Shanghai on Strike Elizabeth J. Perry, 2022 This work is an important addition to the rather limited literature on the social history of China during the first half of the twentieth century It draws on abundant sources and studies which have appeared in the People's Republic of China since the early 1980s and which have not been systematically used in Western historiography China has undergone a series of fundamental political transformations from the 1911 Revolution that toppled the imperial system to the victory of the communists all of which were greatly affected by labor unrest This work places the politics of Chinese workers in comparative perspective and a remarkably comprehensive and nuanced picture of Chinese labor emerges from it based on a wealth of primary materials It joins the concerns of new labor history for workers culture and shopfloor conditions with a more conventional focus on strikes unions and political parties As a result the author is able to explore the linkage between social protest and state formation

Anyuan Elizabeth Perry, 2012-10-01 How do we explain the surprising trajectory of the Chinese Communist revolution Why has it taken such a different route from its Russian prototype An answer Elizabeth Perry suggests lies in the Chinese Communists creative development and deployment of cultural resources during their revolutionary rise to power and afterwards Skillful cultural positioning and cultural patronage on the part of Mao Zedong his comrades and successors helped to construct a polity in which a once alien Communist system came to be accepted as familiarly Chinese Perry traces this process through a case study of the Anyuan coal mine a place where Mao and other early leaders of the Chinese Communist Party mobilized an influential labor movement at the beginning of their revolution and whose history later became a touchstone of political correctness in the People s Republic of China Once known as China s Little Moscow Anyuan came over time to symbolize a distinctively Chinese revolutionary tradition Yet the meanings of that tradition remain highly contested as contemporary Chinese debate their revolutionary past in search of a new political future

Insurgency Trap Eli Friedman, 2014-05-08 During the first decade of the twenty first century worker resistance in China increased rapidly despite the fact that certain segments of the state began moving in a pro labor direction In explaining this Eli Friedman

argues that the Chinese state has become hemmed in by an insurgency trap of its own devising and is thus unable to tame expansive worker unrest Labor conflict in the process of capitalist industrialization is certainly not unique to China and indeed has appeared in a wide array of countries around the world What is distinct in China however is the combination of postsocialist politics with rapid capitalist development Other countries undergoing capitalist industrialization have incorporated relatively independent unions to tame labor conflict and channel insurgent workers into legal and rationalized modes of contention In contrast the Chinese state only allows for one union federation the All China Federation of Trade Unions over which it maintains tight control Official unions have been unable to win recognition from workers and wildcat strikes and other forms of disruption continue to be the most effective means for addressing workplace grievances In support of this argument Friedman offers evidence from Guangdong and Zhejiang provinces where unions are experimenting with new initiatives leadership models and organizational forms

Red Silk Robert

Cliver, 2021-02-01 Red Silk is a history of China s Yangzi Delta silk industry during the wars crises and revolutions of the mid twentieth century Based on extensive research in Chinese archives and focused on the 1950s the book compares two very different groups of silk workers and their experiences in the revolution Male silk weavers in Shanghai factories enjoyed close ties to the Communist party state and benefited greatly from socialist policies after 1949 In contrast workers in silk thread mills or filatures were mostly young women who lacked powerful organizations or ties to the revolutionary regime For many filature workers working conditions changed little after 1949 and politicized production campaigns added a new burden within the brutal and oppressive factory regime in place since the nineteenth century Both groups of workers and their employers had to adapt to rapidly changing circumstances Their actions protests petitions bribery tax evasion compelled the party state to adjust its policies producing new challenges The results though initially positive for many were ultimately

disastrous By the end of the 1950s there was widespread conflict and deprivation among silk workers and despite its impressive recovery under Communist rule the industry faced a crisis worse than war and revolution
