Relativistic Nuclear Physics , Relativistic Nuclear Physics L. S. Celenza, C. M. Shakin, 1986 The last decade has seen a revolution in how we think about nuclear structure It has become clear that the nucleus is a relativistic system and that the motion of nucleons is best described by the Dirac equation The book describes some of the successes achieved in the relativistic approach with an emphasis on parameter free models **Rotation and Accretion Powered Pulsars** Pranab Ghosh, 2007 This book is an introduction to pulsars a key area in high energy astrophysics with continuing potential for fundamental discoveries Throughout the book runs the unifying thread of the evolutionary link between rotation powered pulsars and accretion powered pulsars OCo a milestone of modern astrophysics Early textbooks on pulsars dealt almost entirely with rotation powered ones while accounts of pulsars in volumes on X ray binaries focused almost exclusively on accretion powered ones This is the first textbook to treat these two kinds of pulsars simultaneously with equal importance stressing the fact that both are rotating magnetic neutron stars operating under different conditions during different parts of their lives It describes the observational properties of both kinds of pulsars summarizes our physical understanding of these properties and pays detailed attention to the physics of superdense matter which neutron stars are composed of as well as to the superfluidity which is expected to occur in neutron stars Evolution from rotation power to accretion power and vice versa are carefully described The effects of the strong magnetic fields of neutron stars on themselves their emission properties and their environments are discussed as are the origin and evolution of such magnetic fields Also treated is the superbly accurate verification of Einstein s theory of general relativity through timing studies of binary pulsars which led to the award of the Nobel Prize to Hulse and Taylor in 1993 On each topic the book starts with simple basic physical concepts and builds up the exposition to the point where the latest and most exciting developments become accessible to the reader Postdoctoral Research Associateships , 1986 **NBS Special Publication** , 1978 **Energy Research Abstracts** , 1995 *Publications of the National Bureau of Standards ...
