Reinventing Ourselves Barbara Leigh Smith, John McCann, 2001-01-15 Reinventing Ourselves examines the experiences and lessons from over 20 different institutions pioneering new approaches for more effective teaching and learning. Many of the colleges included in this volume began as both educational and social experiments representing new ways of thinking about educational goals, curricular organization, institutional governance, and faculty roles and rewards. With new calls for both rethinking our approaches to teaching and learning and for reviewing the traditional boundaries within institutions and between disciplines, Reinventing Ourselves offers a rich store of ideas from which to draw. The Oxford Handbook of Interdisciplinarity Robert Frodeman, 2010-06-24 This title provides a synoptic overview of the current state of interdisciplinary research, education, administration, and management and includes problem-solving knowledge that spans the disciplines and interdisciplinary fields and crosses the space between the academic community and society at large.

Interdisciplinary Research Allen F. Repko, Rick Szostak, 2020-01-21 Interdisciplinary Research: Process and Theory offers a comprehensive systematic presentation of the interdisciplinary decision-making process by drawing on student and professional work from the natural sciences, social sciences, humanities, and applied fields. Designed for active learning and problem-based approaches, the Fourth Edition includes expanded discussion of epistemology, creativity within the interdisciplinary research process, confirmation bias, and social media; the philosophy of integration and student work patterns; mapping and the importance of performing independent research while working through this book. An instructor website for the book includes a test bank, PowerPoint slides, and tables and figures from the book. *Mentoring in Formal and Informal Contexts* Kathy Peno, Elaine M. Silva, Mangiante, Rita A. Kenahan, 2016-03-01 Mentoring in Formal and Informal Contexts is a collection of invited works on mentoring in the many contexts in which it exists. Working with AHEA, the editors identified authors that have demonstrated experience and/or have published in this area. The book is arranged thematically: health care, education, the workplace, etc., and further sub-themed as appropriate. Mentoring in Formal and Informal Contexts is important because it fills a unique niche in the field of adult education, extends the scope of AHEA to a larger audience, and offers a current volume for scholars and practitioners based on both research and practice-based research. The audience: This collection is appropriate for a wide variety of professors, researchers, practitioners, and students in the field of adult education.

assessment of learning and teaching Muscatine highlights the outstanding colleges and universities including Harvard Boston University's University Professor's Program Evergreen State College and Fairhaven College at Western Washington University that have already remade their curricula successfully or adopted features like the ones he proposes Muscatine argues that the new curriculum is better able than the old to produce good scholars and good citizens for the twenty first century

IDS advocating a definitive starting point and methodology for IDS

In A Christian Approach to Interdisciplinary Studies William D Dennison asks is such a study truly integrative that does not have an ontological integrative starting point and the constitutive component of method

To put the question another way without the God of the Bible as the author of integration within creation can there truly be IDS

Indeed Dennison calls for the integration of approach and method integration provided and modeled by the triune God of Scripture

Adapted from the Preface

Strategic Curriculum Change in Universities Paul Blackmore, Camille B. Kandiko, 2012-06-25 The curriculum is a live issue in universities across the world

Many stakeholders governments employers professional and disciplinary groups and parents express strong and often conflicting views about what higher education should achieve for its students

Many universities are reviewing their curricula at an institutional level aware that they are in a competitive climate in which league tables encourage students to see themselves as consumers and the university as a product or even a brand

The move has prompted renewed concern for some central educational questions about both what is learnt and how

Strategic Curriculum Change explores the ways in which major universities across the world are reviewing their approaches to teaching and learning

It

unites institution level strategy with the underlying educational issues The book is grounded in a major study of curriculum change in over twenty internationally focused research intensive universities in the UK US Australia The Netherlands South Africa and Hong Kong Chapters include Achieving curriculum coherence Curriculum design and delivery as social practice Assessment in curriculum change The whole of institution curriculum renewal undertaken by the University of Melbourne 2005 2011 The physical and virtual environment for learning People and change Academic work and leadership This book presents a theorised and contextualised approach to the study of the curriculum and carries on much needed research on the curriculum in higher education It is an essential for the collection of all academics at university level and those involved in policy making quality assurance and enhancement
