Scientific Insights Into Yoruba Traditional Medicine James I. Durodola, 1981 *Traditional Medicines Around the World* Matthew N. O. Sadiku, Janet O. Sadiku, Sarhan M. Musa, 2022-05-18 Our health is our most important asset. Health and the provision of healthcare is fundamental to the welfare of any nation. The desire to have and sustain good health cuts across national, cultural, geographic, and political boundaries. Every region of the world has had one form of traditional medicine at some stage in its history. Traditional medicines have been a part of human history all over the world, with knowledge being transferred from generation to generation. It refers to diverse health practices, knowledge, and skills based on ancient indigenous experience that are used to maintain health as well as to cure, diagnose, or prevent illness. This book focuses on ten most popular traditional medicines around the world. It is a valuable source of guidance and direction for organizations and individuals interested in traditional medicine. It provides an introduction to traditional medicine so that beginners can understand it, its increasing importance, and its developments in contemporary time. It is a must-read book for anyone who cares about traditional medicine.

Global Health Governance Obijiofor Aginam, 2005-08-05 Globalization has immersed all of humanity in a single germ pool. There are no health sanctuaries in a globalizing world. In *Global Health Governance*, Obijiofor Aginam explores the relevance of international law in contemporary public health diplomacy. He focuses on the concept of mutual vulnerability to explore the globalization of disease in what is paradoxically a global village and a divided world. Drawing from a wide range of disciplines, *Global Health Governance* offers a holistic approach to global health governance involving a multiplicity of actors: nation states, international organizations, civil society organizations, and private actors. Aginam articulates modest proposals under the rubric of communitarian globalism, a paradigm that strives to meet the ideals of law of humanity. These proposals project a humane global health order where all of humanity is inexorably tied into a global compact and where the health of one nation state rises and falls with the health of others. International law, with its bold claims to universal protection of human rights and human dignity, is an indispensable governance tool for the reconstruction of damaged public health trust in the relations of nations and peoples.

Sacred Leaves of Candomblé Robert A. Voeks, 2010-01-01 Winner Hubert Herring Book Award, Pacific Coast Council on Latin American Studies. Candomblé, an African religious and healing tradition that spread to Brazil during the slave trade, relies heavily on the use of plants in its spiritual and medicinal practices. When its African adherents were forcibly transplanted to the New World, they faced the challenge not only of maintaining their culture and beliefs in the face of European domination but also of finding plants with similar properties to the ones they had used in Africa. This book traces the origin, diffusion, medicinal use, and meaning of Candomblé's healing pharmacopoeia, the sacred leaves. Robert Voeks examines such topics as the biogeography of Africa and Brazil, the transference and transformation of Candomblé as its adherents encountered both native South American belief systems and European Christianity, and the African system of medicinal plant classification that allowed Candomblé to survive.

and even thrive in the New World This research casts new light on topics ranging from the creation of African American cultures to tropical rain forest healing floras **An Essay on West African Therapeutics** Obadiah Johnson,1982

Colonial Subjects Philip Serge Zachernuk,2000 West African intellectuals have a long history of engaging with European intrusion by reflecting on their status as colonial and postcolonial subjects Against the tendency to view this engagement as a confrontation between the modern west and traditional Africa Philip S Zachernuk argues that the interaction is far more fluid and diverse Challenging the frequent denigration of western educated Africans as a culturally barren kleptocratic elite Colonial Subjects shows that they occupied a shifting medial position between colonizers and colonized In the process they

created a distinctive intellectual culture grounded in indigenous and European sources Looking carefully at southern Nigeria from 1840 to 1960 Zachernuk locates intellectuals in the contours of their society as it changed from late precolonial times to the beginning of independence He examines their engagement with British and Black Atlantic assumptions and assertions about Africa's place in the world These ideas shaped by the needs of others became the often awkward material with which these intellectuals endeavored to construct their own image of their home continent In this context a group of Nigerian intellectuals created a dynamic intellectual tradition motivated by self interest and marked by innovation counter invention and imitation within the confines of the Atlantic world At different times they opposed and supported the colonial state adopted and rejected notions of racial destiny and advocated free market principles cooperative self help and state socialism Colonial Subjects provides a historical framework for connecting these divergent ideas thereby recovering the complexity of an intellectual tradition both colonial and modern
