Macroeconomics A Neoclassical Introduction Irwin Series In Economics:

Macroeconomics Merton H. Miller, Charles W. Upton, 1986-10-15 Miller and Upton is by far the most cited macroeconomics text in front line academic research journals over the last ten years It has become a contemporary classic Roger C Kormendi University of Michigan The most innovative approach to introducing macroeconomics that I have seen A classic in the sense that every serious student of macroeconomics is likely to want it in his or her library John P Gould University of Chicago The task the authors set out to perform is ambitious to write a macroeconomics textbook structured around a neoclassical growth model And in this task they have succeeded Clifford W Smith Jr Journal of Finance This is a superb book As a vehicle for teaching economics I have to place it right behind Henderson and Quant Microeconomics and Dorfman Samuelson and Solow Linear Programming Moreover it is an exciting book both to read and to think about It is not just that these authors have something to say but their way of saying it is generally superior F E Banks Kyklos A Pluralistic Introduction to Macroeconomics Hendrik Van den Berg, 2024-03-14 This introductory textbook provides a broad introduction to the field of macroeconomics and the alternative approaches to modeling an economic system It ultimately demonstrates that economic modeling is always a matter of choice and compromise and no one school of thought can accurately capture the full essence of a real evolving economic system under all circumstances in all places and at all times in history Quarterly Check-list of Economics & Political Science ,1974 **Foundations of Supply-Side Economics** Victor A. Canto, Douglas H. Joines, Arthur B. Laffer, 2014-05-10 Foundations of Supply Side Economics Theory and Evidence is composed of a series of papers containing both theoretical and empirical analyses of a set of issues in government fiscal policy The type of analysis employed in the book is standard neoclassical economics and this analysis is used to study the macroeconomic incentive effects of taxation The book contains contributions that cover the analysis of the effects of taxes imposed purely for generating revenues the process of capital formation and an attempt to integrate supply side analysis into a traditional macroeconomic framework Reports on the empirical evidence on taxation and economic activity and the estimation of a small macroeconomic model of the United States for the postwar period description of a method of calculating effective marginal tax rates on factor incomes using available U S data and the estimation of the effect of fiscal policy on private investment in plant and equipment are presented as well Economists will find the book highly insightful

Collected Papers on Monetary Theory Robert E. the effect of social security on private saving an analysis of aggregate consumer behaviour the philosophy and objectives of econometrics and other topics in macroeconomic and econometric analysis Monetary Economics in the 1990s Forrest Capie,1997-02-12 This volume is the second collection of the series of lectures held annually at City University London in honour of Henry Thornton the renowned 19th Century monetary economist As with Monetary Economics in the 1980s 0 333 46220 3 the essays by extremely eminent contributors are wide ranging in both subject and approach but all develop topics considered by Henry Thornton over a century ago and link historical perspectives to contemporary debates about financial institutions and monetary economics **Selected Works of Merton H. Miller: A Celebration of Markets: Volume 2**

Merton H. Miller,2002-06-02 Widely regarded as one of the founders of modern corporate finance Merton H Miller was awarded a Nobel Prize in 1990 for his work in the theory of finance and financial economics Selected Works of Merton H Miller gathers together in two volumes a selection of Miller s most influential contributions over more than fifty years of active research A common theme running throughout both volumes is Miller s conviction about the utility of market based approaches to topics as diverse as dividend policy bank regulation the structure of securities markets and competition between research universities and teaching colleges Miller was perhaps best known for a series of highly influential papers he cowrote in the 1950s and 1960s with fellow Nobel laureate Franco Modigliani that advanced a set of capital structure theorems later dubbed the M and M propositions In brief the M and M propositions state that the actions of investors firms and capital markets will cause the market value of a firm to be independent of its capital structure In other words a corporation s value depends on its investments in people ideas and physical capital goods and not on the mix of bonds stocks and other securities used to finance the investments Four of these papers are reprinted here together with important later work by Miller in macroeconomics corporate capital structure management science asset pricing and the economic and regulatory problems of the financial services industry Diverse and innovative the papers in Selected Works of Merton H Miller will interest students and practitioners of economics finance and business as well as policymakers responsible for market regulation **Library of Congress Catalogs** Library of Congress,1976 **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles *Library of Congress Catalog* Library of Congress,1974 A cumulative list of works represented by Library of Congress printed cards Temporary Equilibrium and Long-Run Equilibrium (Routledge Revivals) Willem H. Buiter,2014-06-27 This title first published in 1979 presents the Ph D thesis of the world renowned economist and financial expert Willem Buiter In Part I three alternative specifications of temporary equilibria in asset markets including their implications for macroeconomic models are discussed Part II examines the long term implications of some short term macroeconomic models The analysis of the theoretical foundations of direct crowding out and indirect crowding out is particularly prominent with the result that a synthesis of short term macroeconomic analysis and long term growth theory is formulated The traditional tools of comparative dynamics and stability analysis are employed frequently

However it is also argued that the true scope of government policy can only be adequately evaluated with the aid of concepts such as dynamic and static controllability Temporary Equilibrium and Long Run Equilibrium is a valuable study and relevant for all serious students of modern economic theory **Money, Banking, and the Macroeconomy** Douglas Vickers,1985

The Economics of Unemployment in Britain John Creedy,1981 Textbook on the economic implications of unemployment in the UK examines effects of labour market adjustments on unemployment application of disequilibrium economic theory measurement the role of unemployment benefit in acting as an incentive for not working phillips curve relations between wages prices inflation and employment and considers unemployment data collecting Bibliography after each chapter and graphs Social Security, Promise and Reality Rita Ricardo Campbell,1977 **Reconstructing Political Economy** William K. Tabb,2002-01-22 This volume offers an original perspective on the questions the great economists have asked and looks at their significance for todays world Written in a provocative and accessible style it examines how the diverse traditions of political economy have conceptualised economic issues events and theory Going beyond the orthodoxies of mainstream economics it shows the relevance of political economy to the debates on the economic meaning of our times Reconstructing Political Economy is a timely and thought provoking contribution to a political economy for our time In this light it offers fresh insights into such issues as modern theories of growth the historic relations between state and market and the significance of globalisation for modern societies *Monetary and Fiscal Policies and Their Application* Karl Brunner,Allan H.
