Competitiveness Of The Singapore Economy: A Strategic Perspective Kong Yam Tan, Mun Heng Toh, 1998-05-13 This book provides an intensive review of the economic competitiveness of the Singapore economy and identifies the strategies which will allow the economy to retain its competitive advantage in an increasingly globalised economic environment in future years It is a timely exercise in view of the fact that the international trading and investment climate has liberalised considerably and the regional economies are achieving remarkable economic growth and development which begin to challenge Singapore's competitive edge as a regional transportation hub international financial centre and a primary regional centre for technology and education

The Korean Developmental State Kyung Mi Kim, 2020-04-25 This book analyzes from a historical comparative perspective the Korean economic development model the extent to which it has changed from its classical model and what constitutes its changes and continuity Unlike studies claims the dissolution of Korean developmentalism the book holds that the Korean state maintains its characteristics of state led capitalism despite significant changes in policies and instruments rather than converge toward an AngloSaxon style free market system It emphasizes that the continuity of state led capitalism is compatible with institutional change Some institutionalists insist that the continuity of Korean developmentalism is based on path dependency In contrast this book argues that Korean capitalism could sustain its state developmentalism by changes in policies and instruments to improve national industrial competitiveness in the changed context of international competition This book will be of interest to East Asian scholars comparative economists and those curious about the future of the Korean peninsula

Systemic Competitiveness Klaus Esser, Wolfgang Hillebrand, Dirk Messner, Jörg Meyer-Stamer, 2013-10-18 The authors emphasize that an economy's competitiveness relies on purposive and intermeshed measures at the meta macro meso and micro level and a multidimensional guidance concept consisting of competition dialogue and shared decision making which integrates the key

groups of actors **Innovation and Technology in Korea** Jörg Mahlich, Werner Pascha, 2007-07-24 Only inadequately perceived by the Western public Korea has transformed into an economic heavy weight during recent decades The Korean government believes it can turn it into one of the top 10 competitive economies until 2010 This goal does not sound overambitious as Korea has undergone tremendous efforts in order to forge ahead in the field of research and development In some high tech industries Korean firms have advanced into leading players in the global market place and are increasingly challenging their international competitors Against this background the volume offers an in depth analysis of the Korean innovation system and shows how its science and technology policies actually work As Korea s economy is now reaching the status of a newly advanced economy the book also takes a close look on ongoing structural changes in the course of economic globalization **Globalization, Competitiveness and Human Security** Cristóbal Kay, 2012-10-12 This collection explores the connections between globalization competitiveness and human security and their relevance for development studies These issues amongst others are also explored in a number of case studies taken from Asia Africa and Latin America
