Mary Kay Carson, 2019 Tells readers all they ever wanted to know about shark life including what they eat whether they have bones when they sleep and if they glow in the dark *Swimming with Sharks in Dark Water* Athene Brinson, 2018-05-31 Individuals are not racist by intent they are racist by culture heritage and education If I were to ask anyone if they were a racist they would immediately deny it as a possibility They would espouse their wonderful humanitarian acts or friends of color that would support an embracement of diversity that would make us all proud The truth I have never met a racist that knew they were racist Even when educated as to what they have done they would go to their grave stating that under no circumstances should I ever consider them a racist This book is designed to tell you that it does not matter how many racists you meet in the office you can still be successful This book is designed to help you identify and cope and achieve success in those corporate environments that are not well It provides you with advice on how to swim with sharks in dark water This book will help you to use your Spidey senses to trust your gut to identify when you are working on a plantation how to cope until you can leave Oh by the way I need to tell you that you do not have the power at any time on any day to fix the plantation without permanently damaging your career The people who have fixed these issues have sacrificed their career possibly their livelihood to ensure that we do not experience what they did They shall always be the nameless heroes of our generation We will always be indebted to those individuals who spoke up and lost their livelihood as a result You need to understand that making a difference has a cost and those that have done this have paid dearly

Burgess describe the fascinating biology, behavior, diversity, and the fact that there are more than 1,000 species worldwide and the cultural importance of sharks, their close relationship to skates and rays, and their critical role in healthy ecosystems. Helfman and Burgess take readers on a round-the-world tour of shark habitats, which include oceans as well as lakes and even rivers as far up the Mississippi as St. Louis. They describe huge, ferocious predators like Great White and Tiger sharks, and species such as Basking and Whale sharks that feed on microscopic prey yet can grow to lengths of more than 40 feet. The mysterious and powerful Greenland shark, the authors explain, reaches a weight of 2,200 pounds on a diet of seal flesh. Small, less than 2-foot-long Cookiecutter sharks attack other sharks and even take a chunk out of the occasional swimmer. Despite our natural fascination with sharks, we have become their worst enemy. Many shark species are in serious decline, and a number are threatened with extinction as a result of overfishing and persecution.

Sharks: The Animal Answer Guide presents a perfect mix of current science, history, anthropology, intriguing facts, and gripping photographs. Whether your fascination with sharks stems from fear or curiosity, your knowledge of these animals will improve immensely when you consult this book. *Guess the Shark* Kari Noel, 2018-06-22.
