Religion and Psychology Diane Jonte-Pace, William B. Parsons, 2002-09-26 This work is a survey of the current state of the relationship between religion and psychology from the leading scholars in the field *Towards Cultural Psychology of Religion* Jacob A. v. van Belzen, 2010-08-03 The aims pursued in this book are quite modest The text is not an introduction in the traditional sense to any psychological subdiscipline or field of application nor does it present anything essentially new Rather it shows work in progress as it attempts to contribute to an integration of two differently structured but already existing fields within psychology In order to explain this it is probably best to say a few words about how the book came into being and about what it hopes to achieve As a project the volume owes very much to others While lecturing in places ranging from South Africa to Canada and from California through European countries to Korea colleagues have often urged me to come up with a volume on cultural psychology of religion For reasons that should become clear in the text I feel uncomfortable with such a demand To my understanding there exists no single cultural psychology of religion Rather there are ever expanding numbers of divergent types of psychologies some of which are applied to understanding religious aspects of human lives or to researching specific religious phenomena while others are not Within this heterogeneous field that is correctly or not still designated as psychology there are also many approaches that are sometimes referred to as cultural psychology or as culturally sensitive psychologies It would be worthwhile applying many of these to research on religious phenomena but at present not too many are in fact so applied

Roads of Excess, Palaces of Wisdom Jeffrey J. Kripal, 2001-12 William Blake once wrote that The road of excess leads to the palace of wisdom Inspired by these poetic terms Jeffrey J Kripal reveals how the works of scholars of mysticism are often rooted in their own mystical experiences roads of excess which can both lead to important insights into these scholars works and point us to our own palaces of wisdom In his new book Kripal addresses the twentieth century study of mysticism as a kind of mystical tradition in its own right with its own unique histories discourses sociological dynamics and rhetorics of secrecy Fluidly combining autobiography and biography with scholarly exploration Kripal takes us on a tour of comparative mystical thought by examining the lives and works of five major historians of mysticism Evelyn Underhill Louis Massignou R C Zaehner Agha Khan Bharati and Elliot Wolfson as well as relating his own mystical experiences The result Kripal finds is seven palaces of wisdom the religious power of excess the necessity of distance in the study of mysticism the relationship between the mystical and art the dilemmas of male subjectivity and

modern heterosexuality a call for ethical criticism the paradox of the insider outsider problem in the study of religion and the magical power of texts and their interpretation An original and penetrating analysis of modern scholarship and scholars of mysticism Roads of Excess Palaces of Wisdom is also a persuasive demonstration of the way this scholarly activity is itself a mystical phenomenon Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult Integrating Psychology, Religion, and Culture Jenny H. Pak, 2020-12-15 Although science was originally broadly conceptualized as a systematic rigorous activity to produce trustworthy knowledge psychologists adopted a single philosophy of science and strictly enforced natural science as the only proper scientific psychology Qualitative research has been part of modern psychology from the beginning but it was obscured for nearly a century as positivist epistemology came to dominate the field Building culturally robust and intelligible theories capable of responding more effectively to complex problems faced by a rapidly changing world calls for openness in methodological diversity Deeply rooted in a hermeneutic tradition cultural psychology has challenged the appropriateness of seeking reductive knowledge because higher mental processes such as religious beliefs values and choices are bound by historical and cultural context As greater interdisciplinary integration and methodological innovations are necessary to keep psychology of religion relevant narrative inquiry has emerged as a promising integrative paradigm *Religion and Society in Sub-Saharan Africa and Southern Asia* Carole Rakodi, 2019-03-18 This book analyses how religion is entangled in people's lives in Sub-Saharan Africa and southern Asia It provides an introduction to the teachings practices and values promoted by the main religious traditions in these regions and an overview of the evidence on what religion means to people in terms of their beliefs and religious practices and how it influences their values attitudes and day to day relationships with others especially their families Over the course of the book Carole Rakodi explores similarities and differences between and within

religious traditions and identifies some of the key factors that influence and explain the roles played by religion in people's personal lives and social relationships. A separate companion volume will go on to focus on the social and political roles and relationships of religious groups and organisations. This book will be of great interest to academics and students working in a range of disciplines especially sociology, religious studies and development studies but also anthropology, geography and area studies.

Mystical Encounters with the Natural World Paul Marshall, 2005-07-07. Some experiences of the natural world bring a sense of unity, knowledge, self-transcendence, eternity, light and love. This is the first detailed study of these intriguing phenomena. Paul Marshall explores the circumstances, characteristics and after-effects of this important but relatively neglected type of mystical experience and critiques explanations that range from the spiritual and metaphysical to the psychoanalytic, contextual and neuropsychological. The theorists discussed include R. M. Bucke, Edward Carpenter, W. R. Inge, Evelyn Underhill, Rudolf Otto, Sigmund Freud, Aldous Huxley, R. C. Zaehner, W. T. Stace, Steven Katz and Robert Forman, as well as contemporary neuroscientists. The book makes a significant contribution to current debates about the nature of mystical experience.

Terror and Triumph Anthony B. Pinn, 2022-07-26. Given the unique history of African Americans and their diverse religious flowering in Black Christianity, the Nation of Islam, voodoo and others, what is the heart and soul of African American religious life? As a leader in both Black religious studies and theology, Anthony Pinn has probed the dynamism and variety of African American religious expressions. In this work based on the Edward Cadbury Lectures at the University of Birmingham, England, he searches out the basic structure of Black religion, tracing the Black religious spirit in its many historical manifestations. Pinn finds in the terrors of enslavement of Black bodies and subsequent oppressions the primal experience to which the Black religious impulse provides a perennial and cumulative response. Oppressions entailed the denial of personhood and creation of an object; the negro slave auctions, punishments and later lynchings created an existential dread but also evoked a quest, a search for complex subjectivity or authentic personhood that still fuels Black religion today. In this 20th anniversary edition of Pinn's groundbreaking work, the author offers a new reflection on the argument in retrospect and invites a panel of five contemporary scholars to examine what it means for current and future scholarship. Contributors include Keri Day, Sylvester Johnson, Anthony G. Reddie, Calvin Warren and Carol Wayne White.

The Bible and Lay People Andrew Village, 2016-03-23 There are many books about how people ought to interpret the Bible This book is about how people in churches actually interpret the Bible and why they interpret it in the way that they do Based on a study of Anglicans in the Church of England it explores the interaction of belief personality experience and context and sheds new light on the way that texts interact with readers The author shows how the results of such study can begin to shape an empirically based theology of scripture This unique study approaches reader centred criticism and the theology of scripture from a completely new angle and will be of interest to both scholars and those who use the Bible in churches

Ana-María Rizzuto and the Psychoanalysis of Religion Martha J. Reineke, David M. Goodman, 2017-08-24 Ana María Rizzuto's groundbreaking explorations of the formation of God representations in early childhood and their elaboration throughout the life cycle have made their mark enriching the practice of psychoanalysis and psychotherapy as well as scholarship within the psychoanalytic study of religion Accompanied by illuminating commentaries by Rizzuto the authors of this edited collection essays in this volume underscore Rizzuto's most important contribution to clinical practice rather than assert that psychoanalysis is incompatible with religious beliefs and practices or with spiritual concerns that patients may bring to a therapeutic context Rizzuto makes room for the coexistence of psychoanalysis and religion in the therapeutic setting Demonstrating how Rizzuto's work has enhanced connections within and among psychoanalytic theories of religion established pathways for new developments in psychotherapy and facilitated interdisciplinary conversations this volume showcases the compelling power of Rizzuto's work and its ongoing influence
