Simon,2017-06-26 Based on a seventeen year study of the Australian energy industry and via the lens of Niklas Luhmann s systems theory Meta Regulation in Practice argues that normative meta regulatory theory relies on unrealistic assumptions of stakeholder morality and rationality Meta regulation in practice appears to be most challenged in a complex and contested environment the very environment it is supposed to serve best **The Regulation of Services and Intellectual Property** BryanC. Mercurio,2017-07-05 International rules on trade in services and intellectual property are new additions to the multilateral trading system but both have played an important role in the system since their entry Accompanied by a detailed introduction this volume contains essays which cover not only the law and jurisprudence of these topics but also the underlying economics and politics behind their incorporation into the multilateral system and continued prominence The volume provides readers with a comprehensive overview of the development of these controversial and increasingly important areas of international trade law **The Politics of Global Regulation** Walter Mattli,2009-05-17 Regulation by public and private organizations can be hijacked by special interests or small groups of powerful firms and nowhere is this easier than at the global level This

is the first book to examine systematically how and why such hijacking or regulatory capture happens and how it can be averted P iv of cover Federal Coal Leasing Policies and Regulations David M. Lindahl, Duane A. Thompson, 1978 An Introduction to Law and Regulation Bronwen Morgan, Karen Yeung, 2007-04-12 In recent years regulation has emerged as one of the most distinct and important fields of study in the social sciences both for policy makers and for scholars who require a theoretical framework that can be applied to any social sector This timely textbook provides a conceptual map of the field and an accessible and critical introduction to the subject Morgan and Yeung set out a diverse and stimulating selection of materials and give them context with a comprehensive and critical commentary By adopting an interdisciplinary approach and emphasising the role of law in its broader social and political context it will be an invaluable tool for the student coming to regulation for the first time This clearly structured academically rigorous title with a contextualised perspective is essential reading for all students of the subject Administrative Law in a Global Era Alfred C. Aman, Jr., 2019-06-07 Alfred C Aman here examines how the U S public law system has adapted to change and how the regulatory structures and discourses of the past are being transformed by the global realities of the present Tracing the evolution of administrative law during the regulatory eras of the New Deal and the environmental period of the 1960s and 70s as well as the current global deregulatory era beginning with the Reagan presidency he illuminates key trends in the interpretation of constitutional and administrative law In the course of examining important shifts in administrative law Aman provides insights into the process of legal change and the discourses that shape our legal order He also considers why such issues as the constitutionality of administrative agencies once again are serious legal concerns and he assesses the trend toward increasing executive power over federal administrative agencies This timely book will be welcomed by legal scholars political scientists American historians policymakers and other readers interested in the history and future of administrative law and international and domestic environmental regulation Amendments to the Communications Act of 1934 United States. Regulation, Governance and Convergence in the Media Peter Humphreys, Seamus Simpson, 2018-08-31 Media convergence is often propounded as inevitable and ongoing Yet much of the governance of the media sector s key parts has developed along discrete evolutionary paths mostly incremental in character This volume breaks new ground through exploring a diverse range of topics at the heart of the media convergence governance debate such as next generation networks spectrum copyright and media subsidies It shows how reluctance to accommodate non market based policy solutions creates conflicts and problems resulting in only shallow media convergence thus far **Federal Register**, 2013-02

Universal Service in WTO and EU law Olga Batura, 2015-10-07 This book is a systematic comparative study of WTO and EU law relevant for universal service provision and a timely contribution to the ongoing scholarly and policy debates about the concept and scope of universal service Universal service is one of the most significant regulatory issues worldwide and it

is likely to remain so The central question dealt with by the author is how the technologically intensive sector of telecommunications services can be regulated in a socially fair way in the light of liberalisation and the immense importance of ICTs in the Information Society The author investigates whether the legal frameworks of WTO and EU can meet the challenges of the rapid and dramatic technological and social change and formulates relevant policy recommendations The book is of interest to both scholars and practitioners in several disciplines such as EU and WTO law telecommunications law and regulation political science regarding market regulation and governance as well as European integration and WTO Olga Batura is affiliated to the Leuphana Law School University of L neburg Germany and to the European Humanities University in Vilnius Lithuania

Rome Convention - Rome I Regulation Alexander J. Belohlávek, 2011-01-01 As of 17 December 2010 the Rome I Regulation EU Regulation 593/2008 on the law applicable to contractual obligations is directly applicable in all EU Member States with the exception of Denmark The Rome I Regulation replaces the Rome Convention of 1980 in the EU Member States and will apply to all contracts concluded as of 17 December 2010 However and herein lies the utility and great importance of this work the Rome Convention and the Rome I Regulation will be applied in parallel for a significant time to come the author himself anticipates a ten to fifteen year period in the latter case to contracts made after 17

December 2010 This is why this commentary takes into account both sources of law in their mutual interaction and broader context The comprehensiveness of the Rome Convention Rome I Regulation is clearly apparent but one of the great achievements of the author is his amassing of over 1 800 judicial decisions most of which are furnished with a detailed commentary where these decisions apply national laws the latter are cited both in the original and in translation For a number of rulings the commentary include not only a case summary of the facts and an analysis of the conclusions drawn by the court but also takes them as models to hypothesize what conclusions would be reached if the Rome I Regulation were to be applied

professors and industry practitioners for years to come *The Political Economy of the Company* John Parkinson, Gavin Kelly, Andrew Gamble, 2001-03-30 Theoretical writing on the company and company law has been dominated in recent years by economics This collection of essays by a distinguished team of authors drawn from a variety of disciplines seeks to build on the insights of this economic analysis and broaden understanding by examining the company in a wider historical legal political and sociological context Issues discussed include the attitudes of political parties in the UK to the company the rise of the non executive director institutional activism and stakeholder protection and the evolution of the nexus of contracts theory of the company There is also a strong comparative theme with discussions of the political and sociological context of corporate governance in France Germany and Japan together with developments at the European level **Code of Federal Regulations, Title 18, Conservation of Power and Water Resources** ,2011-06-06 **Climate Change and Political Strategy** Hugh Compston, 2013-09-13 Although the science of climate change is well established and there are well known policy instruments that could significantly reduce greenhouse gas GHG emissions without prohibitive economic costs political obstacles to more determined action remain despite heightened concern among mainstream politicians and the public This book analyses the political dynamics of climate policy in affluent democracies from a number of different theoretical angles in order to improve our understanding of which political strategies would be likely to enable national governments to make deep cuts in GHG emissions while avoiding significant political damage The authors argue that different conceptual and logical theories highlight different features of political situations Describing the politics of climate policy in this way will result in different conceptual logical views of this phenomenon And to some extent the inferences drawn from such differing views about the nature of political obstacles to more vigorous action on climate change and the best ways of overcoming them will also be different Singly and together these analyses reveal a more detailed nuanced view of the political options open to activist governments This book was previously published as a special issue of Environmental Politics Innovative Infrastructure Financing through Value Capture in Indonesia Asian Development Bank, 2021-05-01 Indonesia needs significant additional infrastructure investment to sustain its economic growth However the COVID 19 pandemic has further limited the fiscal space of the government This report proposes a new method to increase infrastructure investment based on the concept of value capture The report studies how Indonesia s existing policies and regulations can be used to build a value capture framework that ensures the maximization of the social economic and environmental value of infrastructure investments The framework focuses on strategies to deliver infrastructure projects that create greater value and at the same time generate funding for up front investment
