Statehouse and Greenhouse Barry G. Rabe,2004-02-17 No environmental issue triggers such feelings of hopelessness as global climate change Many areas of the world including regions of the United States have experienced a wide range of unusually dramatic weather events recently Much climate change analysis forecasts horrors of biblical proportions such as massive floods habitat loss species loss and epidemics related to warmer weather Such accounts of impending disaster have helped trigger extreme reactions wherein some observers simply dismiss global climate change as at the very worst a minor inconvenience requiring modest adaptation It is perhaps no surprise therefore that an American federal government known for institutional gridlock has accomplished virtually nothing in this area in the last decade Policy inertia is not the story of this book however Statehouse and Greenhouse examines the surprising evolution of state level government policies on global climate change Environmental policy analyst Barry Rabe details a diverse set of innovative cases offering detailed analysis of state level policies designed to combat global warming The book explains why state innovation in global climate change has been relatively vigorous and why it has drawn so little attention thus far Rabe draws larger potential lessons from this recent flurry of American experience Statehouse and Greenhouse helps to move debate over global climate change from bombast to the realm of what is politically and technically feasible

Switching to Solar Bob Johnstone,2011-11-29 The looming threat of global warming may be the greatest challenge of the present generation Confronted by the potential of such a massive worldwide calamity the average citizen often wonders what he or she can do In this inspiring and optimistic story of a green revolution in the making veteran science and technology journalist Bob Johnstone shows how the unrelenting efforts of a small band of grassroots activists have discovered ways to make solar a practical retail energy solution The crucial driver for the adoption of solar energy has not been technology but policy Focusing on initiatives in Germany he describes the use of the feed in tariff as the most successful policy mechanism yet invented to spur on widespread deployment of solar energy Turning to California Johnstone reviews the efforts of policy

workers to create new schemes to make solar affordable at the municipal level. Pioneers in both tree hugging Berkeley and golf playing Palm Desert have united in common cause and other towns and cities are planning to follow suit. As with other emerging trends as California goes so goes the rest of the country. Concluding with a positive view of the future, Johnstone describes the creativity of many startups fueled by venture capital. Innovation is being applied to every part of the process from silicon production to financing and installation. The details may still be uncertain but there's no doubt that the solar revolution is underway.

Bob Johnstone, Melbourne, Australia, is the author of *Brilliant Shuji Nakamura and the Revolution in Lighting Technology*, *We Were Burning*, *Japanese Entrepreneurs and the Forging of the Electronic Age*, and *Never Mind the Laptops Kids Computers and the Transformation of Learning*. He has also contributed numerous articles on technology to *Forbes*, *Nature*, *New Scientist*, *MIT Technology Review*, *Wired*, and the *Far Eastern Economic Review*.

River City and Valley Life

Christopher J. Castaneda, Lee M.A. Simpson, 2013-12-09

Often referred to as the Big Tomato, Sacramento is a city whose makeup is significantly more complex than its agriculture-based sobriquet implies. In *River City and Valley Life*, seventeen contributors reveal the major transformations to the natural and built environment that have shaped Sacramento and its suburbs, residents, politics, and economics throughout its history. The site that would become Sacramento was settled in 1839 when Johann Augustus Sutter attempted to convert his Mexican land grant into New Helvetia or New Switzerland. It was at Sutter's sawmill, fifty miles to the east, that gold was first discovered, leading to the California Gold Rush of 1849. Nearly overnight, Sacramento became a boomtown, and cityhood followed in 1850. Ideally situated at the confluence of the American and Sacramento Rivers, the city was connected by waterway to San Francisco and the surrounding region. Combined with the area's warm and sunny climate, the rivers provided the necessary water supply for agriculture to flourish. The devastation wrought by floods and cholera, however, took a huge toll on early populations and led to the construction of an extensive levee system that raised the downtown street level to combat flooding. Great fortune came when local entrepreneurs built the Central Pacific Railroad, and in 1869 it connected with the Union Pacific Railroad to form the first transcontinental passage. Sacramento soon became an industrial hub and major food processing center. By 1879 it was named the state capital and seat of government. In the twentieth century, the Sacramento area benefitted from the federal government's major investment in the construction and operation of three military bases and other regional public works projects. Rapid suburbanization followed along with the building of highways, bridges, schools, parks, hydroelectric dams, and the Rancho Seco nuclear power plant, which activists would later shut down. Today, several tribal gaming resorts attract patrons to the area, while Old Sacramento revitalizes the original downtown as it celebrates Sacramento's pioneering past. This environmental history of Sacramento provides a compelling case study of urban and suburban development in California and the American West. As the contributors show, Sacramento has seen its landscape both ravaged and reborn. As blighted areas, rail yards, and riverfronts have been reclaimed and parks and green spaces created and expanded, Sacramento's

identity continues to evolve As it moves beyond its Gold Rush Transcontinental Railroad and government town heritage Sacramento remains a city and region deeply rooted in its natural environment *Energy and Water Development Appropriations for 1997: Department of Energy fiscal year 1997 budget justifications* United States.
