Sharks Gene Helfman, George H. Burgess, 2014-05-15 Do sharks lay eggs or give birth to live young Do sharks sleep How long do they live How likely are shark attacks This book answers your questions about some of nature's most misunderstood animals Answering every conceivable question about sharks authors Gene Helfman and George H Burgess describe the fascinating biology behavior diversity there are more than 1 000 species worldwide and cultural importance of sharks their close relationship to skates and rays and their critical role in healthy ecosystems Helfman and Burgess take readers on a round the world tour of shark habitats which include oceans as well as lakes and even rivers as far up the Mississippi as St Louis They describe huge ferocious predators like Great White and Tiger sharks and species such as Basking and Whale sharks that feed on microscopic prey yet can grow to lengths of more than 40 feet The mysterious and powerful Greenland shark the authors explain reaches a weight of 2 200 pounds on a diet of seal flesh Small less than 2 foot long Cookiecutter sharks attack other sharks and even take a chunk out of the occasional swimmer Despite our natural fascination with sharks we have become their worst enemy Many shark species are in serious decline and a number are threatened with extinction as a result of overfishing and persecution Sharks The Animal Answer Guide presents a perfect mix of current science history anthropology intriguing facts and gripping photographs Whether your fascination with sharks stems from fear or curiosity your knowledge of these animals will improve immensely when you consult this book

Sharks in the Arts Vivienne Westbrook, Shaun Collin, Dean Crawford, Mark

Nicholls, 2018-05-11 This book is the most thorough exploration to date of the many ways in which a wild creature has been absorbed reimagined and represented across the ages in all of the major art forms The authors consider not only how the identity of sharks in the natural environment became incorporated into a cultural environment but also how sharks came to be considered the most feared creatures in the open oceans as a consequence of this incorporation Yet sharks are especially important in helping to maintain a balance that is essential to the health of the oceans The book begins with a treatment of

the three sharks at the top of global shark attack files from scientific economic and environmental perspectives Subsequent chapters engage with cultural representations of sharks in poetry drama art novels screenplay adaptations and films Through an exploration of the ways in which sharks have been represented in human culture through the centuries this book alerts the global community to the importance of sharks as a common cultural heritage It aims to change perceptions of sharks so that they can become more revered than feared The authors of this book argue that an increased understanding of sharks should lead to the development of better strategies for shark and human interactions This book will be of great interest to researchers and students of the Environmental Humanities Cultural History and the Arts It is also excellent supplementary reading for courses in Zoology and Marine Science
