tend to have strong preferences when it comes to the neighbourhoods they want to live in with factors such as job availability and urban amenities playing a large part in their decision Skills and Cities analyses these factors and looks at the implications for urban and regional policy across a range of European cities Drawing conclusions from the Netherlands and Scandinavian cities Copenhagen and Helsinki this book sheds new light on the debate about the importance of jobs and urban amenities for attracting high skilled employees This edited collection brings together international literature and individual residential experiences from different cities presenting policy simulations and highlighting the differences between urban and suburban groups Subsequent chapters discuss the location preference and settlement process of international migrants and students in an attempt to understand what it is that attracts highly skilled workers to a particular area This book concludes by expertly drawing together the key issues surrounding the residential behaviour of highly educated workers and students This collection will be of interest to researchers and policy makers in urban planning as well as Postgraduate students researching housing preferences **Beyond Territory** Harald Bathelt, Maryann Feldman, Dieter F. Kogler, 2012-03-29 The main purpose of the book is to discuss new trends in the dynamic geography of innovation and argue that in an era of increasing globalization two trends seem quite dominant rigid territorial models of innovation and localized configurations of innovative activities The book brings together scholars who are working on these topics Rather than focusing on established

concepts and theories the book aims to question narrow explanations rigid territorializations and simplistic policy frameworks it provides evidence that innovation while not exclusively dependent on regional contexts can be influenced by place specific attributes The book will bring together new empirical and conceptual work by an interdisciplinary group of leading scholars from areas such as economic geography innovation studies and political science Based on recent discussions surrounding innovation systems of different types it aims to synthesize state of the art know how and provide new perspectives on the role of innovation and knowledge creation in the global political economy

The Recession and Beyond David Bailey, Caroline Chapain, 2012-03-29 How has the recession impacted on firms people and places How have local and regional authorities responded This book aims to answer these questions by offering an overview of the impacts of the recession on people and places and how it has affected local authorities in the UK and other OECD countries The volume makes a fresh contribution to understanding local economic development and governance by providing a unique perspective and original data on the way local authorities have dealt with the recent economic shock across countries

Business Networks in Clusters and Industrial Districts Fiorenza Belussi, Alessia Sammarra, 2009-09-10 During the 1980s the Marshallian concept of industrial district ID became widely popular due to the resurgence of interest in the reasons that make the agglomeration of specialised industries a territorial phenomenon worth being analysed The analysis of clusters and IDs has often been limited considering only the local dimension of the created business networks The external links of these systems have been systematically under evaluated This book offers a deep insight into the evolution of these systems and the internal external mechanism of knowledge circulation and learning This means that the access to external knowledge information or R showing that existing capabilities expand when locally embedded knowledge is combined with accessible external knowledge In this view external knowledge linkages reduce the danger of cognitive lock in and over embeddedness which may become important obstacles to local learning and innovation when technological trajectories and global economic conditions change A selection of international experts

Manufacturing in the New Urban Economy Willem van Winden, Leo van den Berg, Luis Carvalho, Erwin van Tuijl, 2010-10-04 This book looks at the changing link between manufacturing and knowledge based activities in urban regions drawing on insights from organization studies and regional economics and looking at case studies in Europe South America and Asia

Urban Innovation Systems Willem van Winden, Erik Braun, Alexander Otgaar, Jan-Jelle Witte, 2014-04-11 Why are some regions and cities so good at attracting talented people creating high level knowledge and producing exciting new ideas and innovations What are the ingredients of success Can innovative cities be created and stimulated or do they just flourish by mere chance This book analyses the development and management of innovation systems in cities in order to provide a better understanding of what makes such systems perform The book opens by developing a conceptual model that combines insights from urban economics with economic geography urban governance and place marketing This highlights the relevance of path dependence different types

of proximity and the role of clusters networks and platforms institutional conditions place attractiveness and place identity in the evolution of local innovation systems The authors then draw on this conceptual framework to structure empirical case studies in three cities with a relatively high innovation performance Eindhoven the Netherlands Stockholm Sweden and Suzhou China Through these case studies they provide a detailed analysis of how successful innovation systems evolve and what makes them tick Unique to this book is the linking of analysis to concrete policy and management responses The book ends with a discussion on six themes in the development of successful urban innovation systems firm capabilities and leader firms higher education and research attractive environment place branding institutional environment and entrepreneurship Each theme is examined fully drawing lessons from the case studies and from recent insights and other cases discussed in the literature This title will be of interest to students researchers and policymakers involved in regional innovation systems knowledge locations and cluster development

Smaller Cities in a World of Competitiveness Peter Karl Kresl, Daniele Ietri, 2016-04-28 Much recent research in Urban Studies has concentrated on the notion of the global city but discussion has also covered a larger set of mega cities with populations in excess of 10 million This analysis has begged the question of the optimal size for a city is larger always better Smaller Cities explores the advantages and disadvantages of different sized cities trying to determine their place in the global economy and hierarchy How can smaller cities gain or retain their competitiveness in a world of large cities In a globalized world the nation has perhaps been diminished as an economic actor with fiscal shortcomings and political gridlock leaving cities more or less on their own in the task of enhancing their competitiveness and improving the economic lives of their residents This book argues that smaller cities of varying population can be important actors in competitiveness and aims to bring attention to an area often overlooked by researchers In short are Pittsburgh San Diego and Austin less competitive than London and Mumbai This volume will be of interest to students researchers and city professionals who work in urban economy and urban geography

Making Cultural Cities in Asia June Wang, Tim Oakes, Yang Yang, 2015-12-22 This book examines the vast and largely uncharted world of cultural creative city making in Asia It explores the establishment of policy models and practices against the backdrop of a globalizing world and considers the dynamic relationship between powerful actors and resources that impact Asian cities Making Cultural Cities in Asia approaches this dynamic process through the lens of assemblage how the policy models of cultural creative cities have been extracted from the flow of ideas and how re invented versions have been assembled territorialized and exported This approach reveals a spectrum between globally circulating ideals on the one hand and the place based contexts and contingencies on the other At one end of the spectrum this book features chapters on policy mobility in particular the political construction of the web of communication and the restructuring or rescaling of the state At the other end chapters examine the increasingly fragmented social forces their changing roles in the process and their negotiations alignments and resistances This book will be of interest to researchers and policy makers concerned with cultural and urban

studies creative industries and Asian studies *Regionalism Contested* Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe **Soft Spaces in Europe** Phil Allmendinger, Graham Haughton, Jörg Knieling, Frank Othengrafen, 2015-05-01

The past thirty years have seen a proliferation of new forms of territorial governance that have come to co exist with and complement formal territorial spaces of government These governance experiments have resulted in the creation of soft spaces new geographies with blurred boundaries that eschew existing political territorial boundaries of elected tiers of government The emergence of new non statutory or informal spaces can be found at multiple levels across Europe in a variety of circumstances and with diverse aims and rationales This book moves beyond theory to examine the practice of soft spaces It employs an empirical approach to better understand the various practices and rationalities of soft spaces and how they manifest themselves in different planning contexts By looking at the effects of new forms of spatial governance and the role of spatial planning in North western Europe this book analyses discursive changes in planning policies in selected metropolitan areas and cross border regions The result is an exploration of how these processes influence the emergence of soft spaces governance arrangements and the role of statutory planning in different contexts This book provides a deeper understanding of space and place territorial governance and network governance **The Politics of Aquaculture**

Caitríona Carter, 2018-06-12 Aquaculture is increasingly complementing global fisheries and is relevant to ocean and freshwater health biodiversity and food security as well as coastal management tourism and natural heritage This book makes the case for treating the governance of this industry as meriting attention in its own right abandoning the polemic discussions of fish farming and opening up new ways for debating its past present and future Developing and applying an original analytical framework for studying fish farming aquaculture embedded into larger theory about the changing political system the author generates and compares new data on the governance of aquaculture Detailed case studies are presented of Scottish salmon Aquitaine trout in France and seabass and seabream in Greece The book shows how ecological issues are related to economic and social issues as well as interdependences between territories public and private regulation and different knowledge forms demonstrating that these are creating alternative approaches for sustainability governance It

provides a deeper understanding of the political aspects of governing European aquaculture including how it both is structured by and is structuring politics It is aimed at advanced students researchers and professionals in aquaculture and fisheries as well as those with a broader interest in sustainability politics and sustainability governing practices

Socio-Economic Segregation in European Capital Cities Tiit Tammaru, Szymon Marcińczak, Maarten van Ham, Sako Musterd, 2015-07-24 Growing inequalities in Europe are a major challenge threatening the sustainability of urban communities and the competitiveness of European cities While the levels of socio economic segregation in European cities are still modest compared to some parts of the world the poor are increasingly concentrating spatially within capital cities across Europe An overlooked area of research this book offers a systematic and representative account of the spatial dimension of rising inequalities in Europe This book provides rigorous comparative evidence on socio economic segregation from 13 European cities Cities include Amsterdam Athens Budapest London Milan Madrid Oslo Prague Riga Stockholm Tallinn Vienna and Vilnius Comparing 2001 and 2011 this multi factor approach links segregation to four underlying universal structural factors social inequalities global city status welfare regimes and housing systems Hypothetical segregation levels derived from those factors are compared to actual segregation levels in all cities Each chapter provides an in depth and context sensitive discussion of the unique features shaping inequalities and segregation in the case study cities The main conclusion of the book is that the spatial gap between the poor and the rich is widening in capital cities across Europe which threatens to harm the social stability of European cities This book will be a key reference on increasing segregation and will provide valuable insights to students researchers and policy makers who are interested in the spatial dimension of social inequality in European cities Chapters 1 and 15 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

Creating Knowledge Locations in Cities Willem van Winden, Luis de Carvalho, Erwin van Tuijl, Jeroen van Haaren, Leo van den Berg, 2013-06-19 Based on a clear and comprehensive literature review this book contains an analysis of five knowledge locations in Europe and one in South Korea The case studies in the book cover several European countries Ireland Finland Germany Spain The Netherlands The cases are well grounded in the different contexts that these national settings provide which allows comparisons between them

Code and the City Rob Kitchin, Sung-Yueh Perng, 2016-04-20 Software has become essential to the functioning of cities It is deeply embedded into the systems and infrastructure of the built environment and is entrenched in the management and governance of urban societies Software enabled technologies and services enhance the ways in which we understand and plan cities It even has an effect on how we manage urban services and utilities Code and the City explores the extent and depth of the ways in which software mediates how people work consume communication travel and play The reach of these systems is set to become even more pervasive through efforts to create smart cities cities that employ ICTs to underpin and drive their economy and governance Yet despite the roll out of

software enabled systems across all aspects of city life the relationship between code and the city has barely been explored from a critical social science perspective This collection of essays seeks to fill that gap and offers an interdisciplinary examination of the relationship between software and contemporary urbanism This book will be of interest to those researching or studying smart cities and urban infrastructure

Dynamics of Economic Spaces in the Global Knowledge-based Economy Sam Park, 2014-09-19 This book addresses how economic spaces dynamically change within the context of the global knowledge based economy Specifically it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization knowledge based economy information society service world climate change and population aging Focusing on East Asia especially on Korea it deals with case studies regarding the processes and patterns of these global dynamics looking at economic spaces of various spatial scales and types of economic actors This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy It also emphasizes the analysis of empirical studies at the level of firm region and state by considering an evolutionary perspective over time In developing its theoretical framework this book examines regional resilience intangible assets service innovation path dependence and other notions related to the evolution of economic spaces and incorporates these elements into real world case studies The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy An integral model of service innovation the integration of path dependence and regional resilience the interaction between firm and region for the accumulation of intangible assets and the roles of governments and global firms these are all essential to understanding the dynamics of economic spaces in East Asia The theoretical model and case studies in this book suggest policy implications for developing countries especially in the Asian and African regions with regard to regional development and innovation policies

The Scottish Economy Kenneth Gibb, Duncan MacLennan, Des McNulty, Michael Comerford, 2017-07-06 The Scottish economy is at the heart of contemporary constitutional and public policy debates This substantial new edited collection the first comprehensive and authoritative analysis for more than 60 years is a timely update on the classic volume of the same name edited by Sir Alec Cairncross in 1954 It is data rich and offers links to updatable data and leading indicators of the Scottish economy including measures of public finances distributional evidence and growth Readers will find a series of easy to follow chapters covering the Scottish economy from every angle oil and gas health education finance rural Scotland inequality climate change gender and work housing infrastructure and cities Each sector based chapter explores the main issues draws out key empirical facts and considers policy challenges that lie ahead This book includes an historical account of the development of the Scottish economy the trajectory of economic policy in Scotland reviews of the current fiscal position and the wider economic landscape and also an intriguing insight into the emerging distinctive approach to Scottish public policy This book brings together evidence and high quality research by experts on the

Scottish economy in a politically neutral accessible and non technical way The volume will assist readers in navigating their way through the many political debates about constitutional and economic futures that are underway in modern Scotland and the UK A website also exists to accompany The Scottish Economy www.scottisheconomy.scot In today's inter connected world it makes sense to have a book on the Scottish economy supplemented by online access to important data information and evidence as a means of keeping material current
