Ebert, Sarah Fowler, 2021-07-20 Fully revised and updated Back cover      *The Sharks and Rays of South Australia* Trevor Dennison Scott, 1955      *The Action Plan for Australian Sharks and Rays 2020* Peter Kyne, Michelle Heupel, William White, Colin Simpfendorfer, 2021-05-26 The Action Plan for Australian Sharks 2020 is the first action plan for Australia's chondrichthyan fishes sharks rays and chimaeras This book presents the IUCN Red List status of all 329 species occurring in Australian waters including Subantarctic and Antarctic waters The majority of the fauna is secure although roughly one in eight species is threatened with extinction The Action Plan presents specific actions required to address knowledge gaps and outlines conservation actions for each species This book is a call to action to secure all of Australia's sharks rays and chimaeras      **Rays of the World** Peter Last, Gavin Naylor, Bernard Séret, William White, Marcelo de Carvalho, Matthias Stehmann, 2016-12 Rays are among the largest fishes and evolved from shark like ancestors nearly 200 million years ago They share with sharks many life history traits all species are carnivores or scavengers all reproduce by internal fertilisation and all have similar morphological and anatomical characteristics such as skeletons built of cartilage Rays of the World is the first complete pictorial atlas of the world's ray fauna and includes information on many species only recently discovered by scientists while undertaking research for the book It includes all 26 families and 633 valid named species of rays but additional undescribed species exist for many groups Rays of the World features a unique collection of paintings of all living species by Australian natural history artist Lindsay Marshall compiled as part of a multinational research initiative the Chondrichthyan Tree of Life Project Images sourced from around the planet were used by the artist to illustrate the fauna This comprehensive overview of the world's ray fauna summarises information such as general identifying features and distributional information about these iconic but surprisingly poorly known fishes It will enable readers to gain a better understanding of the rich diversity of rays and promote wider public interest in the group Rays of the World is an ideal reference for a wide range of readers including conservationists fishery managers scientists fishers divers students and book collectors      A Pocket Guide to Sharks of the

World David A. Ebert, Marc Dando, Sarah Fowler, 2021-08-24 An updated and comprehensive guide identifying all of the world's sharks. Sharks are some of the most misunderstood animals on the planet. We still have a lot to learn about these fascinating creatures which are more seriously threatened with extinction and in greater need of conservation and management than any other major group of vertebrates. A Pocket Guide to Sharks of the World is the only field guide to identify, illustrate and describe every known shark species. Its compact format makes it handy for many situations including recognizing living species, fishery catches or parts sold at markets. This expanded second edition presents lavish images, details on newly discovered species and updated text throughout. The book contains useful sections on identifying shark teeth and the shark fins most commonly encountered in the fin trade and takes a look at shark biology, ecology and conservation. A Pocket Guide to Sharks of the World will be an essential resource and definitive reference for years to come. An updated guide to all of the world's sharks. Each species is illustrated and described. Handy compact format with concise text. Useful sections on the identification of shark teeth and fins.

**An Illustrated Pocket Guide to the Sharks of the World** David A. Ebert, Sarah Fowler, Sarah L. Fowler, 2014-06-16 Sharks are probably the most misunderstood animals on the planet. We all still have a lot to learn about these fascinating creatures which are sadly more seriously threatened with extinction and in greater need of conservation and management action than any other major group of vertebrates. We have produced this guide not just because we and so many other people love sharks. It is also because their identification, whether of living animals, fishery catches or body parts sold at markets, is an essential tool to support shark conservation, fisheries management and international trade regulation, prevent further depletion of stocks and enable their recovery. The first pocket guide to all 501 shark species, all species illustrated and described, handy compact format with concise text. A six-page guide to shark teeth identification, an eight-page guide to the identification of the shark fins most commonly encountered in the fin trade. Colour plates are by Marc Dando from the hugely acclaimed *Sharks of the World: A Fully Illustrated Guide*.

**Sharks and Their Relatives II** Jeffrey C. Carrier, John A. Musick, Michael R. Heithaus, 2010-03-09 Since the award-winning first volume *The Biology of Sharks and Their Relatives* published in 2004, the field has witnessed tremendous developments in research, rapid advances in technology and the emergence of new investigators beginning to explore issues of biodiversity, distribution, physiology and ecology in ways that eluded more traditional.

**Sharks of the Open Ocean** Merry D. Camhi, Ellen K. Pikitch, Elizabeth A. Babcock, 2009-01-21 This important and exciting title represents the first authoritative volume focussed on pelagic open ocean sharks as a group. Virtually every pelagic shark expert in the world has contributed to this landmark publication which includes the latest data and knowledge on pelagic shark biology, fisheries management and conservation. Pelagic sharks face unprecedented levels of exploitation in all the world's oceans through both direct fisheries and by catch, and effective management for these species is contingent upon solid science and data which this book brings together for the first time. All those involved in shark biology will need to have a copy of this book.

**The Great Barrier Reef** Pat

Hutchings, Michael Kingsford, Ove Hoegh-Guldberg, 2019-02-01 The iconic and beautiful Great Barrier Reef Marine Park is home to one of the most diverse ecosystems in the world. With contributions from international experts, this timely and fully updated second edition of *The Great Barrier Reef* describes the animals, plants, and other organisms of the reef, as well as the biological, chemical, and physical processes that influence them. It contains new chapters on shelf slopes and fisheries and addresses pressing issues such as climate change, ocean acidification, coral bleaching, and disease, and invasive species. The Great Barrier Reef is a must-read for the interested reef tourist, student, researcher, and environmental manager. While it has an Australian focus, it can equally be used as a reference text for most Indo-Pacific coral reefs.

Sharks: Conservation, Governance and Management Erika J. Techera, Natalie Klein, 2014-06-05 The key aim of this book is to explore the global conservation and management of sharks. There has been a rapid decline in populations of many shark species, while new science has emerged of the critical role they play in marine ecosystems. However, the authors show that conservation law and policy have been slow to develop, with only a small number of iconic species being protected worldwide. The increase in fishing impact, primarily through shark finning and bycatch, has led to shark conservation receiving greater international attention in recent years. The book explores our current knowledge and status of the law and science in relation to sharks, with a particular focus on improving frameworks for their conservation and management. Recent trends are analysed, including shark finning bans that have been put in place in several countries, the widening number of nations establishing shark sanctuaries, and the growth of shark-based tourism. The efficacy of current listing processes for endangered species and fisheries regulations is also examined. Tourism is explored as an alternative to fishing, and the risks and impacts associated with this industry are analysed. Contributors include leading authorities from universities and conservation organizations in North America, Europe, and Australia. A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for interdisciplinary research and management approaches that are necessary to address the decline in sharks.
