## **Regulatory Realities The Implementation And Impact Of Industrial Environmental Regulation:**

**Regulatory Realities** Andrew Gouldson, Joseph Murphy, 2013-11-05 Arguing that the performance of industrial environmental regulation is determined by the level and nature of the innovation it stimulates this text aims to analyze the influence of different structures and styles of implementation on innovation in regulated companies Further aims include examining the economic and environmental performance of different forms of innovation developed and applied by industry in response to regulation describing the conditions under which industrial environmental regulation can be improved outlining the implementation approaches required for regulated companies to overcome barriers which prevent them from exploiting the economic and environmental potential of particular forms of innovation demonstrating how technological and organizational change could lead to lower costs and higher benefits from regulatory compliance and putting forward to governments and industry proposals to improve the relationship between environmental protection and industrial competitiveness

**The New Environmental Regulation** Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in The New Environmental Regulation that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses

*Corporate Criminal Liability in Environmental Jurisprudence* Indrajit Dube, Mia Mahmudur Rahim, 2025-09-08 Environmental jurisprudence is a dynamic field that integrates insights from various disciplines including basic sciences earth science economics and law At its core this discipline emphasizes the importance of enforcing rights as environmental pollution poses significant threats to individuals and society as a whole The repercussions of pollution are not confined to the immediate vicinity they can reverberate across vast regions and impact countless future generations

Addressing pollution as a wrong or crime demands a nuanced understanding of the law making the study of environmental jurisprudence essential. This book explores corporate polluter liability within the framework of environmental jurisprudence. While protective measures for the environment have been embedded in various statutes since the early 20th century, the notion of environmental jurisprudence has only recently come to the forefront of legal discourse. This field is crucial for safeguarding the natural and legal rights of individuals, communities, and the state. With a comprehensive approach that encompasses both national and international dimensions, this book critically engages with the foundational concepts of environmental jurisprudence, exposing the rampant environmental violations perpetrated by corporations and outlining how these entities can be held accountable within regulatory frameworks. Furthermore, it provides a thorough analysis of essential international instruments aimed at combatting corporate-induced environmental degradation, offering recommendations to elevate corporate criminal liability within the realm of environmental jurisprudence scholarship. Highlighting the urgent need for accountability but also inspiring action toward a sustainable future, this book will interest legal scholars researching on criminal liability and environmental law.

*Ahead of the Curve* K. Green, P. Groenewegen, P.S. Hofman, 2012-12-06

The debate on sustainable production often ends in discussions on the feasibility of far-reaching changes in relation to the competitiveness of companies. Industry itself and policy makers tend to back away from engaging in profound processes of industrial transformation. Examples of companies who have voluntarily moved beyond what is seen as reasonable and feasible can overcome this deadlock. This book collects a fine sample of companies who have taken up their responsibility in this respect. To quote the editors of this book: They are cases that might provide other firms and policy makers with ideas for innovative environmental responses that are outside the slowly rising trend of improvement that we are currently observing. In short, the cases are of firms and ideas that are ahead of the curve. The editors and many of the authors of this volume are members of the Greening of Industry Network and have been debating with one another for years. Founded in 1991, the Greening of Industry Network comprises over 1500 individuals representing academia, business, public interest, labor, and government from more than 50 countries. Participants work together to build policies and strategies toward creating a sustainable future through many vehicles: coordinating research efforts, publications, planning, and participating in workshops, public forums, and conferences. To provide benefit to broader society, the Network stimulates public dialogue and brings together academic researchers from many disciplines with other stakeholders who traditionally do not work together in coalitions.

*Sustainability* Michael Redclift, 2002-02-07

Michael Redclift is a very big name in this area of study and well known for his previous work and publications. The book deals with most of the main components of sustainable development: health, economic policy, land use, ethics, and education. Covers both developed and developing countries. Many books on sustainable development just cover developing. Written by a multi-disciplinary team of contributors from an interdisciplinary department: geographers, economists, lawyers, and sociologists. Topic of sustainability has enjoyed increasing popularity over

the last 5 years or so and many of the already published volumes are now out of date

#### **Rationality in Environmental Planning**

Yvonne Rydin, 2003-02-20 We all now recognize the importance of talk today In policy settings there are more and more calls for consultation collaboration and deliberation This is particularly the case in environmental planning with its disputes over genetically modified organisms power plants and new roads Rydin provides an in depth and fully theorized account of the role of talk or discourse within environmental planning combining theory reported research and original empirical case studies She highlights the problem that planners and others face when trying to expand the space for talk within planning situations and provides a detailed assessment of the prospects for consensus building and deliberative democracy She also highlights the role that discourse plays in legitimizing institutions of planning and discusses how a rationality of sustainable development may be embedded within new institutional arrangements

*Environmental Politics in Southern Europe* K. Eder, M. Kousis, 2012-12-06 Europe is sometimes credited with a polis but not a demos Political integration and economic globalisation cannot diminish local identity and social memories This fascinating collection of national case studies shows why there will always be a local demos located in ecology economy and society But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability Long may it triumph

Tim O Riordan CSERGE University of East Anglia The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies economies and societies of European countries Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters the authors contribute to a different understanding of the North South divide in the process of European integration

Angela Liberatore European Commission Directorate General for Research This is a self consciously revisionist volume whose findings are theoretically significant policy relevant and timely Its insistence on bringing society back in its debunking of the notion of a Mediterranean syndrome its emphasis on developmental leapfrogging capacity of late comers to emerge as leaders in contexts of late modernity and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy makers concerned with collective action

#### **Implementing European Environmental Policy**

Matthieu Glachant, 2001-12-21 This significant book investigates the political economy of environmental policy in Europe with a careful analysis of how EU directives are realised in the member states The authors explore this issue through a comparative evaluation of the implementation of three pieces of EU environmental legislation in France Germany the Netherlands and the UK Areas covered by the legislation include air emission standards for waste incinerators the electricity supply industry and the certification of environmental management systems The results vary across cases even though overcompliance is observed in certain cases The regularity arising from the different case studies is related to the determinants of the environmental outcomes that are observed When environmental directives are implemented they are likely to interact with parallel policy

processes and these interactions can exert a strong positive or negative influence on the success of the policy in question. The central policy problem is the fact that these interactions are very difficult to anticipate at the policy formulation stage. It leads the authors to propose that effective environmental policy should therefore be adaptable in order to cope with these unanticipated effects.

**Ecosociology Sources. Series: «Ecosociology»** I. Kulyasov, 2017-12-13. In the book, the theoretical sources and the development of ecosociology are covered. It covers a broad range of environmental issues designed for ecosocialism graduate and undergraduate students, ecologists, ecopolitical and embezzlement.

**Corporate Social Responsibility** Baxi C.V. & Ray, Rupamanjari Sinha, 2012. Corporate Social Responsibility: A Study of CSR Practices in Indian Industry takes a close look at the CSR scenario in India. While throwing light on the various issues faced by companies and their stakeholders during the implementation of CSR, it also offers strategies and recommendations for improved synergy among the stakeholders and a more effective CSR. The book is based on the authors' primary research study and is illustrated with various company examples and primary surveys on how CSR implementation varies from organization to organization, including family-based firms, public sector enterprises, multinational corporations, and professional enterprises. Sectoral differences in CSR implementation have also been covered, as well as the important issue of CSR reporting practices. With CSR and sustainability as emerging domains, the book will prove to be invaluable for researchers, academicians, students, practitioners, and public policy makers.

**The Handbook of Environmental Voluntary Agreements** Edoardo Croci, 2005-10-06. EDOARDO CROCI, IEFE, Università Bocconi, Milano, Italy. Voluntary approaches in environmental policy represent a third wave of regulation in the environmental field. Command and control was the first wave; its core is based on uniform emission standards, the respect of which needs to be enforced through extensive monitoring and severe sanctions. The expected cost of sanction for non-compliance, calculated as its amount multiplied for the probability to be caught, must be superior to the benefits of non-compliance in order to let the sanction be effective. As the benefits of non-compliance can vary among firms, sanctions need to be very high in order to be effective. In fact, sanctions are ordinarily correlated to environmental damage and not to the benefits of non-compliance. But very high sanctions can be difficult to enforce as they appear unfair and can lead to dramatic consequences on firms and workers, up to shut-downs of plants. Ambient standards reduce these problems but oblige the regulator to know a huge amount of information regarding the specific contribution of each polluter to the polluted body. Information is difficult to obtain because of asymmetric information and costly to produce because it requires large and skilled regulating and enforcing organizations. Nevertheless, complex regulation is the base of any environmental policy framework as it allows the policy maker to fully exercise its power of composition of various interests in a relatively transparent way. Economic instruments were the second wave.

**Green Supply Chain Management for Sustainable Business Practice** Khan, Mehmood, Hussain, Matloub, Ajmal, Mian M., 2016-07-27. The issue of sustainability has become a vital discussion in many industries within the public and private sectors. In the business realm, incorporating such

practices allows organizations to re design their operations more effectively Green Supply Chain Management for Sustainable Business Practice examines the challenges and benefits of implementing sustainability into the core functions of contemporary enterprises focusing on how green approaches improve operations in an ecological way Highlighting key concepts emerging innovations and future directions this book is a pivotal reference source for professionals managers educators and upper level students Climate Change and the Governance of Corporations Rory Sullivan,Andy Gouldson,2020-09-30 Climate change represents the most important environmental challenge of our time Organisations are responding by implementing governance processes and taking action to reduce their own emissions and the emissions from their supply chains and value chains Yet very little is known about how these efforts contribute to reducing greenhouse gas emissions if indeed they make any substantive contribution at all or about how they might be harnessed to deliver more ambitious reductions in emissions This book explains when and where particular forms of governance intervention including internal governance processes and external governance pressures are likely to impact climate change From this analysis it offers practical proposals on the climate policy frameworks that need to be in place to facilitate or accelerate changes in corporate behaviour The book is truly global it focuses on the world s 25 largest retailers including Walmart Tesco Carrefour Sears and Aldi and is based on detailed interviews with senior managers from these corporations and with key global and national NGOs corporate responsibility experts politicians and regulators These interviews provide clear insights into how external governance pressures and actions public opinion regulation incentives interact with internal governance conditions management systems and processes corporate policies board CEO leadership to change and shape corporate actions on climate change and in turn the climate change impacts of these corporations This book can be used as a core reference for any courses dealing with corporate governance and business strategy in particular those relating to climate change and to environmental management more generally It is also of relevance to business practitioners public policy makers investors and NGOs interested in ensuring that companies play a constructive role in the transition to a low carbon economy

Empires of Sustainability Joseph Murphy,2024-06-07 Focussing on the greening of imperialisms and empires Empires of Sustainability analyses the shift around the world from denial of the environmental crisis to action to prevent catastrophe and the resulting implications Evidence of this shift is clear in widespread and purposeful social change which is gathering momentum The book explains how globalisation accelerated us towards the crisis and today even as its own legitimacy is being questioned is evolving through solutions and responses to it Looking ahead and as the environmental crisis worsens two possible futures are discerned and explored One is that through universal actions to save the planet shaped by interweaving political and economic forces the hegemony of globalisation is restored albeit in a green form The other is that the world reorganises into competing spheres of influence with politics economics and the environment interwoven differently in each case In these ways we face the prospect of one or more Empires of Sustainability emerging over the

decades ahead unless we build a better alternative society The author presents an alternative a more diverse World of Caring Places This accessible book will appeal to students and scholars of international political economy sustainability and environmental studies and analysts policy makers campaigners and others concerned about the future of relations between people and planet      *Towards Environmental Innovation Systems* K. Matthias Weber,Jens Hemmelskamp,2005-02-11 Here is a dialog among worldwide experts across disciplines concerning theoretical frameworks and practical experiences to guide research and policy towards environmental innovation systems The contributors explore new directions of research at the border of two research traditions systems of innovation and environmental innovations The text examines the four main components of environmental innovation systems conceptual foundations empirical experiences strategic approaches and experiences with policy instruments
