Intelligence-Based Cardiology and Cardiac Surgery Anthony C. Chang, Alfonso Limon, Robert Brisk, Francisco Lopez-Jimenez, Louise Y Sun, 2023-09-06. *Intelligence-Based Cardiology and Cardiac Surgery* Artificial Intelligence and Human Cognition in Cardiovascular Medicine provides a comprehensive survey of artificial intelligence concepts and methodologies with real-life applications in cardiovascular medicine. Authored by a senior physician data scientist, the book presents an intellectual and academic interface between the medical and data science domains. The book's content consists of basic concepts of artificial intelligence and human cognition applications in cardiology and cardiac surgery. This portfolio ranges from big data, machine and deep learning, cognitive computing, and natural language processing in cardiac disease states such as heart failure, hypertension, and pediatric heart care. The book narrows the knowledge and expertise chasm between the data scientists, cardiologists, and cardiac surgeons, inspiring clinicians to embrace artificial intelligence methodologies, educate data scientists about the medical ecosystem, and create a transformational paradigm for healthcare and medicine. Covers a wide range of relevant topics from real-world data, large language models, and supervised machine learning to deep reinforcement and federated learning. Presents artificial intelligence concepts and their applications in many areas in an easy-to-understand format accessible to clinicians and data scientists. Discusses using artificial intelligence and related

technologies with cardiology and cardiac surgery in a myriad of venues and situations Delineates the necessary elements for successfully implementing artificial intelligence in cardiovascular medicine for improved patient outcomes Presents the regulatory ethical legal and financial issues embedded in artificial intelligence applications in cardiology *Meant to Be* Joyce Vissell, Barry Vissell, 2000-02-01 Presents a collection thirty eight true love stories Medical Data Sharing, Harmonization and Analytics Vasileios Pezoulas, Themis Exarchos, Dimitrios I Fotiadis, 2020-01-05 Medical Data Sharing Harmonization and Analytics serves as the basis for understanding the rapidly evolving field of medical data harmonization combined with the latest cloud infrastructures for storing the harmonized shared data Chapters cover the latest research and applications on data sharing and protection in the medical domain cohort integration through the recent advancements in data harmonization cloud computing for storing and securing the patient data and data analytics for effectively processing the harmonized data Examines the unmet needs in chronic diseases as a part of medical data sharing Discusses ethical legal and privacy issues as part of data protection Combines data harmonization and big data analytics strategies in shared medical data along with relevant case studies in chronic diseases *Neonatal Heart Disease* Robert M. Freedom, Leland N. Benson, Jeffrey F. Smallhorn, 2012-12-06 As pediatric cardiology becomes more and more neonatal cardiology and even fetal cardiology Neonatal Heart Disease by Robert M Freedom MD Leland N Benson MD and Jeffrey F Smallhorn MB is extraordinarily timely Neonatal Heart Disease consists of 50 chapters by 25 distinguished contributors and is a worthy successor to The Neonate With Congenital Heart Disease by Richard D Rowe MD and his colleagues 1968 and 1981 The first edition of this book in 1968 established Richard D Rowe MD as the father of neonatal cardiology As most pediatric cardiologists now know Dick Rowe died on January 18 1988 after a brief illness It will therefore come as no surprise that the present volume is dedicated to this great and gentle man Nor will it come as a surprise that I have been asked to devote this Foreword to Richard D Rowe MD pioneering neonatal cardiologist and incomparable personal friend What can one say about Dick Rowe Well there are at least two very different tales There is Dick Rowe the public man the factual account of Dick Rowe s achievements as a physician educator and research man the Dick Rowe that virtually everyone knows And then there is Dick Rowe the private man the extraordinary human being who only his personal friends were privileged to know I shall try to tell something of both stories First the public man the factual account is really quite amazing **Sharing Clinical Research Data** Forum on Drug Discovery, Development, and Translation, Forum on Neuroscience and Nervous System Disorders, National Cancer Policy Forum, Roundtable on Translating Genomic-Based Research on Health, Board on Health Sciences Policy, Board on Health Care Services, Institute of Medicine, 2013-05-21 Pharmaceutical companies academic researchers and government agencies such as the Food and Drug Administration and the National Institutes of Health all possess large quantities of clinical research data If these data were shared more widely within and across sectors the resulting research advances derived from data pooling and analysis could improve public health enhance patient safety and

spur drug development Data sharing can also increase public trust in clinical trials and conclusions derived from them by lending transparency to the clinical research process Much of this information however is never shared Retention of clinical research data by investigators and within organizations may represent lost opportunities in biomedical research Despite the potential benefits that could be accrued from pooling and analysis of shared data barriers to data sharing faced by researchers in industry include concerns about data mining erroneous secondary analyses of data and unwarranted litigation as well as a desire to protect confidential commercial information Academic partners face significant cultural barriers to sharing data and participating in longer term collaborative efforts that stem from a desire to protect intellectual autonomy and a career advancement system built on priority of publication and citation requirements Some barriers like the need to protect patient privacy present challenges for both sectors Looking ahead there are also a number of technical challenges to be faced in analyzing potentially large and heterogeneous datasets This public workshop focused on strategies to facilitate sharing of clinical research data in order to advance scientific knowledge and public health While the workshop focused on sharing of data from preplanned interventional studies of human subjects models and projects involving sharing of other clinical data types were considered to the extent that they provided lessons learned and best practices The workshop objectives were to examine the benefits of sharing of clinical research data from all sectors and among these sectors including for example benefits to the research and development enterprise and benefits to the analysis of safety and efficacy Sharing Clinical Research Data Workshop Summary identifies barriers and challenges to sharing clinical research data explores strategies to address these barriers and challenges including identifying priority actions and low hanging fruit opportunities and discusses strategies for using these potentially large datasets to facilitate scientific and public health advances
