Relationships In Adolescence:

The Development of Romantic Relationships in Adolescence Wyndol Furman, B. Bradford Brown, Candice Feiring, 1999-09-13 Originally published in 2000 this was the first volume to examine adolescent romantic relationships

Relationships in Adolescence John C. Coleman, 2022-12-29 Based on the study of a large number of young people ranging in age from eleven to seventeen Relationships in Adolescence originally published in 1974 proposes a new model of adolescent development described as the focal model which makes a valuable contribution to the greater understanding of adolescence for all who have contact with this age group The book contains an examination of three different approaches to adolescence an outline of the research project and a discussion of the empirical evidence concerning identity and self image heterosexual and parental relationships and large group situations Comparisons are made between age levels and between boys and girls with respect to the whole range of relationships and the evidence illustrates significant and at times dramatic differences between groups Of particular importance are some of the changes which occur with age such as the degree of conflict with parents and attitudes to sexuality Based on Dr Coleman s findings is his fresh focal model of adolescent development This model stresses the elements of growth and change in adolescence with special emphasis on the normal anxieties and conflicts that occur at different stages of the developmental period Today it can be read and enjoyed in its historical context

Friends, Lovers and Groups Rutger C. M. E. Engels, Margaret Kerr, Håkan Stattin, 2007-01-30 In recent years dating and romantic partners have been recognized as important peer relations within adolescence and research in this area is just emerging Peer groups and peer pressure are more well established areas of research into adolescence with recent studies focusing on peer groups and anti social behaviour The book will be the first in a series of three that examines the latest research in key areas of developmental psychology edited by Rutger Engels and Hakan Stattin This volume will present four areas of peer research the deviancy training mechanism of peer influence behavioural genetic analytical techniques in understanding peer selection romantic partners as peer relationships and in school and out of school peers studies

Relationship Pathways W. Andrew Collins, 2012 This volume is designed to guide the reader through the research on close relationships before during and after adolescence It begins with a section on developmental pathways and processes The next section is devoted to family relationships during the transitions into adolescence and young adulthood The final two sections concern peer relationships

Romance and Sex in Adolescence and Emerging Adulthood Ann C. Crouter, Alan Booth, 2014-04-04 Examines the nature and origin of adolescents contemporary patterns of sexual and romantic relationships spanning such diverse topics as the evolutionary roots of these behaviors This book is useful for academicians and upper level undergraduate and graduate students in the fields of human development and family studies and psychology

Personal relationships during adolescence Raymond Montemayor, 1994 Educators will find much useful information in this book It offers insights for program and curriculum planning and suggests numerous topics for stimulating discussions

with teens It also raises provocative issues about how the developmental needs of youth can be served more effectively by families communities and educators The book holds the potential to define personal relations as an integrated line of study that serves to develop theory and research beyond contextual boundaries The contributors analyze the ways in which critical interpersonal bonds are forged and maintained The relationships discussed are The parent teen connection the impact of cultural diversity on teens social development same sex friends as well as opposite sex friends during adolescence heterosexual bisexual gay and lesbian romantic relationships adolescent crowds or cliques and relationships involving non kin adults The authors also explore conceptual issues that cut across relationships and the problem of integrating the views of both individuals in a relationship *Relationships in Adolescence* John Christopher Coleman,1974 **Romantic**

Relationships in Adolescence: Developmental Perspectives Shulman,W. Andrew Collins,1998-01-24 Although there is a sizeable literature on romantic relationships in the college years and adulthood limited research exists on romantic relationships in adolescence The extant work consists primarily of demographic studies of dating patterns and deals little with aspects such as the characteristics or development of adolescent romantic relationships Particularly lacking is a theoretical framework to guide research on romantic relationships during this developmental stage This volume offers both innovative research and compelling discussions on adolescent romantic relationships This is the 78th issue of the quarterly journal *New Directions for Child Development* *Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages* Benjamin R. Karney,2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage especially within low income populations But if programs and curricula targeting adolescent romantic relationships are to be effective they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages This report evaluates the current landscape of theory research and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages Drawing on a thorough review of the existing theoretical and empirical literature in this area as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues and suggest future directions for research and intervention In particular they note that although research describing romantic relationships in low income populations is sparse there are already existing nationally representative data sets that include data from substantial numbers of well sampled low income adolescents Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low income youth *Friendship in Childhood and Adolescence* Phil Erwin,1998 Friendships are crucial to children s well being and happiness and lay important foundations upon which later relationships in adolescence and adulthood are built This overview of the nature and significance of children s peer relationships examines issues such as social cognitive

development the context of children s relationships relationship problems such as loneliness shyness and social isolation and methods of promoting positive relationships *Romantic Relationships and Sexuality in Adolescence and Young Adulthood* Daphne van de Bongardt,Rongqin Yu,Maja Dekovic,Wim Meeus,2018-04-19 Romantic relationship formation and the engagement in sexual behaviors are normative and salient developmental tasks for adolescents and young adults These developmental tasks are increasingly viewed from an ecological perspective thus as strongly embedded in different social contexts including the proximal social domains of parents peers and partners This volume brings together seven recent empirical studies on adolescents and young adults romantic relationships and sexuality in the context of relationships with parents peers and partners In this editorial introduction we describe two important recent changes in the theoretical perspectives on emerging romantic relationships and sexual activity from risky behaviors to normative tasks and from individual to contextualized processes We then discuss recent advances in empirical research on romantic relationships and sexuality of adolescents and young adults After that we review the seven studies in this volume and discuss the contributions of these studies to the existing literature Finally we discuss directions for future research regarding how to further incorporate the interrelational perspective in empirical research on these topics and how to bridge the gap between the research fields on romantic relationships and sexuality This book was originally published as a special issue of the European Journal of Developmental Psychology Adolescent Romantic Relations and Sexual Behavior Paul Florsheim,2003-07-18

Developmental and clinical researchers have only just discovered the phenomenon of adolescent romance as a topic of serious scientific inquiry This discovery may be related to the overwhelming evidence that adult romantic relationships are failing at alarming rates Dramatic increases in the rates of divorce out of wedlock childbirth and relationship violence lead to questions about the developmental precursors of romantic love and commitment What s wrong with love and can it be fixed This book brings together a diverse group of experts from various disciplines to address a serious gap in the understanding of adolescent development Part I focuses on romantic relations and sexual behavior from the perspective of normative adolescent development Part II centers on high risk adolescents and Part III explores the practical implications of current theory and research for clinicians educators and health administrators Together the chapters in this integrative and clinically useful book lay a foundation for understanding how adolescents successfully navigate the tumultuous waters of young love

Romance and Sex in Adolescence and Emerging Adulthood Alan Booth,Ann C. Crouter,Anastasia Snyder,2015-12-07 In this classic edition top scholars in family research examine the nature and origin of adolescents contemporary patterns of sexual and romantic relationships from the evolutionary roots of these behaviors to policies and programs that represent best practices for addressing these issues in schools and communities The text offers interdisciplinary expertise from scholars of psychology social work sociology demography economics human development and family studies and public policy Adolescents and young adults today face very different choices about family formation

than did their parents generation given such societal changes as the rise in cohabitation the increase in divorce rates and families having fewer children This book examines these demographic trends and provides a backdrop against which adolescents and emerging adults form and maintain romantic and sexual relationships This book addresses such questions as What are the ways in which early family and peer relationships give rise to romantic relationships in the late adolescent and early adult years How do early romantic and sexual relationships influence individuals subsequent development and life choices including family formation To what extent are current trends in romantic and sexual relationships in adolescence and emerging adulthood problematic for individuals families and communities and what are the most effective ways to address these issues at the level of practice program and policy Ideal as a supplement in graduate or advanced undergraduate courses on interpersonal romantic relationships adolescent development human sexuality couples and or family and conflict sociology of children and youth family therapy taught in human development and family studies clinical or counseling psychology social work sociology communications and human sexuality this book also appreciated by researchers and clinicians counselors who work with families and adolescents
