Shaping Written Knowledge The Genre Activity Of The Experimental Article In Science:

Shaping Written Knowledge Charles Bazerman, 1988 The forms taken by scientific writing help to determine the very nature of science itself In this closely reasoned study Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings Examining such works as the early Philosophical Transactions and Newton's optical writings as well as Physical Review Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists The rhetoric of science is Bazerman demonstrates an embedded part of scientific activity that interacts with other parts of scientific activity including social structure and empirical experience This book presents a comprehensive historical account of the rise and development of the genre and views these forms in relation to empirical experience *Rethinking Knowledge* Robert F. Goodman, Walter R. Fisher, 1995-02-01 This book explores issues of modernism and postmodernism in relation to knowledge methods of inquiry operations of the mind the role of values conceptions of self and the problematic of reason Among the distinguished contributors are Michael Arbib Aaron Ben-Zeev Helen Couclelis Mihaly Csikszentmihalyi Jane Flax George E. Marcus Donald McCloskey Donald Schon Barbara Herrnstein Smith and Charles Taylor **Handbook of Research on Writing** Charles Bazerman, 2009-03-04 The Handbook of Research on Writing ventures to sum up inquiry over the last few decades on what we know about writing and the many ways we know it How do people write How do they learn to write and develop as writers Under what conditions and for what purposes do people write What resources and technologies do we use to write How did our current forms and practices of writing emerge within social history What impacts has writing had on society and the individual What does it mean to be and to learn to be an active participant in contemporary systems of meaning This cornerstone volume advances the field by aggregating the broad ranging interdisciplinary multidimensional strands of writing research and bringing them together into a common intellectual space Endeavoring to synthesize what has been learned about writing in all nations in recent decades it reflects a wide scope of international research activity with attention to writing at all levels of schooling and in all life situations Chapter authors all eminent researchers come from disciplines as diverse as anthropology archeology typography communication studies linguistics journalism sociology rhetoric composition law medicine education history and literacy studies The Handbook's 37 chapters are organized in five sections The History of Writing Writing in Society Writing in Schooling Writing and the Individual Writing as Text This volume in summing up what is known about writing deepens our experience and appreciation of writing in ways that will make teachers better at teaching writing and all of its readers better as individual writers It will be interesting and useful to scholars and researchers of writing to anyone who teaches writing in any context at any level and to all those who are just curious about writing Exploring Science Communication Ulrike Felt, Sarah R. Davies, 2020-01-27 Exploring Science Communication demonstrates how science and technology studies approaches can be explicitly integrated into effective powerful science

communication research Through a range of case studies from climate change and public parks to Facebook museums and media coverage it helps you to understand and analyse the complex and diverse ways science and society relate in today's knowledge intensive environments Notable features include A focus on showing how to bring academic STS theory into your own science communication research Coverage of a range of topics and case studies illustrating different analyses and approaches Speaks to disciplines across Media Communication Science Technology Studies Health Sciences Environmental Sciences and related areas With this book you will learn how science communication can be more than just about disseminating facts to the public but actually generative leading to new understanding research and practices *The SAGE Handbook of Writing Development* Roger Beard, Debra Myhill, Jeni Riley, Martin Nystrand, 2009-07-09 Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood It provides those researching or teaching literacy with one of the most academically authoritative and comprehensive works in the field With expert contributors from across the world the book represents a detailed and valuable overview of a complex area of study *Handbook of Writing and Text Production* Eva-Maria Jakobs, Daniel Perrin, 2014-02-27 Writing matters and so does research into real life writing The shift from an industrial to an information society has increased the importance of writing and text production in education in everyday life and in more and more professions in the fields of economics and politics science and technology culture and media Through writing we build up organizations and social networks develop projects inform colleagues and customers and generate the basis for decisions The quality of writing is decisive for social resonance and professional success This ubiquitous real life writing is what the present handbook is about The de Gruyter Handbook of Writing and Text Production brings together and systematizes state of the art research The volume contains five sections focussing on I the theory and methodology of writing and text production research as well as on problem oriented and problem solving approaches related to II authors III modes and media IV genres and V domains of writing and text production Throughout the 21 chapters exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal multi semiotic text production **Interacting With Audiences** Ann M. Blakeslee, 2000-10-01 This distinctive monograph examines the dynamic rhetorical processes by which scientists shape negotiate and position their work within an interdisciplinary community Author Ann M Blakeslee studies the everyday rhetorical practices of a group of condensed matter theoretical physicists and presents here the first substantial qualitative study of the planning and implementation of discursive practices

by a group of scientists This volume also represents one of the first studies to use situated cognition and learning theory to study how knowledge of a domain's discursive practices is acquired by newcomers Unlike previous studies of scientists rhetorical practices which have focused primarily on the finished or published texts Blakeslee's involvement with the physicists as they engaged in the composing processes from jotting down planning notes through publishing a scientific paper suggests an alternative view of audience based on cooperative interaction between authors and their interlocutors From this innovative perspective functional knowledge of audiences comes only by entering into some community of practice in which readers also become self-defining interlocutors and even participants in joint projects Blakeslee's research follows the physicists' work into communal interactive dynamics looking at their overt attempts to get feedback from members of their audiences what that feedback was and how they responded to it This work addresses and extends a model for audience analysis that consists of two primary operations getting to know and understand one's interlocutors and determining how to reach and influence them In doing so it offers important insights into the dissemination of scientific information and thus will be of great interest to scholars and students in the areas of rhetoric of science and technology composition rhetorical theory and scientific writing
