THE PHYSIOLOGICAL AND PSYCHOLOGICAL EFFECTS OF COMBAT STRESS EXPERIENCED BY THE HEAVY BOMBARDMENT CREWS OF THE EIGHTH AIR FORCE DURING WWII Anthony Cardo,2025-02-21 The Physiological and Psychological Effects of Combat Stress Experienced by the Heavy Bombardment Crews of the Eighth Air Force during WWII offers a unique window into the effects of combat stress as experienced by a select number of men in a select moment of time and one that is unlikely to be experienced again by mankind This is not to say that future combat aviators will not experience the unique effects of combat stress as this is nearly a given as the record of man s wartime experiences shows but that the unique environment the men of the Eighth Air Force experienced will likely not be repeated to the same degree going forward With that being the most likely case author and military historian Anthony Cardo seeks to also explore what the experiences of the heavy bombardment crews of the Eighth Air Force with the physiological and psychological effects of combat stress have to offer posterity and aims to inspire the reader to ask for themselves what these experiences have to offer posterity What this work is not is a clinical study on the bomber crewmen nor is it meant to be an exhaustive study on the subject Instead it is meant to add to the historical discussion by categorizing some of the various physiological and psychological symptoms of combat induced fear and providing commentary on its significance and relation to the wider

literature on the effects of combat stress on human beings If the work succeeds in fueling your interest or curiosity on the topic and propels you into further research then it has at least succeeded in its overall goal to both raise awareness and the discussion on the topic I hope you enjoy it as I enjoyed both researching and drafting this work

A Manifesto for Mental Health Peter Kinderman, 2019-10-08 A Manifesto for Mental Health presents a radically new and distinctive outlook that critically examines the dominant disease model of mental health care Incorporating the latest findings from both biological neuroscience and research into the social determinants of psychological problems Peter Kinderman offers a contemporary biopsychosocial alternative He warns that the way we care for people with mental health problems is creating a hidden human rights emergency and he proposes a new vision for the future of health organisations across the globe The book highlights persuasive evidence that our mental health and wellbeing depend largely on the society in which we live on the things happen to us and on how we learn to make sense of and respond to those events Kinderman proposes a rejection of invalid diagnostic labels practical help rather than medication and a recognition that distress is usually an understandable human response to life's challenges Offering a serious critique of establishment thinking A Manifesto for Mental Health provides a well crafted demonstration of how with scientific rigour and empathy a revolution in mental health care is not only highly desirable it is also entirely achievable

The Refugee VIC K. A, 2022-11-03 This is a compelling story about my experience in my country's civil war Each time I revisit that time capsule it brings back my memory of the events that took place during the war It was the most miserable moment of my life when my city was overrun by the invading soldiers In view of this my family had to evacuate my city to a neighboring town about thirty miles away My father did not stay to welcome the invading soldiers because he sat high in the socioeconomic standard in the rebel area My father left his city on the advice of his governor and the military leaders in his city he was compelled to desert his subjects to other towns We stayed in this other town for about three months when it was besieged by the invading army and we had to evacuate this town again for another town almost forty miles away from my original town Our refugee journey had begun and the epic journey continued as we traveled to more than four towns My father became the father of more than two hundred refugees who depended on him for survival Fortunately the governor or the administrator as he was called then was always very close to my father to assist him in all he needed to house and feed the refugees that followed along with him There was mass starvation and severe malnutrition in the refugee camps that made my father very weary of the situation My father became very emaciated and became very sick Unfortunately he succumbed to the heart attack that fell on him he died and was buried unceremoniously in the village that was not his His death looked like the end of the refugees but my uncle had to continue to bear the cross of all the refugees until the war ended after three years of refugee life You don't know the evils of war until you are a refugee

Medicine and Modern Warfare , 2016-08-29 After years at the margins of medical history the relationship between war and medicine is at last beginning to move centre stage The essays in this volume focus on one important aspect of that relationship the practice and development of medicine within the armed forces from the late nineteenth century through to the end of the Second World War During this crucial period medicine came to occupy an important position in military life especially during the two world wars when manpower was at a premium Good medical provisions were vital to the conservation of manpower protecting servicemen from disease and returning the sick and wounded to duty in the shortest possible time A detailed knowledge of the serviceman's mind and body enabled the authorities to calculate and standardise rations training and disciplinary procedures Spanning the laboratory and the battlefield and covering a range of national contexts the essays in this volume provide valuable insights into different national styles and priorities They also examine the relationship between medical personnel and the armed forces as a whole by looking at such matters as the prevention of disease the treatment of psychiatric casualties and the development of medical science The volume as a whole demonstrates that medicine became an increasingly important part of military life in the era of modern warfare and suggests new avenues and approaches for future study

The Poetry of Shell Shock Daniel Hipp, 2005-07-28 The British poets Wilfred Owen Ivor Gurney and Siegfried Sassoon found themselves psychologically altered by what they experienced in the First World War

Owen was hospitalized in April 1917 for shell shock in Scotland where he met Siegfried Sassoon in June of that year hospitalized for the same affliction Ivor Gurney found the war ironically to have been a place of relative stability within an otherwise tormented life When he was wounded during the war s final year his doctors observed signs of mental illness which evolved into incapacitating psychosis by 1922 For each of these men all poets before the war poetry served as a way to inscribe continuity into their lives enabling them to retaliate against the war s propensity to render the lives of the participants discontinuous Poetry allowed them to return to the war through memory and imagination and poetry helped them to bring themselves back from psychological breakdown to a state of stability based upon a relationship to the war that their literary war enabled them to create and discover This work investigates the ways in which the poetry of war functioned as a means for these three men to express the inexpressible and to extract value out of the experience of war Bibliography and index are also included Instructors considering this book for use in a course may request an examination copy here
