Reification Or The Anxiety:

Reification, Or, The Anxiety of Late Capitalism Timothy Bewes, 2002 The concept of reification helps describe the effects of capitalism on the human world The Global Political Economy of Intellectual Property Rights, 2nd ed Christopher May, 2015-04-10 The first edition established itself as one of the leading books to situate the issue of intellectual property within the discipline of International Political Economy IPE Since its publication intellectual property has continued to rise up the global agenda reflecting expanding interest in the area among policy makers and advocacy groups linked to the increasingly fraught politics of the global governance of IPRs Significantly revised and updated to take account of developments within the World Trade Organization and the World Intellectual Property Organization this edition incorporates the author's recent research on IPRs It retains the theoretical and analytical elements of the first edition whilst offering students and researchers a detailed analysis of how intellectual property is politically constructed and how it is linked to the economics of knowledge and information in the contemporary global political economy Rapidly developing issues addressed in the work include arguments around the implementation of the Agreement on Trade Related Aspects of IPRs TRIPs the WIPO Development agenda and the resistance to socialization programmes the AIDS crisis and the pharmaceutical industry Digital Rights Management This book will be of interest to students and researchers of international political economy international relations and intellectual property law *The Carol J. Adams Reader* Carol J. Adams, 2016-10-06 The Carol J Adams Reader gathers together Adams's foundational and recent articles in the fields of critical studies animal studies media studies vegan studies ecofeminism and feminism as well as relevant interviews and conversations in which Adams identifies key concepts and new developments in her decades long work This volume a companion to *The Sexual Politics of Meat* Bloomsbury Revelations offers insight into a variety of urgent issues for our contemporary world Why do batterers harm animals What is the relationship between genocide and attitudes toward other animals How do activism and theory feed each other How do race gender and species categories interact in strengthening oppressive attitudes In clear language Adams identifies the often hidden aspects of cultural presumptions The essays and conversations found here capture the decades long energy and vision that continue to shape new ways of thinking about and responding to oppression The Global Political Economy of Intellectual Property Rights Christopher May, 2010 The first edition established itself as one of the leading books to situate the issue of intellectual property within the discipline of International Political Economy IPE Since its publication intellectual property has continued to rise up the global agenda reflecting expanding interest in the area among policy makers and advocacy groups linked to the increasingly fraught politics of the global governance of IPRs Significantly revised and updated to take account of developments within the World Trade Organization and the World Intellectual Property Organization this edition incorporate *The Politics of Recognition in the Age of Digital Spaces* Benjamin JJ Carpenter, 2023-09-15 This book provides a philosophical analysis of the notion of selfhood

that underlies identity politics It offers a unique theory of the self that combines previous scholarly work on recognition and the phenomenology of space The politics of identity occupy the centre of a contested terrain Marginalised and oppressed peoples continue to seek the transformation of our shared social world and our political institutions required for their lives to be liveable Public criticism and academic treatments of identity politics often take a disparaging view that treats it as subordinate to more general political questions about justice and the organisation of society and its institutions This book argues that these polemics ignore the numerous ways in which all politics is concerned with matters of selfhood and identity Through a rereading of Hegel s account of recognition as an ongoing and dynamic process that constitutes the self it presents selves and the categories of identity that qualify these selves as fundamentally conditioned by the environments in which they appear before themselves and others It also argues that we do the work of identity in public spaces particularly digital spaces and that these spaces shape what identities we can assume and what those identities mean Contemporary social media technologies facilitate the production of particular forms of selfhood through the combined logics of the interface the profile and the post The Politics of Recognition in the Age of Digital Spaces will be of interest to scholars and advanced students working in a wide range of disciplines including political philosophy phenomenology philosophy of technology sociology political theory and critical theory It will also appeal to anyone with an interest in contemporary identity politics whether as a matter of study or lived experience

Reading the Difficulties Thomas Fink, Judith Halden-Sullivan, 2014-02-28 Definitions of what constitutes innovative poetry are innumerable and are offered from every quarter Some critics and poets argue that innovative poetry concerns free association John Ashbery others that experimental poetry is a re staging of language Bruce Andrews or a syntactic and cognitive break with the past Ron Silliman and Lyn Hejinian The tenets of new poetry abound But what of the new reading that such poetry demands The essays in Reading the Difficulties offer case studies in and strategies for reading innovative poetry They allow readers to interact with verse that deliberately removes many of the comfortable cues to comprehension poetry that is frequently non narrative non representational and indeterminate in subject theme or message Book jacket

Reading Capitalist Realism Leigh Claire La Berge, 2014-04-01 As the world has been reshaped since the 1970s by economic globalization neoliberalism and financialization writers and artists have addressed the problem of representing the economy with a new sense of political urgency Anxieties over who controls capitalism have thus been translated into demands upon literature art and mass media to develop strategies of representation that can account for capitalism s power Reading Capitalist Realism presents some of the latest and most sophisticated approaches to the question of the relation between capitalism and narrative form partly by questioning how the realism of austerity privatization and wealth protection relate to the realism of narrative and cultural production Even as critics have sought to locate a new aesthetic mode that might consider and move beyond theorizations of the postmodern this volume contends that narrative realism demands renewed scrutiny for its ability to represent capitalism s latest scenes of enclosure and indebtedness Ranging across fiction nonfiction television and film the essays collected here explore to what extent realism is equipped to comprehend and historicize our contemporary economic moment and what might be the influence or complicity of the literary in shaping the global politics of lowered expectations Including essays on writers such as Mohsin Hamid Lorrie Moore Jess Walter J M Coetzee James Kelman Ali Smith Russell Banks William Vollmann and William Gibson as well as examinations of Hollywood film productions and The Wire television series Reading Capitalist Realism calls attention to a resurgence of realisms across narrative genres and questions realism s ability to interrogate the crisis driven logic of political and economic common sense

Shocks Myka Tucker-Abramson, 2018-12-04 Throughout the 1950s a coalition of developers politicians and planners bulldozed vast areas of land deemed slums or blighted to make way for freeways public and private housing projects cultural centers and skyscrapers While the program was national New York was ground zero and the demolition and monumental reconstruction of the city created a distinctive urban sensorium rooted in the new segregated landscapes of prosperous white private space and poor black public space Novel Shocks situates these landscapes at the center of the midcentury novel arguing that James Baldwin Ralph Ellison Patricia Highsmith Ayn Rand William Burroughs Sylvia Plath and Warren Miller all registered these new urban spaces as traumatic shocks that required new aesthetic forms Rejecting older shock based modernisms these novelists forged a new modernism which reimagined shock as a therapeutic force that would create a more flexible self reliant and resilient subject that would nourish neoliberalism's roots In offering a cultural prehistory of neoliberalism Novel Shocks resituates the Cold War novel as a key archive for understanding neoliberalism's emergence and offers a more materialist and historically grounded account of neoliberalism's subjective affective and ideological structures

Misrecognitions Ben Parker, 2024-03-15 *Misrecognitions* mounts a vigorous defense of the labyrinthine plotting of Victorian novels notorious for their implausible concluding revelations and coincidences Critics have long decried Victorian recognition scenes the reunions and retroactive discoveries of identity that too conveniently bring the story to a close as regrettable contrivances Ben Parker counters this view by showing how these recognition scenes offer a critique of the social and economic misrecognitions at work in nineteenth century capitalism Through a meticulous analysis of novels by Charles Dickens Anthony Trollope and Henry James as well as Arthur Conan Doyle's Sherlock Holmes stories *Misrecognitions* tracks how the Victorian novel translates the financialized abstractions of capital into dramas of buried secrets and disguised relations Drawing on Karl Marx's account of commodity fetishism and reification Parker contends that by configuring capital as an enigma to be unveiled Victorian recognition scenes dramatize the inversions of agency and temporality that are

repressed in capitalist production In plotting capital as an agent of opacity and misdirection Victorian novels and their characteristic dialectic of illusion and illumination reveal the plot hole in capitalism itself **Fictions of Finance at the End of an American Century** Richard Godden,2023 Addressing the emergence and decline of US Fordism this volume examines how an economy determines the language of those who live among its imperatives It studies how the complexities of words and their histories derive from and register the organizing contradictions of an industrial economy and of its failure

Speech, Print and Decorum in Britain, 1600--1750 Elspeth Jajdelska,2016-03-10 Filling an important gap in the history of print and reading Elspeth Jajdelska offers a new account of the changing relationship between speech rank and writing from 1600 to 1750 Jajdelska draws on anthropological findings to shed light on the different ways that speech was understood to relate to writing across the period bringing together status and speech literary and verbal decorum readership the material text and performance Jajdelska s ambitious array of sources includes letters diaries paratexts and genres from cookery books to philosophical discourses She looks at authors ranging from John Donne to Jonathan Swift alongside the writings of anonymous merchants apothecaries and romance authors Jajdelska argues that Renaissance readers were likely to approach written and printed documents less as utterances in their own right and more as representations of past speech or as scripts for future speech In the latter part of the seventeenth century however some readers were treating books as proxies for the author s speech rather than as representations of it These adjustments in the way speech and print were understood had implications for changes in decorum as the inhibitions placed on lower ranking authors in the Renaissance gave way to increasingly open social networks at the start of the eighteenth century As a result authors from the lower ranks could now publish on topics formerly reserved for the more privileged While this apparently egalitarian development did not result in imagined communities that transcended class readers of all ranks did encounter new models of reading and writing and were empowered to engage legitimately in the gentlemanly criticism that had once been the reserve of the cultural elites Shortlisted for the European Society for the Study of English ESSE book prize 2018 *Encyclopedia of Criminal Justice Ethics* Bruce A. Arrigo,2014-07-17 Federal state county and municipal police forces all have their own codes of conduct yet the ethics of being a police officer remain perplexing and are often difficult to apply in dynamic situations The police misconduct statistics are staggering and indicate that excessive use of force comprises almost a quarter of misconduct cases with sexual harassment fraud theft and false arrest being the next most prevalent factors The ethical issues and dilemmas in criminal justice also reach deep into the legal professions the structure and administration of justice in society and the personal characteristics of those in the criminal justice professions The *Encyclopedia of Criminal Justice Ethics* includes A to Z entries by experts in the field that explore the scope of ethical decision making and behaviors within the spheres of criminal justice systems including policing corrections courts forensic science and policy analysis and research This two volume set is available in both print and electronic formats Features Entries are authored and signed by experts in the field
