Acceleration of History Alexios Alecou,2016-09-30 We willingly imagine that the speed of development of events has always remained constant here on earth This is reflected in the fact that it is generally believed that the rate of natural phenomena is the same today as it has always been in the past and will remain this way more or less in the future It is now a fact that the speed of progression of events is not constant over time It was ascertained that since around the beginning of the 20th century the rate has accelerated in various fields hence the term acceleration of history came to describe this phenomenon This acceleration continues its course today and will even intensify Examples meeting these historical vaults in short time periods are many either local or international that contributed to the change of the direction of history Under any circumstances though the mature conditions for change are not enough without the human interference This phenomenon has been referred to as the acceleration of history in order to emphasize the fact that if in the past a certain lapse of time was necessary for history to unfold for the events to take place today and starting around the beginning of the 20th century this time lapse was becoming increasingly shorter The events today therefore have intensified much more than in the past So which are considered as the main acceleration periods in history Which events or developments de normalized or deeply reformed the then acceptable norms either national or international Which events or developments changed the hard bits of history These are the questions that we will try to answer in this edited volume

Faith as an Option Hans Joas,2014-09-03 Many people these days regard religion as outdated and are unable to understand how believers can intellectually justify their faith Nonbelievers have long assumed that progress in technology and the sciences renders religion irrelevant Believers in contrast see religion as vital to society's spiritual and moral well being But does modernization lead to secularization Does secularization lead to moral decay Sociologist Hans Joas argues that these two supposed certainties have kept scholars from serious contemporary debate and that people must put these old arguments aside in order for debate to move forward The emergence of a secular option does not mean that religion must decline but that even believers must now define their faith as one option among many In this book Joas spells out some of the consequences of the abandonment of conventional assumptions for contemporary religion and develops an alternative to the cliché of an inevitable conflict between Christianity and modernity Arguing that secularization comes in waves and stressing the increasing contingency of our worlds he calls upon faith to articulate contemporary experiences Churches and religious communities must take into account religious diversity but the modern world is not a threat to Christianity or to faith in general On the contrary Joas says modernity and faith can be mutually enriching
