Shaking The Foundations Coming Of Age In The Postmodern Era:

THE FANTASY OF FAITH Rogene A. Buchholz, 2023-08-16 In a nutshell Christianity is one of the greatest if not the greatest hoax ever perpetuated on people in the history of the universe It is practically all fantasy of one sort of another that millions of people believe in all over the world and have done so for many centuries since Christianity began It all could have been made up out of whole cloth The Old Testament cannot be taken at face value as the creation story was most likely borrowed from other sources and adapted to fit with the author's purpose of explaining how the world began The Exodus may be entirely fiction and most certainly did not happen the way it is described in the Bible As far as the New Testament is concerned it was written decades after the crucifixion of Jesus by people who were not eyewitnesses to the events they described There may have been a prophet whose teachings drew many followers but there was certainly no virgin birth no miracles and no resurrection The purpose of all the apocalyptic writing and second coming of Christ may have been motivated by the oppression of the Roman Empire where the Jewish people felt powerless and needed to believe in something that would provide them with a feeling that in the final analysis justice would be done and they would get their revenge Thus Christianity needs to be exposed for the fraud that it is which is what this book attempts to do by looking at the history of Christianity Biblical scholarship and other aspects of Christianity along with its alternatives Forthcoming Books Rose Army, 2003 Technology in the Western Political Tradition Jerry Weinberger, Arthur M. Melzer, Richard Zinman, 2019-05-15 This well integrated group of thirteen papers addresses the intriguing and perplexing issue of whether modern government can handle the problem of technology **Myth and Archive** Roberto González Echevarría, 1998 Discusses the theory of the origin and evolution of the Latin American narrative and the emergence of the modern novel Awe and Trembling E Mark Stern, Robert B Marchesani, 2021-02-25 Gain new insight into panic and anxiety related disorders Awe and Trembling Psychotherapy of Unusual States provides psychologists psychotherapists and clinical social workers with an overview of the symptoms and causes of panic The book gives insight into how patients cope with anxiety to help you provide more sympathetic services to your clients You will discover how to deal with panic in an integrative way rather than relying on medication or cognitively coping by rationalization You will also discover current methods that will improve the lives of suicidal patients such as talking the patient through the suicidal act and inspiring thought about what would happen and discussing what the patient intends for those that are left behind Awe and Trembling offers effective techniques that will help you give better care to clients suffering from these difficult disorders Compelling and informative Awe and Trembling will help you recognize when panic in your patients is a breakthrough rather than an impending breakdown or collapse You'll be able to help your patients find new possibilities for a better life instead of living with the chaos that comes with anxiety In Awe and Trembling you'll find ideas that will help you assist your patients in overcoming anxiety and panic such as discovering ways to treat each patient as a living breathing individual with his or her own personality and treatment needs

examining the therapy session as a vehicle for meditative awakening and deeper self understanding for your patients realizing that if you replace the isolation of panic with structure and connection using such techniques as breathing exercises or yoga panic attacks can be controlled acknowledging that suffering has potentially liberating as well as debilitating dimensions discovering an integrated clinical model of understanding that addresses panic and anxiety from an existential perspective understanding that anxiety and panic often serve as opportunities for clients to examine the conflicts in their lives and within themselves to create a deeper more authentic existence Awe and Trembling will show you new ways to help your clients on their journey toward wholeness and a more comfortable rewarding life This valuable book will provide you with a unique perspective on panic and awe to help your clients overcome their anxieties and heal themselves and their lives so they can regain their emotional and physical independence

The end of the Western Civilization? The Intellectual Journey of Humanity to Adulthood Hippokratis Kiaris, 2022 Civilizations can be perceived as living human beings that are born mature age and ultimately die and disappear passing their legacy to the future generations These transitions may be projected to the different stages of cognitive development of children The Western Civilization which embodies our current state of cultural advancement from the Classic Greek to the modern period can be paralleled by the gradual transitions of human beings toward adulthood From this perspective the ancient Greek era resembles the toddler years of humanity at which the first why type questions are being asked The theocratic period that followed until the Renaissance can be seen as our childhood when people lived their lives under the tight boundaries set by religious authorities The period spanning from the Enlightenment until almost the end of the 20th century can be considered as our teenage years when people rediscover their past are liberated from superstition and set the path forward based on reason by a manner at which the distinction between plausible and feasible is vague Within this scheme postmodernism also finds its place in our teenhood The last few decades from this perspective signify our entrance to adulthood at which major questions are considered answered or at least settled and the only path forward perceived as feasible is the one that is followed already a state that is bringing us closer to our intellectual aging and its inevitable death Some signs of aging related pathologies are already manifested in today's technology intensive society By identifying our intellectual age and by appreciating our health status we may be able to proactively delay or even avert our intellectual aging and death

Modern Age, 2003

The Pyrotechnic Insanitarium Mark Dery, 1999-12-15 From the far left to the far right on talk radio and the op ed page more and more Americans believe that the

social fabric is unraveling Celebrity worship and media frenzy suicidal cultists and heavily armed secessionists modern life seems to have become a pyrotechnic insanitarium Mark Dery says borrowing a turn of the century name for Coney Island Dery elucidates the meaning to our madness deconstructing American culture from mainstream forces like Disney and Nike to fringe phenomena like the Unabomber and alien invaders Our millennial angst he argues is a product of a pervasive cultural anxiety a combination of the social and economic upheaval wrought by global capitalism and the paranoia fanned by media sensationalism The Pyrotechnic Insanitarium is a theme park ride through the extremes of American culture of which The Atlantic Monthly has written Mark Dery confirms once again what writers and thinkers as disparate as Nathanael West Fyodor Dostoyevsky Sigmund Freud and Oliver Sacks have already shown us the best place to explore the human condition is at its outer margins its pathological extremes

Spirituality and the Curriculum Adrian Thatcher, 1999-10 Praise for Spirituality and the Curriculum The current interest in spirituality shows no sign of abating This volume consists of a useful set of essays from educationalists and theologians Overall the volume will be important reading not only for teachers of theology but also for those concerned with the spiritual development of children and adults alike Theology May June 2000 This book fizzles Addressed to those working in an educational context it is an attempt to speak theologically about spirituality and morality Adrian Thatcher its editor has assembled a group of contributors who write well and who have innovative ideas to communicate Fresh arguments and new perspectives make it an exciting read as it exposes the distressing emptiness of what passes as secularised spiritual nurture in most contemporary schools Its seminal chapter is by Mary Grey What an imaginative tour de force this is She is not afraid to speak of the Transcendent or to see the wider value of liberation and feminist theologies What Adrian Thatcher offers is a sharp critique of the high sounding moral sentiments of the present generation of curriculum makers There is a vision here which can reach beyond Christianity and which ought to be taken account of by parents and teachers Again prophetic in its own way it is controversial Ian Markham's short chapter is a gem Adrian Thatcher has given us a refreshing book which reasserts the right of theology to be heard in the current debate about the spiritual dimension of education But that is not the point What he wishes us to do is to think further better and more fairly about the issues which are before us That surely is something we all must do This book is a marvellous help in this Buy it British Journal of Religious Education 23 1 Autumn 2000 It offers an informed critical accessible and thought provoking set of reflections on the possible connections that might be made between spirituality and the curriculum especially at school level It helps it the task of establishing a credibility of spirituality as a valid dimension of the curriculum It also offers some guidance for educators as to how they might approach this area and offers some valuable insights into aspects of practice The Heythrop Journal 41 4 October 2000 It is rarely possible to do justice to books which contain a number of substantial essays because there is seldom space to give adequate consideration to all the contributors and this collection is no exception The book will be of most use to those researching this subject but I would hope that it might also be

read by theologians who may see it as an invitation to them to focus more of their attention on theology and education

Resource Professional Reflection on Theory and Practice in Religious Education 23 2 Spring 2001 there is much good material for those who wish to work with the spiritual moral social and cultural dimensions of their school or colleges environments shaping or challenging the power structures in which they operate and determining the ethos which they seek to encourage Those involved in religious education or student services or educational policy will all find articles to stimulate the current debate as to whether theology and or spirituality can create community consensus and so nurture a more humane experience within education Tim Macquiban Journal of Beliefs and Values 22 1 2001

Invisible Crises George Gerbner, 2018-10-08 According to the contributors to this volume the communications media deliberately blank out critical conditions and developments whose imagery would pose unacceptable challenges to the dominant structures of culture power Such invisible crises include the suppression of information about the dehumanization and stigmatization of groups of people the drift toward ecological suicide the neglect of vital institutions such as public education and the arts the way in which television corrupts the electoral process and the promotion of practices which drug poison and kill The book asks why the media are in the view of contributors withholding vital information from the public and focuses on the increasing concentration of culture power that it is argued keeps these truths from public view
