Reinventing Revolution:

Reinventing Revolution Tim Jordan, 1994 This text discusses social movements and socialist politics It looks at the changing face of socialist politics examining the concepts of difference value and emancipatory political processes **Social Movements in India** Raka Ray, Mary Fainsod Katzenstein, 2005-03-25 Social movements have played a vital role in Indian politics since well before the inception of India as a new nation in 1947 During the Nehruvian era poverty alleviation was a foundational standard against which policy proposals and political claims were measured at this time movement activism was directly accountable to this state discourse In the first volume to focus on poverty and class in its analysis of social movements a group of leading India scholars shows how social movements have had to change because poverty reduction no longer serves its earlier role as a political template With distinctive chapters on gender lower castes environment the Hindu Right Kerala labor farmers and biotechnology Social Movements in India will be attractive to students and researchers in many different disciplines **Decolonizing Anarchism** Maia Ramnath, 2012-01-01 Decolonizing Anarchism examines the history of South Asian struggles against colonialism and neocolonialism highlighting lesser known dissidents as well as iconic figures What emerges is an alternate narrative of decolonization in which liberation is not defined by the achievement of a nation state Author Maia Ramnath suggests that the anarchist vision of an alternate society closely echoes the concept of total decolonization on the political economic social cultural and psychological planes Decolonizing Anarchism facilitates more than a reinterpretation of the history of anticolonialism it also supplies insight into the meaning of anarchism itself Praise for Decolonizing Anarchism Maia Ramnath offers a refreshingly different perspective on anticolonial movements in India not only by focusing on little remembered anarchist exiles such as Har Dayal Mukerji and Acharya but more important highlighting the persistent trend that sought to strengthen autonomous local communities against the modern nation state A superbly original book Partha Chatterjee author of Lineages of Political Society Studies in Post colonial Democracy Ramnath audaciously reframes the dominant narrative of Indian radicalism by detailing its explosive and ongoing symbiosis with decolonial anarchism Dylan Rodr guez author of Suspended Apocalypse White Supremacy Genocide and the Filipino Condition **Reinventing Revolution** Gail Omvedt, 1993 **New Critical Theory** William S. Wilkerson, Jeffrey Paris, 2001-11-19 New Critical Theory surveys contemporary leftist thought while introducing the tenets of this new form of critical theory Beginning with an exploration of the relationship between Marxism Habermas and the politics of identity William S Wilkerson and Jeffrey R Paris present a collection that critiques the globalization of capital The development of personality appears as subject to socialized standards in an age of global capitalism Only after scrutinizing the effects of such a system can liberation be found The essays within join Critical Theory with postmodern insights on language and subjectivity to provide a more comprehensive view of emancipatory social theory Through this and other reflections on critical race gender and queer theories Wilkerson and Paris emerge with an encompassing volume defining New Critical

Theory Revolutionary Cuba Luis Martínez-Fernández, 2014-09-16 This is the first book in more than three decades to offer a complete and chronological history of revolutionary Cuba including the years of rebellion that led to the revolution Beginning with Batista's coup in 1952 which catalyzed the rebels and bringing the reader to the present day transformations initiated by Raúl Castro Luis Martínez Fernández provides a balanced interpretive synthesis of the major topics of contemporary Cuban history Expertly weaving the myriad historic social and political forces that shaped the island nation during this period Martínez Fernández examines the circumstances that allowed the revolution to consolidate in the early 1960s the Soviet influence throughout the latter part of the Cold War and the struggle to survive the catastrophic Special Period of the 1990s after the collapse of the U S S R He tackles the island's chronic dependence on sugar production which started with the plantations centuries ago and continues to shape culture and society He analyzes the revolutionary pendulum that continues to swing between idealism and pragmatism focusing on its effects on the everyday lives of the Cuban people and bucking established trends in Cuban scholarship Martínez Fernández systematically integrates the Cuban diaspora into the larger discourse of the revolution Concise well written and accessible this book is an indispensable survey of the history and themes of the socialist revolution that forever changed Cuba and the world *Human Rights and Social Movements* Neil Stammers, 2009-04-20 This book champions social movements as one of the most influential agents that shape our conceptions of human rights It argues that human rights cannot be understood outside of the context of social movement struggles It explains how much of the literature on human rights has systematically obscured this link consequently distorting our understandings of human rights Neil Stammers shows how human rights can be understood He suggests that what he calls the paradox of institutionalisation can only be addressed through a recognition of the importance of human rights arising out of grassroots activism and through processes of institutional democratisation **Art and Postcapitalism** Dave Beech, 2019-10-20 Artistic labour was exemplary for Utopian Socialist theories of attractive labour and Marxist theories of nonalienated labour but the rise of the anti work movement and current theories of fully automated luxury communism have seen art topple from its privileged place within the left's political imaginary as the artist has been reconceived as a prototype of the precarious 24/7 worker Art and Postcapitalism argues that art remains essential for thinking about the intersection of labour capitalism and postcapitalism not insofar as it merges work and pleasure but as an example of noncapitalist production Reassessing the contemporary politics of work by revisiting debates about art technology and in the nineteenth and twentieth century Dave Beech challenges the aesthetics of labour in John Ruskin William Morris and Oscar Wilde with a value theory of the supersession of capitalism that sheds light on the anti work theory by Silvia Federici Andre Gorz Kathi Weeks and Maurizio Lazzarato as well as the technological Cockayne of Srnicek and Williams and Paul Mason Formulating a critique of contemporary postcapitalism and developing a new understanding of art and labour within the political project of the supersession of value production this book is essential for activists scholars and anyone

Rescuing History from the Nation Prasenjit

Duara, 1996-11-20 Prasenjit Duara offers the first systematic account of the relationship between the nation state nationalism and the concept of linear history Focusing primarily on China and including discussion of India Duara argues that many historians of postcolonial nation states have adopted a linear evolutionary history of the Enlightenment colonial model As a result they have written repressive exclusionary and incomplete accounts The backlash against such histories has resulted in

a tendency to view the past as largely constructed imagined or invented In this book Duara offers a way out of the impasse between constructionism and the evolving nation he redefines history as a series of multiple often conflicting narratives produced simultaneously at national local and transnational levels In a series of closely linked case studies he considers such examples as the very different histories produced by Chinese nationalist reformers and partisans of popular religions the conflicting narratives of statist nationalists and of advocates of federalism in early twentieth century China He demonstrates the necessity of incorporating contestation appropriation repression and the return of the repressed subject into any account of the past that will be meaningful to the present Duara demonstrates how to write histories that resist being pressed into the service of the national subject in its progress or stalled progress toward modernity **Toward a New Socialism**

Anatole Anton, Richard Schmitt, 2007-01-01 Toward a New Socialism offers a critical analysis of capitalism's failings and the imminent need for socialism as an alternative form of government This book demonstrates that capitalism is destructive and limiting to the many ongoing campaigns to increase freedom equality and security Dr Richard Schmitt joins with Dr Anatole Anton to compile a volume of essays exploring the benefits and consequences of a socialist system as an avenue of increased human solidarity and ethical principle The essays offer a new definition of socialism by investigating the theories and principles of socialism its influence on social institutions and its role in work dynamics Raising important and unavoidable questions for contemporary society Toward a New Socialism is a vital resource for scholars of political theory and the globalization movement as well as a necessary read for every citizen under capitalism **Chicanx Utopias** Luis

Alvarez, 2022-02-22 Amid the rise of neoliberalism globalization and movements for civil rights and global justice in the post World War II era Chicanxs in film music television and art weaponized culture to combat often oppressive economic and political conditions They envisioned utopias that even if never fully realized reimaged the world and linked seemingly disparate people and places In the latter half of the twentieth century Chicanx popular culture forged a politics of the possible and gave rise to utopian dreams that sprang from everyday experiences In Chicanx Utopias Luis Alvarez offers a broad study of these utopian visions from the 1950s to the 2000s Probing the film Salt of the Earth brown eyed soul music sitcoms poster art and borderlands reggae music he examines how Chicanx pop culture capable of both liberation and exploitation fostered interracial and transnational identities engaged social movements and produced varied utopian visions with divergent possibilities and limits Grounded in the theoretical frameworks of Walter Benjamin Stuart Hall and the Zapatista movement this book reveals how Chicanxs articulated pop cultural utopias to make sense of challenge and improve the worlds they inhabited **Dying Empire** Francis Shor, 2009-12-04 By the 1970s the global hegemony established by an

American Empire in the post World War II period faced increasing resistance abroad and contradictions at home Contextualizing that hegemony resistance and contradictions is the focus of Dying Empire Presenting a wide ranging synthesis of approaches the book attempts to shed light on the construction of and challenges to the military economic and

cultural imperial projects of the United States in the late 20th and early 21st centuries Opposing US imperialism and global domination Francis Shor combines academic and activist perspectives to analyze the crises endemic to empire and to propose a vision for the realization of another more socially just world The text incorporates the most recent critical discussions of US imperialism and globalization from above and below to illuminate the practices and possibilities for global resistance Offering insights into the political and cultural convulsions of recent decades whilst raising profound and compelling questions this book will be of interest to activists students and scholars of American political culture US foreign policy globalization imperialism international relations and social movements Contemporary Political Agency Bice

In Politics Sikata Banerjee, 2021-11-28 In theorizing about the link between violence and the politics of nationalism most scholars have rejected the idea that primordial hatred between different ethnic and or religious groups residing in close proximity will inevitably lead to conflict and the call for an ethnically religiously pure nation state Rather conflict tends to occur when humans manipulate social political economic and ideological factors to construct nationalist identities and movements The manipulation perspective is the underlying theoretical framework of *Warriors in Politics* which uses the Mumbai riots of December 1992 and January 1993 to analyze the brand of nationalism created and disseminated by the Indian political party Shiv Sena While the theoretical and empirical research of others is an important part of this study interviews conducted by the author when she lived in Mumbai during this tumultuous period as well as her own theorizing on the links among masculinity militarism and nationalism provide an analysis of the factors economic political and ideological that converge to transform the simmering discontent of the politics of nationalism into violent conflict Spaces of Contention Byron Miller, 2016-04-01 As social movements have become more complex geographers are increasingly studying the spatial dynamics of collective resistance and sociologists and political scientists increasingly analyzing the role of space

place and scale in contentious political activity Occupying a position at the intersection of these disciplinary developments this book brings together leading scholars to examine how social movements have employed spatial practices to respond to and shape changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology and Political Science Spaces of Contention provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space

Globalization and Postmodern Politics Roger Burbach, 2001-01-20 The book shows how wealth and power are concentrated in the hands of a transnational elite while ever increasing numbers of people are being marginalised Institutions such as the World Trade Organisation and the International Monetary Fund are intent upon exercising a new hegemony over individuals as the role of the traditional nation state is transformed At the centre of this power shift is a group of high tech robber barons who dominate the Information Age and exploit the technologies of globalisation for their own narrow interests Roger Burbach explores the rise of the new grass roots oppositional movements around the world Manifest in such diverse struggles as the uprising of the Zapatistas in Mexico and the battle of Seattle against the World Trade Organisation this new postmodern politics is de centred and has little interest in the old ideologies that dominated much of the twentieth century The final section of the book contextualises postmodern politics by drawing on contemporary examples The authors discuss the demise of socialist and protosocialist experiments in Chile Grenada Nicaragua and Cuba and the emergence of postmodern movements in Latin America The final two chapters take a specific look at the Zapatista movement and its significance for revolutionary struggles around the world
