## **Macromolecular Synthesis:**

Macromolecular Synthesis and Growth Ronald A. Malt, Jonathan R. Warner, 1967      **An Introduction to Radiobiology** A. H. W. Nias, 1998-06-11 This new edition of A H W Nias successful book provides an updated and revised introduction to quantitative radiobiology particularly to those aspects of the subject which have a practical application Radiation is used to cure cancer but can also cause it Radiation is also used in medical diagnosis and in nuclear power stations In these areas where questions of benefit and detriment arise the biological effects of the radiation can now be predicted There are few aspects of life where risk estimates are so firmly founded on quantitative data This is not only because of the precision with which radiation dose can be measured but also because of the large body of radiobiological observations which have been made since X rays were discovered Written by a scientist with many years experience in the field An Introduction to Radiobiology will appeal to a wide variety of readers who need to understand the mechanisms by which ionizing radiation causes cellular damage It will be of interest to technologists in radiation therapy nuclear medicine and diagnostic radiography cancer research students and technicians medical physicists trainee radiotherapists and nuclear medicine specialists Reviews of the First Edition In summary this is an excellent general text that should fill an important gap in many teaching needs especially those where the major focus is on the biological effects of radiation on humans Journal of the National Cancer Institute This is undoubtedly one of the better introductions to the subject which I have read and I would certainly recommend it not only to beginners but also to mature students of the subject The British Journal of Radiology

**Cellular control mechanisms of macromolecular synthesis** Symposium on Cellular Control Mechanisms of Macromolecular Synthesis, 1963      Regulation of Macromolecular Synthesis By Low Molecular Weight Mediators Gebhard Koch, 2012-12-02 Regulation of Macromolecular Synthesis by Low Molecular Weight Mediators contains the proceedings of the Workshop on Regulation of Macromolecular Synthesis by Low Molecular Weight Mediators held at Hamburg on May 29 31 1979 The book discusses the functions and metabolism of guanosine 3 5 bis diphosphate the purine nucleotides and sporulation and the highly phosphorylated nucleotide in eukaryotes The text also describes the alteration of translational mechanisms as well as 2 5 oligoadenylic acid and interferon      **Cytodifferentiation and Macromolecular Synthesis** Michael Locke, 2012-12-02 Cytodifferentiation and Macromolecular Synthesis focuses on research on biosynthesis structure and morphology of cells The book first discusses cytodifferentiation and macromolecular synthesis and genetic control of protein structure The relationship of amino acid substitutions to the genetic code comparison of gene and protein alterations and suppressor mutations are described The text also looks at genetic repression allosteric inhibition and cellular differentiation epigenetic control of protein synthesis in cells quantitative studies of protein synthesis in embryonic tissues and chromosomes and cytodifferentiation The book also discusses the morphological and chemical differentiation of plastids

The effect of light on plastid development structure of mature chloroplast morphological changes in the development of proplastid to the chloroplast and inheritable factors that control plastids are described The text also focuses on the collagen system mechanisms of elongation and tissue interaction and metabolic responses The book is a valuable reference for readers wanting to conduct research on the complex nature of cells     The Role of Apoptosis in Development, Tissue Homeostasis and Malignancy R.M. Dexter,A.H. Wyllie,M.C. Raff,2012-12-06 The past five years have witnessed a remarkable development of interest in cell death from inside out After 30 years of relative obscurity its quantitative importance in the building and maintenance of normal tissues the subtle strategies involved in its regulation and its significance in the pathogenesis of diseases of major social importance are becoming clear Moreover because a distinct set of biological events is involved in this death these events themselves become reason able targets for new pharmacological agents in the treatment of cancer The articles in this volume summarize the contents of a discussion meeting held at the Royal Society on 23 and 24 February 1994 The authors are a distinguished international group from a variety of disciplines in biology and medicine and hopefully their articles will convey something of the excitement of this fast moving field The three organizers are enormously indebted to all the contributors for the enthusiasm with which they delivered their talks shared in discussion and finally committed their contributions to these printed pages We would also like to acknowledge the gracious way in which the Royal Society hosted the meeting and in particular Mary Manning for making it the trouble free and enjoyable experience that it was and Janet Clifford and Simon Gribbin for skillfully managing the editorial processing of this volume Michael Dexter June 1994 Martin Raff Andrew Wyllie x 1 Death from inside out an overView ANDREW H     Macromolecules and Behavior John Gaito,2012-12-06 I Introduction 1 Introduction II Products of DNA Activation 2 Macromolecules Functional and Biochemical Correlates 3 Brain Function and RNA 4 Macromolecules and Brain Function 5 Inhibitors of Cerebral Protein or RNA Synthesis and Memory 6 Biological Assays for the Molecular Coding of Acquired Information 7 Biological Activity of Antibrain Antibody an Introduction to Immunoneurology 8 Correlation of the S 100 Brain Protein with Behavior III Macromolecules and Intracellular Inter cellular and Synaptic Events 9 Axoplasmic Flow The Fast Transport System in Mammal     **Annual Report** National Cancer Institute (U.S.). **Animal Memory** Werner K. Honig,P. H. R. James,2013-10-22 Animal Memory is based on the proceedings of a symposium held at Dalhousie University in the summer of 1969 Each of the seven chapters provide broad coverage of the topic with which it is concerned and the experimental work reported is representative of the most significant developments in the field The book includes two studies on associative memory the memory of one event which is essential to its association over a delay with subsequent events One study shows that shows that animals can remember events from one learning trial to the next and that their behavior will be determined largely by the sequences of trials with differing outcomes

the other presents research on the association of flavors with toxicosis in a conditioning paradigm Separate chapters deal with retentive memory the retention and forgetting of learned behavior over time and the physiological basis of memory in terms of consolidation theory These studies demonstrate that animals do forget and examine theories of forgetting The final chapter provides a critical discussion based on all of the foregoing material in which the topics covered in the book are related to current work on human retention and forgetting      **Microbiology Of Chlamydia** Almen L. Barron,2019-06-04 First Published in 1988 this book offers a full comprehensive guide into microbiology of Chlamydia and its relationship with our bodies Carefully compiled and filled with a vast repertoire of notes pictures and references this book serves as a useful reference for Students of Medicine and other practitioners in their respective fields      *Cumulated Index Medicus* ,1972

**ATP and the Heart** Joanne S. Ingwall,2012-12-06 ATP plays a central role in the two leading causes of cardiac morbidity and mortality in the western world ischemia and heart failure We are in our infancy applying what is known about biology and chemistry of ATP toward developing effective therapies for these diseases In this volume the current understanding of the chemistry and biology of ATP specifically in the cardiomyocyte is presented New insights into ATP have been gleaned using biophysical techniques allowing dynamic measurement of chemical events in the intact beating heart and using new animal models in which cardiac proteins are either over expressed deleted or harbor specific mutations This book provides a summary of the basic understanding and includes illustrations of why ATP and the Heart is important to both the clinician and scientist      **Apoptosis: Pharmacological Implications and Therapeutic Opportunities** ,1997-07-23 Programmed cell death PCD has become a topic of widespread interest and experimentation over the past decade Written by experts in the field Apoptosis Pharmacological Implications and Therapeutic Opportunities concentrates on presenting an overview of PCD pathways as they are currently understood and strives to identify important unanswered questions as well as other therapeutic possibilities suggested by recent biochemical discoveries Understanding the biochemical pathways that participate in the cell death process has become an important goal in developmental biology neurobiology cardiology and infectious disease research The control of apoptosis has also become a major area of investigation in the field of cancer biology Apoptosis Pharmacological Implications and Therapeutic Opportunities contains an overview for those with a general interest in apoptosis and provides discussions of sufficient depth to be useful for specialists in the field      **The Herpesviruses** Albert Kaplan,1973-01-01 The Herpesviruses provides information pertinent to all the herpesviruses with emphasis on the classification morphology replication physical chemical properties and immunological relationships of all the herpesviruses This book presents the fundamental and clinical aspects of the viruses Organized into 21 chapters this book starts with an overview of the classification of the herpesvirus and proceeds to explore the origins and phylogeny of the herpesviruses This text then examines the earliest electron microscopic studies on the morphology of the herpesviruses by using shadowcast preparations of herpes simplex virus and of herpes zoster virus Other chapters consider the serological

tests as well as the antigenic relationships among herpesviruses The final chapter deals with the clinical application of antiviral drug treatment This book is a valuable resource for virologists molecular biologists veterinarians physicians as well as teachers and graduate students who are interested in the herpesviruses from either a fundamental or clinical viewpoint
