**Religion and Psychology in Transition** James W. Jones, 2008-10-01 In this thought provoking book clinical psychologist and professor of religious studies James W Jones presents a dialogue between contemporary psychoanalytic thinking and contemporary theology He sheds new light on the interaction of religion and psychology by viewing it from the perspective of world religions providing an epistemological framework for the psychology of religion that draws on contemporary philosophy of science and bringing out the importance of gender as a category of analysis Developments in psychoanalysis provide new resources for theological reflection Jones contends The Freudian view that human nature is isolated and instinctual has shifted to a vision of the self as constituted in and through relationships Jones uses this relational model of human nature to explore the convergence between contemporary psychoanalysis feminist theorizing and themes in religious thought found in a variety of traditions He also critiques the reductionism inherent in Freud's discussion of religion and proposes nonreductionistic and genuinely psychoanalytic ways for psychoanalysis to treat religious topics For therapists psychologists theologians and others interested in spiritual or psychological issues Jones offers illuminating clinical material and insightful analysis

**Towards Cultural Psychology of Religion** Jacob A. v. van Belzen, 2010-08-03 The aims pursued in this book are quite modest The text is not an introduction in the traditional sense to any psychological subdiscipline or field of application nor does it present anything essentially new Rather it shows work in progress as it attempts to contribute to an integration of two differently structured but already existing fields within psychology In order to explain this it is probably best to say a few words about how the book came into being and about what it hopes to achieve As a project the volume owes very much to others While lecturing in places ranging from South Africa to Canada and from California through European countries to Korea colleagues have often urged me to come up with a volume on cultural psychology of religion For reasons that should become clear in the text I feel uncomfortable with such a demand To my understanding there exists no single cultural psychology of religion Rather there are ever expanding numbers of divergent types of psychologies some of which are applied to understanding religious aspects of human lives or to researching specific religious phenomena while others are not Within this heterogeneous field that is correctly or not still designated as psychology there are also many approaches that are sometimes referred to as cultural psychology or as culturally sensitive psychologies It would be worthwhile applying many of these to research on religious phenomena but at present not too many are in fact so applied

**Terror and Transformation** James W. Jones, 2014-02-04 Religion has been responsible for both horrific acts against humanity and some of humanity's most sublime teachings and experiences How is this possible From a contemporary psychoanalytic perspective this book seeks to answer that question in terms of the psychological dynamic of idealisation At the heart of living religion is the idealisation of everyday objects Such idealisations provide much of the transforming power of religious experience which is one of the positive contributions of religion to the psychological life However idealisation can

also lead to religious fanaticism which can be very destructive Drawing on the work of various contemporary relational theorists within psychoanalysis this book develops a psychoanalytically informed theory of the transforming and terror producing effects of religious experience It discusses the question of whether or not if idealisation is the cause of many of the destructive acts done in the name of religion there can be vital religion without idealisation This is the first book to address the nature of religion and its capacity to sponsor both terrorism and transformation in terms of contemporary relational psychoanalytic theory It will be invaluable to students and practitioners of psychoanalysis psychotherapy psychology and religious studies and to others interested in the role of religion in the lives of individuals and societies **Psychology in**

**Nietzsche's Criticism of Religion** Jan-Olav Henriksen, 2022-11-14 Friedrich Nietzsche claimed to be a psychologist This claim is substantiated in his criticism of religion In this book Jan Olav Henriksen provides new perspectives on Nietzsche's contribution to such criticism by applying elements from attachment theory and self psychology The result is that Nietzsche's insights into the problematic elements in religion point beyond what he was able to articulate based on the psychological resources available to him Henriksen sheds new light on the psychological dimensions in Nietzsche's individualism his understanding of God morality metaphysics and emotions and demonstrates how Nietzsche's criticism of religion is rooted in both psychological splitting and a profound loss of the orientational resources religion provided in his childhood **The**

**Image of God and the Psychology of Religion** Richard L Dayringer, David Oler, 2013-04-03 What are the implications of a client's image of God Improve your confidence and your practice skills by enhancing your knowledge of how individuals are likely to perceive God and of how those perceptions impact the way they function as human beings Theologians have long speculated and theorized about how humans imagine God to be This book merges theology with science presenting empirical research focused on perceptions of God in a variety of populations living in community and mental health settings Each chapter concludes with references that comprise an essential reading list and the book is generously enhanced with tables that make data easy to access and understand Liberating Images of God discusses the constriction and impoverishment of God images due to the traditional restrictions of God images to those that are male and personified This chapter examines the potential for the client and counselor's co-creation of images of God which embrace the feminine as well as the masculine the nurturer as well as the warrior and the natural world in all its dimensions as well as the human world to liberate enrich sustain and transform the client's relationships with God and with him/herself Attachment Well Being and Religious Participation Among People with Severe Mental Disorders examines the relationship between attachment states of mind and religious participation among people diagnosed with severe mental illness Concepts of God and Therapeutic Alliance Among People with Severe Mental Disorders explores the transferential aspects of God representation among severely mentally ill adults It highlights research on the relationship between a patient's image of God and that patient's working relationship with his/her case manager and discusses the implications for clinical practice of those findings The Subjective Experience of

God presents a theory about the psychological basis for the experience of God that argues that this experience is essentially a form of projection and as such is an internal event that does not exist independent of an individual's psyche. This chapter draws a distinction between faith in a particular belief, namely faith in the existence of a loving omnipotent God, and an attitude of faith which is the basis for experiences of transcendence. Relationship of Gender Role Identity and Attitudes presents the results of a study in which nearly 300 Catholic attendees at three university Catholic centers completed the Bern Sex Role Inventory, the Attitudes Toward Women Scale, and the Perceptions of God Checklist. This chapter looks at images of God as masculine or feminine and at the connection for people between the way they perceive God and the way they relate towards men and women. Reflections on a Study in a Mental Hospital brings you groundbreaking new research on perceptions of God in an inpatient population. This chapter examines the positive effects as opposed to the negative effects previously portrayed by the psychological community of religious belief and practice for residential care patients in a psychiatric hospital.

When Women Become Priests Kelley A. Raab, 2000-04-25 In an analysis that deftly unites feminist criticism, psychoanalysis, and Catholic theology, Kelley Raab explores the symbolic implications of women at the altar, providing rich insight into issues of gender symbolism and power. *Progress in Self Psychology, V. 18* Arnold I. Goldberg, 2013-06-17 Postmodern Self Psychology, the last volume of the Progress in Self Psychology series under the editorship of Arnold Goldberg, charts the path of self psychology into the postmodern era of psychoanalysis. It begins with Goldberg's thoughtful consideration of the several tributaries of self psychological thought in the decades after Kohut and continues with Mark Gehrie's elaboration of reflective realism as a self psychological way out of epistemological quagmires about the essential reality of the analytic endeavor. Clinical contributions offer contemporary perspectives on clinical themes that engaged Kohut in the 1970s: a study of the effect of moments of meeting on systems of pathological accommodation; a reappraisal of empathy as a bi-directional negation; and an assessment of the diverse clinical phenomena that justify a prolonged understanding only phase of treatment. The theory section of Volume 18 comparably charts the movement of self psychology toward a postmodern sensibility. Contributors reappraise intersubjectivity theory as a contextualist treatment approach consistent with dynamic systems theory; return to Kohut's concept of self-object relationships with special attention to the separate subjective and intersubjective components of self-object experiences; and develop one of Kohut's early ideas into a theory of forward edge transferences that strengthen normal self development. In all, Volume 18 is a richly insightful progress report on the current status of self psychology and a fitting capstone to Arnold Goldberg's distinguished tenure as editor of the Progress in Self Psychology series. Race in Psychoanalysis Celia Brickman, 2017-12-06 Race in Psychoanalysis analyzes the often unrecognized racism in psychoanalysis by examining how the colonialist discourse of late nineteenth century anthropology made its way into Freud's foundational texts where it has remained and continues to exert a hidden influence. Recent racial violence, particularly in the US, has made many realize that academic and professional disciplines as well as social and

political institutions need to be re examined for the racial biases they may contain Psychoanalysis is no exception When Freud applied his insights to the history of the psyche and of civilization he made liberal use of the anthropology of his time which was steeped in colonial racist thought Although it has often been assumed that this usage was confined to his non clinical works this book argues that through the pivotal concept of primitivity it fed back into his theories of the psyche and of clinical technique as well Celia Brickman examines how the discourse concerning the presumed primitivity of colonized and enslaved peoples contributed to psychoanalytic understandings of self and raced other She shows how psychoanalytic constructions of race and gender are related and how Freud s attitudes towards primitivity were related to the anti Semitism of his time All of this is demonstrated to be part of the modernist aim of psychoanalysis which seeks to create a modern subjectivity through a renegotiation of the past Finally the book shows how all of this can affect both clinician and patient within the contemporary clinical encounter Race in Psychoanalysis is a pivotal work of significance for scholars practitioners and students of psychoanalysis psychologists clinical social workers and other clinicians whose work is informed by psychoanalytic insights as well as those engaged in critical race and postcolonial studies

**Climate Change and the Symbol Deficit in the Christian Tradition** Jan-Olav Henriksen, 2022-02-24

Exploring how the climate crisis discloses the symbol deficit in the Christian tradition this book argues that Christianity is rich in symbols that identify and address the failures of humans and the obstacles that prevent humans from doing well while positive symbols that can engage people in constructive action seem underdeveloped Henriksen examines the potential of the Christian tradition to develop symbols that can engage peoples in committed and sustained action to prevent further crisis To do so he argues that we need symbols that engage both intellectually and emotionally and which enhance our perception of belonging in relationships with other humans be it both in the present and in the future According to Henriksen the deficit can only be obliterated if we can develop symbols that have some root or resonance in the Christian tradition provide concrete and specified guidance of agency engage people both emotionally and intellectually and finally open up to visions for a moral agency that provide positive motivations for caring about environmental conditions as a whole

*Korean, Asian, or American?* Jacob Yongseok Young, 2012-04-26

The voices of second generation Korean Americans echo throughout the pages of this book which is a sensitive exploration of their struggles with minority marginality cultural ambiguity and negative perceptions Born in the United States they are still viewed as foreigners because of their Korean appearance Raised in American society they are still tied to the cultural expectations of their Korean immigrant parents While straddling two cultures these individuals search for understanding and attempt to rewrite their

identity in a new way Through autobiographical reconstruction and identity transformation they form a unique identity of their own a Korean American identity This book follows a group of second generation Korean American Christians in the English speaking ministry of a large suburban Korean church It examines their conflicts with the conservative Korean speaking ministry ruling the church and their quest to achieve independence and ultimately become a multicultural church

**Relating to God** , Dan Merkur, 2013-11-21 In *Relating to God Clinical Psychoanalysis Spirituality and Theism* Dan Merkur conceptualizes religious discourse within psychoanalysis He proposes that God be treated as a transference figure whose analysis leads to a reduction of the parental content that is projected onto God Merkur notes that religious conversion experiences regularly involve theological intuitions that are either rational or owing to morbid complications have undergone displacement into irrational symbolism Analysis renders the religiosity more wholesome Traditionally psychoanalytic thought has been dismissive of religion Freud is on record however as having called psychoanalysis a neutral procedure He argued that religion with its dependency on a providential God who punishes disobedience imagines spirituality on the model of human parents and fails to approach spirituality in an appropriately scientific manner He wrote little of spiritual phenomena but mentioned both the rationality of the universe and the parapsychological occurrence of thought transference Occasionally later psychoanalysts used different language in order to contrast wholesome and morbid forms of religion Erich Fromm distinguished authoritarian and humanistic religions while D W Winnicott condemned fetishistic behavior while approving of playful illusions that require belief in These formulations constructed a middle position for clinicians neither categorically opposed to religion as classical psychoanalysis was nor do they embrace cultural relativity as spiritually oriented psychotherapists are currently advocating What sorts of spiritual practices does psychoanalysis find unobjectionable As examples of humanistic religion Fromm named Zen Buddhism Buddhist mindfulness meditation and the via negativa or way of negating that some Christian and Jewish mystics have followed Because the Bible based approaches are little known Merkur discusses their histories procedures and psychoanalytic understanding
