Zelizer, 2022-02-01 The sociologist Daniel Bell was an uncommonly acute observer of the structural forces transforming the United States and other advanced societies in the twentieth century The titles of Bell's major books *The End of Ideology* 1960 *The Coming of Post Industrial Society* 1973 and *The Cultural Contradictions of Capitalism* 1976 became hotly debated frameworks for understanding the era when they were published In *Defining the Age* Paul Starr and Julian E. Zelizer bring together a group of distinguished contributors to consider

how well Bell's ideas captured their historical moment and continue to provide profound insights into today's world. Wide-ranging essays demonstrate how Bell's writing has informed thinking about subjects such as the history of socialism, the roots of the radical right, the emerging postindustrial society and the role of the university. The book also examines Bell's intellectual trajectory and distinctive political stance. Calling himself a socialist in economics, a liberal in politics and a conservative in culture, he resisted being pigeon-holed, especially as a neoconservative. *Defining the Age* features essays from historians Jenny Andersson, David A. Bell, Michael Kazin and Margaret O. Mara, sociologist Steven Brint, media scholar Fred Turner and political theorists Jan Werner Müller and Stefan Eich. While differing in their judgments, they agree on one premise: Bell's ideas deserve the kind of nuanced and serious attention that they finally receive in this book.

Managing Aerospace Projects Jimmy Williams, 2017-09-12. Over the next twenty years, the role and contributions of successfully managed projects will continue to grow in importance to aerospace organizations, especially considering the demands of emerging markets. The accompanying challenges will be how to effectively reduce product and process cost where known incremental and unknown transformational technological innovation is required. *Managing Aerospace Projects* brings together ten seminal SAE technical papers that support the vision of a more holistic and integrated approach to highly complex projects. Using the concept of project management levers, Dr. Jimmy Williams Jr., the editor of this title, expands on the critical importance of correctly deciding on organizational strategies. Technology and product strategy, global portfolio strategy, project portfolio strategy. Sub-optimized strategies result in and contribute to a portfolio of misdirected projects and organizational dissatisfaction with project management outcomes unrelated to the actual project management process. As an example, ensuring the convergence and readiness of technologies that are critical for the design, development and assembly of aircraft requires a disciplined and flexible approach for product and technology development. Operating in an environment in which customer needs and supplier capabilities are dynamic requires continual focus on a portfolio of projects, initiatives and capabilities that result in sustaining competitive advantage and influence. *Managing Aerospace Projects* stresses the positive impact of project classification and the specific handling and leadership knowledge requirements so that these endeavors are indeed successful. Some comparisons and lessons from

the automotive industry are offered The notion that project management competence and capabilities are embedded in distinct ways of coordinating and combining multiple competencies suggests that failing to recognize the required organizational adaptations could be a major contributor to sub optimized project management outcomes *The Anatomy of Buzz* Emanuel Rosen, 2002-05-14 A groundbreaking guide to creating the word of mouth magic that cuts through the skepticism and information overload of today's consumers and drives sales and profits to new heights What turns a sleeper into a box office bonanza or catapults a just released book to the top of bestseller lists How do people decide which car to buy which fashions fit the image they seek and even which movie to see Despite the daily assault of advertising and other traditional marketing strategies statistics show that consumers are overwhelmingly persuaded by word of mouth the recommendations of friends and the buzz that develops in the marketplace As Newsweek recently proclaimed Buzz greases the great conveyor belt of culture and commerce moving everything from movies to fashions of the body and mind faster and faster In *The Anatomy of Buzz* former marketing VP Emanuel Rosen pinpoints the products and services that benefit the most from buzz a universe that embraces everything from high tech equipment to books various consumer and entertainment products to legal and other support services and offers specific strategies for creating and sustaining effective word of mouth campaigns Drawing from interviews with more than 150 executives marketing leaders and researchers who have successfully built buzz for major brands Rosen describes the ins and outs of attracting the attention of influential first users and big mouth movers and shakers He also discusses proven techniques for stimulating customer to customer selling including how companies can spread the word to new territories by taking advantage of customer hubs and networks on the Internet and elsewhere Recent surveys show that 58 percent of young people rely to some extent on others when selecting a car 53 percent of moviegoers follow the recommendations of friends and 65 percent of the people who bought a Palm organizer were inspired by the enthusiasm of others With *The Anatomy of Buzz* business leaders have what they need to start the buzz and reignite excitement about a product or service stalled in a holding pattern or launch a new product into the stratosphere
