Religion in Global Civil Society Mark Juergensmeyer, 2005-11-03 The extraordinary changes in world society at the beginning of the 21st century have involved religion to a degree that would have amazed earlier observers of modernity Within the past decade religion has been associated with some of the world's most strident forms of political encounter including new movements of nationalism the clerical leadership of political sects and the religiously motivated acts of terrorism Religion seems to be trying to tear the planet apart even as other cultural forces seem to be trying to pull it together The technology of the Internet film television cell phones and other forms of rapid universal communication seem to be knitting the world into a single social fabric Consumer franchises and popular culture seem to be making the world a single global city Religion seems to be at odds with all of this Is religion the natural enemy of globalization The essays in this volume explore the difficulties and possibilities of a diversity of religious groups occupying the same civil society The authors avoid simplistic generalizations Religion they show is not only identified with the culture and politics of the hostile anti urban village it is not simply the jihad that Benjamin Barber identified as the opponent of the homogenous global culture of McWorld True some religious activists have blown things up But others have tried to smooth things over Even the religious

opposition to globalization is nuanced Some violent activists like Hindu extremists in India want a new religious state Others like Christian militias or al Qaeda envision a transnational religious entity a kind of religious globalization to supplant the secular one Prophetic religious voices call for moderation justice and environmental protection Religion these essays demonstrate plays diverse and sometimes contradictory roles in the new cultural globalization In a global culture the shared values of different religious traditions can provide a collective sense of virtuous conduct in public life But religion can also support the position of enemies of global society those who see in globalization the effort to impose the values and power of one country over the others

Society and Culture Bryan S Turner, Chris Rojek, 2001-06-04 *Society and Culture* reclaims the classical heritage provides a clear eyed assessment of the promise of sociology in the 21st century and asks whether the cultural turn has made the study of society redundant Sociologists have objected to the rise of cultural studies on the grounds that it produces cultural relativism and lacks a stable research agenda This book looks at these criticisms and illustrates the relevance of a sociological perspective in the analysis of human practice The book argues that the classical tradition must be treated as a living tradition rather than a period piece It analyzes the fundamental principles of belonging and conflict in society and provides a detailed critical survey of the p

World Order and Religion Wade Clark Roof, 1991-01-01 This book looks at religion from a global perspective and examines how religion is shaped by the larger set of political and economic relationships that make up today s world Focusing mainly on Western religion and on the changing role of the United States in world affairs the authors show how shifts in the hegemony of the United States is affecting religious and ideological trends Attention is given particularly to the United States in relation to Latin America South Africa and the post colonial world of China Japan and the Islamic states This volume highlights the impact of greater global connectedness on the rise of new religious movements and changing patterns of establishment religion in the United States

Black Theology--Essays on Global Perspectives Dwight N. Hopkins, 2017-06-15 Since its start in 1966 black liberation theology in the United States has continually engaged international developments with Africa and the entire world But after Nelson Mandela was released from prison in February 1990 there has been an almost twenty year break in books on black theology and international affairs *Black Theology Essays on Global Perspectives* bridges that post 1990 gap and makes a vital contact with Africa again This book conceptualizes black theology to take on the global reconfigurations and opportunities brought

about by the rapidly shrinking earth of fast paced worldwide contacts In other words in the specificity of the genealogy of black theology we need to reforge ties with Africa This claim is based on tradition And in the generality of the larger worldwide intertwining of technologies and economics we need a new type of black theological leadership for the twenty first century This claim is based on today s international challenges The essays in this book draw on tradition and point forward in the midst of today s worldwide challenges and favorable possibilities given the closeness of all nations and the varieties of cultures

The Pope, the Public, and International Relations Mariano P. Barbato, 2020-06-30 This edited volume engages a long standing religious power the Holy See to discuss the impact of the structural and postsecular transformations of international relations through the emergence of a global and digital public sphere Despite the legal construction that enables the

separation of the Holy See as a distinct legal entity it is also an instrument for the papacy to represent externally and regulate internally the global and transnational Catholic Church The Holy See is also the tool that enables the papacy to address a transnational or a global public beyond Catholic adherence most prominently through journeys that are often at the same time state visits and pastoral journeys Instead of understanding these hybrid roles as an irregular exemption the contributions of the book argue that the Holy See should be seen as a certainly special but nevertheless quite normal actor of international and public diplomacy

Globalization: Culture and identity Roland Robertson, Kathleen E. White, 2003 *Colonial Religion and Indigenous Society in the Archaic Western Mediterranean, C. 750-400 BCE* Lela Manning Urquhart, 2010 This project examines the long term responses of indigenous societies in Sicily and Sardinia to colonial religion in the ancient western Mediterranean It conducts a comparative analysis of religious developments among indigenous Greek and Phoenician communities between the 8th and 5th centuries BC It shows that while indigenous communities near Greek colonies in Sicily integrated Greek style material culture and practices into their religious lives those near Phoenician colonies in Sardinia and Sicily showed much less interest in Phoenician material culture and religion This contrast is then explained in terms of the greater social accessibility and more communal features of Greek polis religion which made its practices and material culture broadly attractive across cultural divides in a time of rapid social change
