Religion & Ethics for a New Age Emmanuel K. Twesigye, 2001 In Religion Ethics for a New Age the problems of traditional Christian dogmas of evil death the fall violence sexuality patriarchal theological language and symbols are discussed within a global evolutionary context as well as that of the existential reality of cultural moral and religious pluralism Agape as the central commandment of Christ is adopted as the new universal grounding for true global Christian ethics sound religion humane moral and cultural values God's supernatural activities of creation and redemption are presented as coextensive with evolutionary history and life in the world as God's unfolding kingdom **Evolutionary**

History Edmund Russell, 2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light **The New Age Movement and the Biblical**
