Stuart Chapin III,Robert L. Jefferies,James F. Reynolds,Gaius R. Shaver,Josef Svoboda,Ellen W. Chu,2012-12-02 The arctic region is predicted to experience the earliest and most pronounced global warming response to human induced climatic change This book synthesizes information on the physiological ecology of arctic plants discusses how physiological processes influence ecosystem processes and explores how climate warming will affect arctic plants plant communities and ecosystem processes Reviews the physiological ecology of arctic plants Explores biotic controls over community and ecosystems processes Provides physiological bases for predicting how the Arctic will respond to global climate change Wildlife Production Systems Robert J. Hudson,K. R. Drew,L. M. Baskin,1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role **The Making of an Ecologist** David R. Klein,2019-07-15 This is an innovative and collaborative life history of one of Alaska s pioneering wildlife biologists David R Klein has been a leader in promoting habitat studies across wildlife research in Alaska and this is his first hand account of how science and biological fieldwork has been carried out in Alaska in the last sixty years This book tells the stories of how Klein did his science and the inspiration behind the research while exposing the thinking that underlies particular scientific theories In addition this book shows the evolution of Alaska s wildlife management regimes from territorial days to statehood to the era of big oil The first portion of the book is comprised of stories from Klein s life collected during oral history interviews while the latter section contains essays written by Klein about philosophical topics of importance to him such as eco philosophy the definition of wilderness and the morality of hunting Many of Klein s graduate students have gone on to become successful wildlife managers themselves in Alaska and around the globe Through *The Making of an Ecologist* Klein s

Anderson, Mark Nuttall, 2004 In the last two decades there has been an increased awareness of the traditions and issues that link aboriginal people across the circumpolar North One of the key aspects of the lives of circumpolar peoples be they in Scandinavia Alaska Russia or Canada is their relationship to the wild animals that support them Although divided for most of the 20th Century by various national trading blocks and the Cold War aboriginal people in each region share common stories about the various capitalist and socialist states that claimed control over their lands and animals Now aboriginal peoples throughout the region are reclaiming their rights This volume is the first to give a well rounded portrait of wildlife management aboriginal rights and politics in the circumpolar north The book reveals unexpected continuities between socialist and capitalist ecological styles as well as addressing the problems facing a new era of cultural exchanges between aboriginal peoples in each region **Nordic Perspectives on the Responsible Development of the Arctic: Pathways to Action** Douglas C. Nord, 2020-10-30 This book investigates the multifaceted nature of change in today's Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to facilitate this process of scientific inquiry and policy articulation The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking as evolved The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management the revitalization resource dependent communities the emergence of new climate born diseases and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience building Major discoveries and insights arising from these and other efforts are detailed and possible policy implications considered The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co production of knowledge regarding the region The volume discusses how such research findings can be best communicated and shared between scientists policymakers and northern residents It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public Only when this bridge building effort is undertaken can true pathways to action be established Mountain Area Research and Management Martin F. Price, 2013 This book brings together scientists and practitioners from five continents to present their experience in undertaking activities that contribute to our understanding and informed management of mountain areas In

particular they address the challenges of working in interdisciplinary teams and of effectively involving stakeholders The result is a powerful book that integrates research from different disciplines in the natural and social sciences and in some cases indigenous knowledge to address the question of how knowledge is gained about mountain areas and how can it be integrated and used in effective management A comprehensive introduction covers the challenges in mountain area research and management and the need for integrated approaches This is followed by chapters that look at key areas of mountain research and management over the past 25 years covering inter and trans disciplinary research subsistence cultures and sustainable development innovations in watershed management and biodiversity conservation Subsequent chapters cover key areas of research and management on five continents with a focus on comparison of common challenges and solutions across regions The concluding chapter brings these experiences together Published with Parks Canada
